How video based peer-to-peer interaction can optimize learning Henrik Jensen Mondrup, 2014-03-03 The goal of the pilot project is to create a model for lifelong learning alongside traditional formal higher education (p2pu.com 2013b), and to deliver high quality education for free through: “openness, community and peer learning” (ibid). The way this is done is by: “Learning for the people, by the people” (ibid). The Doing Archives project recognizes that learning happens anywhere, and not just in higher education classrooms, as well as recognizing the difficulties involved in getting recognition for skills and achievements that happens outside of school (vimeo.com 2013).

Natural Resource Management in the Hillside of Honduras Bruno Barbier, Gilles Bergeron, 2001-01-01 Farmers who live in fragile tropical hillside often operate under severe resource constraints and face difficult tradeoffs when confronted with changes in production conditions. Using a bioeconomic linear programming model, this study simulates the effects of population, market, and technological changes on farmers' income and on their management of the natural resource in a hillside area of Central Honduras. The results show that economic growth and agricultural intensification are not necessarily adverse for fragile environments. In fact, farmer incomes

would be much lower and degradation much higher if intensive agriculture had not been adopted. Such a result, however, must be framed within a complex set of conditioning factors, among which agroecology plays a fundamental role. Although the economic advantages of horticultural production are clear in the area studied, this strategy is not suited for all contexts. This report offers a series of policy recommendations that implicitly recognize such limitations, thereby helping to direct resources where they will have their greatest impact.

Customer's New Voice John S. McKean, 2014-10-13 Find out how to reap the benefits of motivating and engaging the new, direct customer voice The Customer's New Voice shows businesses how to motivate and transform directly volunteered consumer knowledge into profitable insights, enabling a new echelon of marketing relevancy, customer experience, and personalization. With a deep look at the inner workings of how a modern generation of business innovators are tapping into the fresh opportunities with the customer's new voice, this book describes how businesses are transforming inference-based predictions of purchase intent with direct consumer knowledge of their actual intentions and buying context. The result: An untouchable/unprecedented level of offer relevancy, experience, and personalized service levels. Those offers range from the most basic app model of Give me your physical location, we'll find the best Thai restaurant near you, and give you an instant coupon to a more complex model such as an Electric utility value proposition: We'll give you discounts to charge your Prius during certain times to help us optimize our grid efficiency while allowing Toyota to monitor and optimize your battery to enable Toyota's R&D and customer experience enhancement. Forty case studies detail proven approaches for directly engaging the new consumer,

showing companies how to take advantage of rapidly evolving personal technology—smart phones, homes, vehicles, wearable technology, and Internet of Things—and the new sharing culture to collect the higher value intentionally/ discretionarily shared information. Readers gain access to a robust tool set including templates, checklists, tables, flow diagrams, process maps, and technical data schematics to streamline these new capabilities and accelerate implementation of these transformational techniques. Ninety percent of the data that businesses use to determine what they sell or how to personalize a customer experience results from consumers unintentionally volunteering indirect data; however, this type of data has less than 10 percent accuracy. This low effectiveness also necessitates up to 70 percent of a business's cost infrastructure. Direct consumer knowledge is now available and boasts up to 20-50 percent accuracy, yet businesses remain anchored in the old indirect competencies. This book helps companies integrate compelling sharing motivators and controls for consumers to feel motivated and safe about directly sharing their product and experience desires, providing the ultimate market advantage. Learn how to catch up to the new digitalized consumer Leverage direct consumer information from current megatrends Navigate privacy's current and future metamorphosis Unlock the untapped value of Big Data's true enabler—Little Data Parsing incidentally volunteered data has been stagnant for decades due to the capabilities and expectations of a new generation of enabled consumers The timeless reality is that any level of investment in computing power, data, and analytics will never approach their full ROI potential without interfusing the direct, intentional insights from the consumer. If today's forward-thinking companies want to profitably engage the new consumers, they

must learn the secrets of motivating and safeguarding this new potential of customer transparency. The risks of not engaging these new consumer voices? Irrelevancy and Silence. The Customer's New Voice shows businesses how to fulfill the promise and caveat of the new consumer: If you make my life easier, reward me, and respect my shared information: I will tell you my secrets.

