Benzie, Sissi Wachtel-Galor, 2011-03-28 The global popularity of herbal supplements and the promise they hold in treating various disease states has caused an unprecedented interest in understanding the molecular basis of the biological activity of traditional remedies. *Herbal Medicine: Biomolecular and Clinical Aspects* focuses on presenting current scientific evidence of biomolecular ef

The Earthwise Herbal, Volume I Matthew Wood, 2008-06-03 The first part in a comprehensive two-volume guide on the use of medicinal plants in Western herbal medicine—from an author who has almost forty years of clinical experience The first in a two-volume set, *The Earthwise Herbal* profiles Old World plants (volume two will treat American plants). Organized alphabetically, the book encompasses all the major, and many of the secondary, herbs of traditional and modern Western herbalism. Author Matthew Wood describes characteristic symptoms and conditions in which each plant has proved useful in the clinic, often illustrated with appropriate case histories. He also takes a historical view based on his extensive study of ancient and traditional herbal literature. Written in an easy, engaging, non-technical style, *The Earthwise Herbal* offers insight into the “logic” of the plant: how it works; in what areas of the body it works; how it has been used in the past; what its pharmacological constituents indicate about its use; and how all these different factors hang together to produce a portrait of the plant as a

whole entity. Ideal for beginners, serious students, or advanced practitioners, The Earthwise Herbal is also useful for homeopaths and flower essence practitioners as it bridges these fields in its treatment of herbal medicines.

Herbal Formularies for Health Professionals, Volume 5 Jill Stansbury, 2021-10-11 The 5th and final volume in a masterwork for students of herbalism and practicing herbalists Herbal Formularies for Health Professionals is a five-volume set that serves as a comprehensive, practical reference manual for herbalists, physicians, nurses, and allied health professionals. Dr. Jill Stansbury draws on her decades of clinical experience and her extensive research to provide an unparalleled range of herbal formulas. Organized by body system, each volume includes hundreds of formulas to treat common health conditions, as well as formulas that address specific energetic or symptomatic presentations. For each formula, Dr. Stansbury briefly explains how the selected herbs address the specific condition. Sidebars and user-friendly lists help readers quickly choose which herbs are best for specific presentations and detail traditional uses of both Western and traditional Asian formulas and herbs that are readily available in the United States. Volume 5 focuses on autoimmune and allergic conditions including allergic rhinitis (hay fever), asthma, hives, and food sensitivities. A chapter on ears, eyes, nose, mouth, and throat includes herbal therapies for eye infections, glaucoma, and other eye conditions; sinus infections, colds, and sore

throats; and tooth decay and oral infections. A chapter on the musculoskeletal system covers common conditions such as sore muscles and bruising as well as chronic conditions such as fibromyalgia, arthritis, and osteoporosis. Each chapter includes a materia medica section that describes individual herbs with tips on their properties, modes of action, and the specific symptoms each plant best addresses. These formularies are also a tutorial for budding herbalists on the sophisticated art of fine-tuning an herbal formula for the constitution and overall health condition of an individual patient, rather than prescribing a one-size-fits-all treatment for a basic diagnosis. The text aims to teach by example, helping clinicians develop their own intuition and ability to create effective herbal formulas. Previous volumes include Digestion and Elimination (Volume 1), Circulation and Respiration (Volume 2), Endocrinology (Volume 3), and Neurology, Psychiatry, and Pain Management (Volume 4).

The Lost Book of Herbal Remedies Nicole Apelian, Claude Davis, Sr., 2019-07-07 304 color pages, paperback, improved print quality, and a lot more plant identification details This unique book is written by Dr. Nicole Apelian, an herbalist with over 20 years of experience working with plants, and Claude Davis, a wild west expert passionate about the lost remedies and wild edibles that kept previous generations alive. The Lost Book of Herbal Remedies has color pictures of over 181 healing plants, lichens, and mushrooms of North America (2-4 pictures/plant for easy identification). Inside, you'll also discover 550 powerful natural remedies made from them for every one of your daily needs. Many of these remedies had been used by our forefathers for hundreds of years, while others come from Dr. Nicole's extensive natural practice. This book was made for people with no prior plant knowledge who are looking for alternative ways to help themselves or their families. This lost knowledge goes against the grain of mainstream medicine and avoids just

dealing with symptoms. Instead, it targets the underlying root cause and strengthens your body's natural ability to repair itself. With the medicinal herbal reference guide included, it's very easy to look up your own condition and see exactly which herbs and remedies can help. Let me just offer you a small glimpse of what you'll find inside: On page 145 learn how to make a powerful relieving extract using a common backyard weed. This plant acts directly on the central nervous system to help with all kinds of pain and discomfort. You'll also discover the most effective natural antibiotic that still grows in most American backyards (page 150). Turn to page 43 for the natural protocol Dr. Nicole is recommending for a wide range of auto-immune conditions, after falling prey to MS herself at age 29. I could go on and on because this book contains no less than 800+ other medicinal plants and natural remedies.

Readers who appreciate the health-giving properties of herbal medicines but are discouraged by the high price of commercial products can now make their own preparations for a fraction of the cost. The authors tell you everything you need to know about harvesting, preparing, and administering herbs in many different forms, including fresh, bulk dried herbs, capsules, extracts in water, alcohol, glycerin, vinegar and oil, and even preparations like essential oils and flower essences. The book also covers topical applications of herbs as salves, lotions, poultices, tooth powders, ear drops, and more, and includes an extensive chapter on herbal hydrotherapy. The Modern Herbal Dispensary explains why different preparations of the same herb will obtain better results, demonstrating how capsules, teas, tinctures, or glycerites of the same plant will not have exactly the same effect on the body. Leading herbalists Thomas Easley and Steven Horne have tested and proven the herbal formulas they offer, along with suggestions for treating more than one hundred illnesses. They lay out the principles of herbal formulation and also provide instructions on how to prepare single herbs, a procedure that has been largely ignored in other references. More comprehensive than any other guide, thoroughly researched, beautifully illustrated, and presented with ease of use in mind, this book will take its place as the premier reference for those who want to produce all the herbal remedies they need, and to save money in the process.

