Electronic Media Law Roger L. Sadler,2005-03-10 Even though the First Amendment of the U.S. Constitution grants freedom of speech and freedom of the press, laws and regulations governing media frequently evolve as the media themselves do. As a result, it is often a challenge to keep pace with new laws and regulations. Electronic Media Law is a comprehensive, up-to-date textbook on the constantly changing and often complex world of electronic media law. Author Roger L. Sadler examines the laws, regulations, and court rulings affecting broadcasting, cable, satellite, and cyberspace. The book also looks at cases from the print media and general First Amendment law, because they often contain important concepts that are relevant to the electronic media. Electronic Media Law is written for mass media students, not for future lawyers, so the text is straightforward and explains legalese. The author covers First Amendment law, political broadcasting rules, broadcast content regulations, FCC rules for station operations, cable regulation, media ownership rules, media liability lawsuits, intrusive newsgathering methods, media restrictions during wartime, libel, privacy, copyright, advertising law, freedom of information, cameras in the court, and privilege. Key Features Provides an easy-to-use format of chapter categories and sections that facilitate research on individual topics Frequently Asked Questions highlight important points from cases Explains complex, legal concepts in basic terms that give students the foundation for further studies in electronic media law Electronic Media Law provides an understanding of the First Amendment and the American legal system with an emphasis on the electronic media. It is an excellent textbook for undergraduate and graduate students studying broadcast law and media law.

Liar's Kiss Eric Skillman,Jhomar Soriano,2012 □Skillman and Soriano weave a twisted tale of classic noir. The story keeps you guessing until the end, and the art delivers the right blend of pitch-black shadows and crisp, sexy line work.□ --Sean Phillips, artist of Criminal, Incognito, and Sleeper Loved it. The dialogue crackles, the art's delicious, and the moral ambiguity hits you like a fist in the belly. This is noir at its best.--Charles Ardai, author of Songs of Innocence, Little Girl Lost, and publisher of the Hard Case Crime series THE WAY HE INVESTIGATES IS A CRIME IN ITSELF. Nick Archer isn't much of a detective, but he's managed to get himself one pretty sweet surveillance gig: once a week he sends a jealous millionaire the photos that prove his wife is faithful, leaving Nick plenty of free nights to spend making a liar of both himself and the client's wife. But when the client turns up dead, his cheating wife is the prime suspect and it's up to Nick to clear her-- except Nick has an agenda of his own, and connections to this case that go deeper than anyone realizes. An amazing crime noir debut!

Radio's Second Century John Allen Hendricks,2020-03-13 Winner of the 2022 Broadcast Education Association Book Award One of the first books to examine the status of broadcasting on its one hundredth anniversary, Radio's Second Century investigates both vanguard and perennial topics relevant to radio's past, present, and future. As the radio industry enters its second century of existence, it continues to be a dominant mass medium with almost total listenership saturation despite rapid technological advancements that provide alternatives for consumers. Lasting influences such as on-air personalities, audience behavior, fan relationships, and localism are analyzed as well as contemporary issues including social and digital media. Other essays examine the regulatory concerns that continue to exist for public radio, commercial radio, and community radio, and discuss the hindrances and challenges posed by government regulation with an emphasis on both American and international perspectives. Radio's impact on cultural hegemony through creative programming content in the areas of religion, ethnic inclusivity, and gender parity is also explored. Taken together, this volume compromises a meaningful insight into the broadcast industry's continuing power to inform and entertain listeners around the world via its oldest mass medium--radio.

Popular Culture Raiford Guins,Omayra Zaragoza Cruz,2005-05 The selection of essays here is outstanding. The Reader is particularly strong in bridging between founding figures and cutting edge work by newer writers.- Henry Jenkins, MIT An extraordinarily well considered selection of articles and essays, arranged with skill and style. - Charlie Blake, University College NorthamptonPopular Culture: A Reader helps students understand the pervasive role of popular culture and the processes that constitute it as a product of industry, an intellectual object of inquiry and an integral component of all our lives.The volume is divided into 7 thematic sections, and each section is preceded by an introduction which engages with, and critiques, the chapters that follow. The book contains: Classic writings from all the 'big names' including Raymond Williams, Stuart Hall, Walter Benjamin, Theodor Adorno, Frederic Jameson, Dick Hebdige, Angela McRobbie, Paul Gilroy and many more. Contemporary cultural references throughout - this is not simply an historical account. Pieces drawing on diverse national, disciplinary and subdisciplinary contexts. Sensitivity to issues of gender, race and sexuality. This reader is a key resource for students of media and communication studies, cultural studies, and the sociology of the media.

