**Finger Bone** Hiroki Takahashi,2023-06-16 1942. At the turning point of the war, the Imperial Japanese Army is in retreat. On Papua New Guinea, the unnamed narrator of Finger Bone is wounded in the fighting and sent to a field hospital to recover. There, he befriends other injured men only to watch them die one by one from their wounds, hunger, and disease. When a soldier dies, instead of returning the body to Japan, a medic cuts off the corpse's index finger, burns away the flesh, and prepares the remaining bone to be sent back to the soldier's family. The narrator carries the finger bone of his friend in an aluminum tin with the promise he will return the bone to his comrade's young son. Finger Bone is the prize-winning debut by famed Japanese author Hiroki Takahashi. The novel explores the self-consuming nature of imperialism, the ingloriousness of war, and how we are all identical in death.

**General Will 2.0** Hiroki Azuma,2014-11-25 Stay informed. Talk about the issues. Always be engaged. Liberal societies have encouraged their members to take part—or at least interest—in politics. Yet, even in developed nations where it is said to work, the democratic process as we know it routinely fails to give voice, on the one hand, and to appeal at all, on the other hand, to a good number of citizens. Whatever countervailing hopes the worldwide web gave rise to in its dawning years, far from restoring the “public sphere” of yore, the internet has completed its fragmentation. According to Japanese thinker Hiroki Azuma, the way forward must be sought through what network technology is actually good at: aggregating and processing the traces we leave (without always meaning to) every time we wade into the world of connectivity. Harking back to Rousseau and his idea of the general will, dropping by Freud and his discovery of the unconscious, taking inspiration from Google and the tenor of its innovations, revisiting Christopher Alexander and his highway planning, and making curious bedfellows of Twitter, Rorty, and Nozick, General Will 2.0 is a wild ride bound to delight not just citizens who “care” but those who find doing so to be increasingly difficult and false.

**Theoretical Study on Correlation Effects in Topological Matter** Hiroki Isobe, 2017-04-04 This thesis elucidates electron correlation effects in topological matter whose electronic states hold nontrivial topological properties robust against small perturbations. In addition to a comprehensive introduction to topological matter, this thesis provides a new perspective on correlated topological matter. The book comprises three subjects, in which electron correlations in different forms are considered. The first focuses on Coulomb interactions for massless Dirac fermions. Using a perturbative approach, the author reveals emergent Lorentz invariance in a low-energy limit and discusses how to probe the Lorentz invariance experimentally. The second subject aims to show a principle for synthesizing topological insulators with common, light elements. The interplay between the spin-orbit interaction and electron correlation is considered, and Hund's rule and electron filling are consequently found to play a key role for a strong spin-orbit interaction important for topological insulators. The last subject is classification of topological crystalline insulators in the presence of electron correlation. Unlike non-interacting topological insulators, such two- and three-dimensional correlated insulators with mirror symmetry are demonstrated to be characterized, respectively, by the Z<sub>4</sub> and Z<sub>8</sub> group by using the bosonization technique and a geometrical consideration.

**Philosophy of the Tourist** Hiroki Azuma, 2023-05-09 An inventive philosophical study that reconsiders the figure of the tourist. Tourism is a characteristically modern phenomenon, yet modern thinkers have tended to deride the tourist as a figure of homogenizing globalism. This philosophical study considers the tourist anew, as a subject position that enables us to redraw the map of globalized culture in an era increasingly in revolt against the liberal intellectual worldview and its call for the welcome of the Other. Why has the tourist proved so resistant to philosophical treatment, asks Hiroki Azuma. Tracing the reasons for this exclusion through the work of Rousseau and Voltaire, and subsequently in Kant, Carl Schmitt, Alexandre Kojève, Hannah Arendt, and Hardt and Negri, Azuma contends that the figure of the tourist has been rendered illegible by becoming ensnared in a series of misleading conceptual dichotomies and a linear model of world history. In the widening gap between the infrastructure of globalization and inherited ties of local and national belonging, Azuma's retheorization of the tourist presents an alternative to the choice between doubling down on local identity and roots, or hoping for the spontaneous uprising of a multitude from within the great networked Empire. For the tourist is the subject capable of moving most freely between the strata of the global and the local. With explorations of the connection between tourism and fan fiction, contingency and misdelivery, cyberspace and the uncanny, and dark tourism, Azuma's inventive and optimistic philosophical essay sheds unexpected new light on a mode of engagement with the world that is familiar to us all.
