Marilyn Irr

Recall! Doug DePew, 2011-08-27 There hadn't been a full-scale recall of the Individual Ready Reserves since the Korean War. In January of 1991, with the fall of the Berlin Wall and the collapse of the Soviet Union, many people believed it would take World War III to trigger a recall of the IRR. Many people were wrong. They came from cities and farms and towns in every corner of the country. With only a few days' notice, they quit their jobs, dropped out of college, kissed their girlfriends or wives, and got on planes to Atlanta, Georgia with nothing but the clothes on their backs. They had long hair, beards, and bad attitudes. They descended by the thousands on Fort Benning, Georgia, and they were not happy about it at all. In this entertaining, true story, the author relates his own experiences as one of the twenty-thousand IRR recalls who were ordered back to active duty in support of Operation Desert Storm. In a story reminiscent of The Dirty Dozen times ten thousand, the author takes you through the entire experience from beginning to end. He carries you along for the ride and explains exactly what it was like to be a recall. With the many IRR recalls over the last ten years of warfare, this first hand account could shed some light on how the current era of recalls began.

Building Economics: Theory and Practice Rosalie Ruegg,Harold Marshall,2013-11-11 We no longer build buildings like we used to nor do we pay for them in the same way. Buildings today are no longer only shelter but are also life support systems, communication terminals, data manufacturing centers, and much more. Buildings are incredibly expensive tools that must be constantly adjusted to function efficiently. The economics of building has become as complex as its design. When buildings were shelter they lasted longer than their builders. The average gothic master mason lived 35 or 40 years. Cathedrals took 3 or 4 hundred years to build. Cost estimates were verified by great great grandchildren of the original designer. Today, creative economics has become as important as creative design and creative building. The client brings builder, contractor, architect, and facilities manager to account in their life time. The cost of building can therefore no longer be left to chance or act of god. Solutions are no longer as ingeniously simple as those proposed by a Florentine builder early in the 15th century. He proposed to center the dome of S. Maria deI Fiore on a great mound of earth mixed with pennies. When the job was done street urchins would

carry away the dirt in their search for the pennies. This was a serious suggestion offered by an early construction manager before Brunelleschi solved the problem more sensibly.

Irr - a Blunder, Still It Is Popular Sitangshu Khatua, 2012-06 This book investigates the reasons behind the continued popularity of IRR (Internal Rate of Return) method in financial appraisal of project evaluation. For decades, Finance textbooks and academics have warned that typical IRR calculations have built in reinvestment assumptions that make bad projects look better and good ones look great. Yet, as recently as 2009, academic research found that most CFOs use IRR when evaluating Capital Projects. The present study tries to investigate the reasons behind this anomaly. Why is IRR so popular throughout the periods? What will be the intuitive appeal of IRR for Corporate Managers? The study is a maiden attempt to address these issues by posing some genuine research questions. This book aims to familiarize the readers with the core problems of conventional capital budgeting techniques like IRR, NPV and other alternative options like Real Option, APV, etc. This book will primarily help Project Managers, CFOs, Finance & Project Practitioners, Consultants and Graduate & Post-Graduate Students specializing in Finance.

Pink Pirates Caren Irr, 2010-04-15 Caren Irr's clever readings of intellectual property cases and fictional texts expose the complexity of

copyright, what it means not only legally but also metaphorically. By examining how women writers have grappled with the concept and significance of ownership, Irr reveals their feminist critiques of market logic and their endorsement of what she calls 'positive piracy.' Pink Pirates's creative, interdisciplinary approach gave me new ways of thinking about motherhood, sexual pleasure, domesticity, and the commons.---Alison Piepmeier, author, *Girl Zines: Making Media, Doing Feminism* --

Toward the Geopolitical Novel Caren Irr, 2013-12-17 Caren Irr's survey of more than 125 novels outlines the dramatic resurgence of the American political novel in the twenty-first century. She explores the writings of Chris Abani, Susan Choi, Edwidge Danticat, Junot Díaz, Dave Eggers, Jeffrey Eugenides, Aleksandar Hemon, Hari Kunzru, Dinaw Mengestu, Norman Rush, Gary Shteyngart, and others as they rethink stories of migration, the Peace Corps, nationalism and neoliberalism, revolution, and the expatriate experience. Taken together, these innovations define a new literary form: the geopolitical novel. More cosmopolitan and socially critical than domestic realism, the geopolitical novel provides new ways of understanding crucial political concepts to meet the needs of a new century.