(Re)membering Kenya Vol 1 Mbũgua wa Mũngai,G. M. Gona,2010 One of the critical questions that Kenyans have continuously asked is what went wrong in January and February 2008 with the peace they had hitherto enjoyed. There have not been readily available answers to this fundamental question. The collection of papers presented in this book attempt to provide, as a starting point, possible explanations for the events of early 2008 including key background issues in Kenyan history since pre-independence times. Based on a series of public lectures titled (Re)membering Kenya organized by the volume editors together with Twaweza Communications and sponsored by the Goethe-Institut Kenya, the Institute for International Education and The Ford Foundation the lecture series became a way of trying to get scholars to engage meaningfully with the Kenyan public on critical matters pertaining to their nationhoodóeven if this entailed first calling to question the lie about the very ideas and practices upon which that nationhood is assumed to stand. A key lesson drawn from the unfolding discussions at the Goethe-Institut Kenya was that the 2007 elections' debacle was merely the cusp of momentous crises to do with among other issues, governance, law and order, Parliament's abdication of its role in ensuring accountability from the Executive, dilemmas of identity and socio-economic marginality. The book is the first of three volumes under the (Re)membering Kenya series whose overall objective is to cast some new light on the various trajectories that informed the happenings of January 2008. The present volume brings together some of the best interpretative writing and suggestions on pertinent questions, past and present, ranging from the architecture of Kenya's ethnicity, Kenyanness, generational competition, socialization and violence, iconic representations of identity to the ongoing debate on the efficacy of the Truth, Justice and Reconciliation Commission (TJRC). It is hoped that the issues debated during the public lectures and documented herein will spur further discussions in other spaces within civil society organizations, among activists and in newspapers where the public might continue to expand their thinking on the complex task of (Re)membering Kenya.

Handbook of Media Economics Simon P. Anderson,Joel Waldfogel,David Stromberg,2015-11-17 Handbook of Media Economics provides valuable information on a unique field that has its own theories, evidence, and policies. Understanding the media is important for society, and while new technologies are altering the media, they are also affecting our understanding of their economics. Chapters span the large scope of media economics, simultaneously offering in-depth analysis of particular topics, including the economics of why media are important, how media work (including financing sources, institutional settings, and regulation), what determines media content (including media bias), and the effects of new technologies. The volumes provide a powerful introduction for those interested in starting research in media economics. Helps academic and non-academic economists understand recent rapid changes in theoretical and empirical advances, in structural empirical methods, and in the media industry's connection with the democratic process Presents the only detailed summary of media economics that emphasizes political economy, merger policy, and competition policy Pays special attention to the economic influences of the Internet, including developments in social media, user-generated content, and

advertising, as well as the Internet's effects on newspapers, radio, and television

Computational Economic Systems Manfred Gilli,2013-03-09 The approach to many problems in economic analysis has changed drastically with the development and dissemination of new and more efficient computational techniques. Computational Economic Systems: Models, Methods & Econometrics presents a selection of papers illustrating the use of new computational methods and computing techniques to solve economic problems. Part I of the volume consists of papers which focus on modelling economic systems, presenting computational methods to investigate the evolution of behavior of economic agents, techniques to solve complex inventory models on a parallel computer and an original approach for the construction and solution of multicriteria models involving logical conditions. Contributions to Part II concern new computational approaches to economic problems. We find an application of wavelets to outlier detection. New estimation algorithms are presented, one concerning seemingly related regression models, a second one on nonlinear rational expectation models and a third one dealing with switching GARCH estimation. Three contributions contain original approaches for the solution of nonlinear rational expectation models.