Bubblegum Adam Levin, 2021-03-16 Adam Levin is one of our wildest writers and our funniest, and Bubblegum is a dazzling accomplishment of wit and inventiveness. —George Saunders Levin's brains may have earned him a cult...but here he swells to a democratic reach. Give him a try sometime. His gate's wide open." —Garth Risk Hallberg, The New York Times Book Review The astonishing new novel by the NYPL Young Lions Fiction Award-winning author of The Instructions. Bubblegum is set in an alternate present-day world in which the Internet does not exist, and has never existed. Rather, a wholly

different species of interactive technology--a flesh-and-bone robot called the Curio--has dominated both the market and the cultural imagination since the late 1980s. Belt Magnet, who as a boy in greater Chicago became one of the lucky first adopters of a Curio, is now writing his memoir, and through it we follow a singular man out of sync with the harsh realities of a world he feels alien to, but must find a way to live in. At age thirty-eight, still living at home with his widowed father, Belt insulates himself from the awful and terrifying world outside by spending most of his time with books, his beloved Curio, and the voices in his head, which he isn't entirely sure are in his head. After Belt's father goes on a fishing excursion, a simple trip to the bank escalates into an epic saga that eventually forces Belt to confront the world he fears, as well as his estranged childhood friend Jonboat, the celebrity astronaut and billionaire. In Bubblegum, Adam Levin has crafted a profoundly hilarious, resonant, and monumental narrative about heartbreak, longing, art, and the search for belonging in an incompatible world. Bubblegum is a rare masterwork of provocative social (and self-) awareness and intimate emotional power.

Concreteness and Specificity in Clinical Psychology Luciano L'Abate, 2015-04-10 This provocative volume updates L' Abate's signature ideas, focusing in particular on the concepts of concreteness and specificity as basic tenets of evaluation and therapy. Noting society's growing familiarity with technology, current concerns about treatment accessibility, and widespread interest in wellness promotion, he argues for remote-writing exercises targeted to specific client issues and monitored by the clinician instead of relying on traditional talk-based therapy. This attention to concreteness and specificity in baseline evaluation, post-treatment evaluation, and follow-up, the author asserts, is central to making treatment replicable, less subject to impasses or missteps, and more professional, with the potential of changing how therapy is conducted as well as how clinicians are trained and practice. The book's framework includes rationales, models, empirical data, and examples of prescriptive remote-writing exercises. Featured in the coverage: Online interventions: here to stay and to grow. Verifiability in clinical psychology practices. Present status and future perspectives for personality and family assessment. Practice without theory/combining theory with practice. Toward a unifying framework of human relationships PIPES: Programmed Interactive Practice Exercise and Prescriptions. Concreteness and Specificity in Clinical Psychology will bring a new level of discussion and debate among clinical psychology practitioners and practicing psychotherapists in private practice and the public sector. *Research Report* ,2001

Interactions with Search Systems Ryen W. White, 2016-03-14 Information seeking is a fundamental human activity. In the modern world, it is frequently conducted through interactions with search systems. The retrieval and comprehension of information returned by these systems is a key part of decision making and action in a broad range of settings. Advances in data availability coupled with new interaction paradigms, and mobile and cloud computing capabilities, have created a broad range of new opportunities for information access and use. In this comprehensive book for professionals, researchers, and students involved in search system design and evaluation, search expert Ryen White discusses how search systems can capitalize on new capabilities and how next-generation systems must support higher order search activities such as task completion, learning, and decision making. He outlines the implications of these changes for the evolution of search evaluation, as well as challenges that extend beyond search systems in areas such as privacy and societal benefit.

Tap, Click, Read Lisa Guernsey, Michael H. Levine, 2015-08-14 A guide to promoting literacy in the digital age With young children gaining access to a dizzying array of games, videos, and other digital media, will they ever learn to read? The answer is yes—if they are surrounded by adults who know how to help and if they are introduced to media designed to promote literacy,

instead of undermining it. Tap, Click, Read gives educators and parents the tools and information they need to help children grow into strong, passionate readers who are skilled at using media and technology of all kinds—print, digital, and everything in between. In Tap, Click, Read authors Lisa Guernsey and Michael H. Levine envision a future that is human-centered first and tech-assisted second. They document how educators and parents can lead a new path to a place they call 'Readialand'—a literacy-rich world that marries reading and digital media to bring knowledge, skills, and critical thinking to all of our children. This approach is driven by the urgent need for low-income children and parents to have access to the same 21st-century literacy opportunities already at the fingertips of today's affluent families. With stories from homes, classrooms and cutting edge tech labs, plus accessible translation of new research and compelling videos, Guernsey and Levine help educators, parents, and America's leaders tackle the questions that arise as digital media plays a larger and larger role in children's lives, starting in their very first years of life. Tap, Click, Read includes an analysis of the exploding app marketplace and provides useful information on new review sites and valuable curation tools. It shows what to avoid and what to demand in today's apps and e-books—as well as what to seek in community preschools, elementary schools and libraries. Peppered with the latest research from fields as diverse as neuroscience and behavioral economics and richly documented examples of best practices from schools and early childhood programs around the country, Tap, Click, Read will show you how to: Promote the adult-child interactions that help kids grow into strong readers Learn how to use digital media to build a foundation for reading and success Discover new tools that open up avenues for creativity, critical thinking,

and knowledge-building that today's children need The book's accompanying website keeps you updated on new research and provides vital resources to help parents, schools and community organizations.

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research

papers, and technical manuals, making them invaluable resources for students and researchers.
