High Steel Jim Rasenberger,2009-10-13 A powerful first-hand account of the many generations and ethnic groups of men who have built America's skyscrapers. From the early days of steel construction in Chicago, through the great boom years of New York city ironwork, and up through the present, High Steel follows the trajectory of careers inextricably linked to both great accomplishment and catastrophic disaster. The personal stories reveal the lives of ironworkers and the dangers they face as they walk across the windswept, swaying summits of tomorrow's skyscrapers, balanced on steel girders sometimes only six inches wide. Rasenberger explores both the greatest accomplishments of ironwork—the vaulting bridges and towers that define America's skyline—and the deadliest disasters, such as the Quebec Bridge Collapse of 1907, when 75 ironworkers, including 33 Mohawk Indians, fell to their deaths. High Steel is an accessible, thrilling, and vertiginous portrait of the lives of some of our most brave yet unrecognized men.

Refugee High Elly Fishman,2023-10-03 A year in the life of a Chicago high school with one of the nation’s highest proportions of refugees, told with “strong novel-like pacing” (Milwaukee Magazine) A stunning and heart-wrenching work of nonfiction.—Chicago Reader Winner of the Studs and Ida Terkel Award For a century, Chicago’s Roger C. Sullivan High School has been a home to immigrant and refugee students. In 2017, during the worst global refugee crisis in history, its immigrant population numbered close to three hundred—or nearly half the school—and many were refugees new to the country. These young people came from thirty-five different countries, speaking more than thirty-eight different languages. Called “a feat of immersive reporting” (National Book Review), and “a powerful portrait of resilience in the face of long odds” (Publishers Weekly), Refugee High, by award-winning journalist Elly Fishman, offers a riveting chronicle of the 2017–8 school year at Sullivan High, a time when anti-immigrant rhetoric was at its height in the White House. Even as we follow teachers and administrators grappling with the everyday challenges facing many urban schools, we witness the complicated circumstances and unique needs of refugee and immigrant children: Alejandro may be deported just days before he is scheduled to graduate; Shahina narrowly escapes an arranged marriage; and Belenge encounters gang turf wars he doesn’t understand. Heartbreaking and inspiring in equal measure, Refugee High raises vital questions about the priorities and values of a public school and offers an eye-opening and captivating window into the present-day American immigration and education systems.

THE HIGH AUCTION Misba,2021-09-26 In the near future, a machinist, a monk, and a mesmerizer are looking for the Source of the universe, but among the ancient scriptures, they only find the devil ... Few humans in the future find the secrets of what words and sounds can do, for the Apocalypse and war have led them to evolve in mind and physique. Two of them end World War III with just a four-minute speech. Some say they did mass hypnosis. Others say it was their voice and will. Fifty years later in South Asia, KUSHA, a twenty-three-year-old machine-geek with social awkwardness and amnesia, tries to get the Devil’s Book with secrets of voice. But her idol of voice and everyone's beloved war heroes, YUAN and RUEM, are also after it for power. In a society that worships the evolved High Grades with voice, how you speak and which words you talk with is important. As someone who finds all solutions in books, Kusha thinks the secrets in the three-foot-long ancient book will teach her to speak mesmerizingly. She believes it will help her evolve. So, she decides to attend the auction where the book will be sold. But there's a problem; powerful High Grades want the book too. They want to code fate, rewriting the material world. They are undead, immortal mesmerizers. And being a philosopher, Kusha admires their ethics while she must fight them—the fight that starts with the book. The fight creates a chain reaction leading her to an epic journey. High Weirdness Erik Davis,2019-11-05 An exploration of the emergence of a new psychedelic spirituality in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson. A study of the spiritual provocations to be found in the work of Philip K. Dick, Terence McKenna, and Robert Anton Wilson, *High Weirdness* charts the emergence of a new psychedelic spirituality that arose from the American counterculture of the 1970s. These three authors changed the way millions of readers thought, dreamed, and experienced reality—but how did their writings reflect, as well as shape, the seismic cultural shifts taking place in America? In *High Weirdness*, Erik Davis—America's leading scholar of high strangeness—examines the published and unpublished writings of these vital, iconoclastic thinkers, as well as their own life-changing mystical experiences. Davis explores the complex lattice of the strange that flowed through America's West Coast at a time of radical technological, political, and social upheaval to present a new theory of the weird as a viable mode for a renewed engagement with reality.