The Book of Herbal Wisdom Matthew

Wood, 1997-09-15 Hailed as a "classic" by leading herbalist Rosemary Gladstar, this botanical compendium provides a wide-ranging history of herbalism and useful guidance for healing with herbs Matthew Wood is one of the United States' most renowned herbalists and the author of *Seven Herbs: Plants as Healers*, a watershed book in teaching herbal healing as a part of total wellness. With *The Book of Herbal Wisdom*, he continues and expands this study, creating a must-read guide for anyone who works in the natural health field or is interested in self-healing with herbs. Wood creates a vast and sweeping history of herbalism, drawing on Western botanical knowledge, homeopathy, Traditional Chinese medicine, and Native American shamanic botany. Detailing the history and use of more than forty plants, he shows how each tradition views a plant, as well as its use in cases drawn from his own herbal and homeopathic practice. An initial section describes signatures, similar, and patterns in these traditions, and elements, temperaments, and constitutions. Wood has two objectives: to

demonstrate how herbal medicines are agents of healing and wisdom, and to give the reader a useful catalog of plants for medicinal uses. His clinical observations of his patients bear the wry wisdom of the country doctor; his love of plants is evident in lush botanical descriptions, which show the connection between remedies—whether homeopathic, Chinese, or Native American—and the plants from which they are derived. An introduction to centuries of lore about healing from indigenous traditions, *The Book of Herbal Wisdom* integrates and describes North American Indian medicine, homeopathy, Traditional Chinese Medicine, and Western herbalism like no other contemporary botanical compendium.

A Modern Herbal Maud Grieve, 1971-06-01 There is not one page of this enchanting book which does not contain something to interest the common reader as well as the serious student. Regarded simply as a history of flowers, it adds to the joys of the country. ? B. E. Todd, *Spectator*. If you want to know how pleurisy root, lungwort, and abscess root got their names, how poison ivy used to treat rheumatism, or how garlic guarded against the Bubonic Plague, consult *A Modern Herbal*. This 20th-century version of the medieval Herbal is as rich in scientific fact and folklore as its predecessors and is equally encyclopedic in coverage. From aconite to zedoary, not an herb, grass, fungus, shrub or tree is overlooked; and strange and wonderful discoveries about even the most common of plants await the reader. Traditionally, an herbal combined the folk beliefs and tales about plants, the medicinal properties

(and parts used) of the herbs, and their botanical classification. But Mrs. Grieve has extended and enlarged the tradition; her coverage of asafetida, bearberry, broom, chamomile, chickweed, dandelion, dock, elecampane, almond, eyebright, fenugreek, moss, fern, figwort, gentian, Hart's tongue, indigo, acacia, jaborandi, kava kava, lavender, pimpernel, rhubarb, squill, sage, thyme, sarsaparilla, unicorn root, valerian, woundwort, yew, etc. ? more than 800 varieties in all ? includes in addition methods of cultivation; the chemical constituents, dosages, and preparations of extracts and tinctures, unknown to earlier herbalists; possible economic and cosmetic properties, and detailed illustrations, from root to bud, of 161 plants. Of the many exceptional plants covered in Herbal, perhaps the most fascinating are the poisonous varieties ? hemlock, poison oak, aconite, etc. ? whose poisons, in certain cases, serve medical purposes and whose antidotes (if known) are given in detail. And of the many unique features, perhaps the most interesting are the hundreds of recipes and instructions for making ointments, lotions, sauces, wines, and fruit brandies like bilberry and carrot jam, elderberry and mint vinegar, sagina sauce, and cucumber lotion for sunburn; and the hundreds of prescriptions for tonics and liniments for bronchitis, arthritis, dropsy, jaundice, nervous tension, skin disease, and other ailments. 96 plates, 161 illustrations.

as a doctor in 1922 and subsequently taking additional qualifications in internal medicine. A teaching post in herbal medicine was interrupted by war service as an army doctor, followed by seven years in Russian captivity as a doctor in prisoner-of-war camp hospitals. After retiring from clinical practice in 1961, he devoted his life to the scientific development and acceptance of herbal medicine. Weiss was appointed as a member of the German Commission E in 1978. He was founder and editor of the Zeitschrift fuer Phytotherapie, and lectured on current advances in the subject at the University of Tuebingen.

The Earthwise Herbal Repertory Matthew Wood, 2016-11-01 Discover the healing applications of a wide variety of medicinal plants with this first comprehensive herbal repertory from an internationally known herbalist Expert herbalist Matthew Wood takes the guesswork out of the application of medicinal plants. Here, he provides an invaluable cross-reference of constitutional types, energetic categories, and specific systems—so herbalists can more easily identify the right remedies for a specific condition. Unlike many reference books in which medicinal plants are defined simply by condition or disease name, this book offers tools for differentiating between remedies and analyzing each case in a holistic fashion. While this system of cross-referencing is

well known to homeopaths, it is less frequently used by herbalists. The Earthwise Herbal Repertory seeks to bridge the gap between different healing systems, incorporating knowledge from ancient Greek and traditional Native American medicine, nineteenth-century botanical medicine, homeopathy, and modern biomedical research. This definitive repertory proves useful for homeopaths and herbalists, professionals and home practitioners alike.