Tectonic Evolution of the Moroccan High Atlas: A Paleomagnetic Perspective Pablo Calvín, Antonio M. Casas-Sainz, Teresa Román-Berdiel, Juan J. Villalaín, 2023-01-29 This book presents a significant amount of structural, paleomagnetic and magnetic fabric data in the Central High Atlas (Morocco). The authors thoroughly described and analyzed the present-day structure of this intraplate chain through 22 of cross-sections, potential field data analysis and 3D reconstruction. In addition, the authors propose a palinspastic reconstruction of the structure of the basin at 100 Ma (i.e., post-extension and pre-compression) to finally evaluate its Mesozoic and Cenozoic geodynamic evolution. This book presents (1) a unique three-dimensional model at the chain scale, (2) an analysis of the ca. 100 Ma remagnetization, to perform palinspastic restorations of most representative structures, (3) as well as the interpretation of the magnetic fabrics in order to unravel the tectonic or deformation setting that the rocks underwent in different parts of the basin. This book is of interest to structural geologists in Northern Africa, the Mediterranean and Iberia, as well as to those interested in inverted intraplate basins and paleomagnetists from around the planet. Also, this book is intended to help students to understand better the geological evolution of the Atlas and therefore Morocco and surrounding areas.

Drama High Michael Sokolove, 2014-10-07 The inspiration for the NBC TV series *Rise*, starring Josh Radnor, Auli'i Cravalho, and Rosie Perez — the incredible and true story of an extraordinary drama teacher who has changed the lives of thousands of students and inspired a town. By the author of *The Last Temptation of Rick Pitino*. Why would the multimillionaire producer of *Cats*, *The Phantom of the Opera*, and *Miss Saigon* take his limo from Manhattan to the struggling former steel town of Levittown, Pennsylvania, to see a high school production of *Les Misérables*? To see the show performed by the astoundingly successful theater company at Harry S Truman High School, run by its legendary director, Lou Volpe. Broadway turns to Truman High when trying out controversial shows such as *Rent* and *Spring Awakening* before they move on to high school theater programs across the nation. Volpe's students from this blue-collar town go on to become Emmy-winning producers, entertainment executives, newscasters, and community-theater founders. Michael Sokolove, a Levittown native and former student of Volpe's, chronicles the drama director's last school years and follows a group of student actors as they work through riveting dramas both on and off the stage. This is a story of an economically depressed but proud town finding hope in a gifted teacher and the magic of theater.

High Temperature Electronics F. Patrick McCluskey, Thomas Podlesak, Richard Grzybowski, 2018-05-04 The development of electronics that can operate at high temperatures has been identified as a critical technology for the next century. Increasingly, engineers will be called upon to design avionics, automotive, and geophysical electronic systems requiring components and packaging reliable to 200 °C and beyond. Until now, however, they have had no single resource on high temperature electronics to assist them. Such a resource is critically needed, since the design and manufacture of electronic components have now made it possible to design electronic systems that will operate reliably above the traditional temperature limit of 125 °C. However, successful system development efforts hinge on a firm understanding of the fundamentals of semiconductor physics and device processing, materials selection, package design, and thermal management, together with a knowledge of the intended application environments. *High Temperature Electronics* brings together this essential information and presents it for the first time in a unified way. Packaging and device engineers and technologists will find this book required reading for its coverage of the techniques and tradeoffs involved in materials selection, design, and thermal management and for its presentation of best design practices using actual fielded systems as examples. In addition, professors and students will find this book suitable for graduate-level courses because of its detailed level of explanation and its coverage of fundamental scientific concepts. Experts from the field of high temperature electronics have contributed to nine chapters covering topics ranging from semiconductor device selection to testing and final assembly.

A United Nations High Commissioner for Human Rights Roger Stenson Clark, 2013-12-01 prospects of the High Commissioner proposal with careful scholarship and shrewd judgment. Mr. Clark wrote the first draft of this book under my supervision for the degree of Doctor of the Science of Law at Columbia Law School before returning to take up his career as a law teacher in his native New Zealand. I am delighted that his work, in this improved and updated version, is now being published. It fills a real need, since it is the first book on this important subject. On this occasion it might be appropriate to add a few comments on the history of the High Commissioner proposal. As Mr. Clark indicates, I had something to do with its revival in the United States Government during the closing months of the Kennedy Administration. A few details as to how this revival took place may perhaps be useful to students of international relations and international organization.
