Locative Media Rowan Wilken, Gerard Goggin, 2014-08-07 Not only is locative media one of the fastest growing areas in digital technology, but questions of location and location-awareness are increasingly central to our contemporary engagements with online and mobile media, and indeed media and culture generally. This volume is a comprehensive account of the various location-based technologies, services, applications, and cultures, as media, with an aim to identify, inventory, explore, and critique their cultural, economic, political, social, and policy dimensions internationally. In particular, the collection is organized around the perception that the growth of locative media gives rise to a number of crucial questions concerning the areas of culture, economy, and policy.

Gaming in Social, Locative and Mobile Media L. Hjorth, I. Richardson, 2014-05-29 Drawing on case studies across the Asia-Pacific region, *Gaming in Social, Locative and Mobile Media* explores the 'playful turn' in contemporary everyday life, and the role of mobile devices, games and social media in this transformation.

End Of Competition, The: The Impact Of The Network Economy C N A Molenaar, 2020-05-14 The frictions that we experience when doing business, and in fact also in society, result from the impact of technology. There is a transition period from 'doing digital' to 'being digital'. This affects every aspect of our lives, both private and professional. Merely observing the changes, reading about conflicts of the old model in relation to the new model, is confusing. The current developments and frictions require more in-depth examination. Insights into these developments will be necessary in order to achieve success. Many more partnerships will develop; organisations will come together and combine forces and borders will disappear. This will lead to the changes from order entry to new digital business ecosystems, or rather from 'doing digital' to 'being digital'. In the book, *The End of Competition: The Impact of the Network Economy*, the author explores the indicators of change, the motives for change, and the changes that are yet to come. Concrete plans provide clarity regarding the steps that can be taken, and they indicate who is already going down that road. This book will cover the similarities and differences in the approach and developments in both the Western and Asian worlds. We are at the beginning of a new age: the age of 'being digital', and closing our eyes to this is to deny ourselves a future.

The Candlelight Movement, Democracy, and Communication in Korea JongHwa Lee, Chuyun Oh, Yong-Chan Kim, 2021-09-30 This book examines key features, problems, and implications of the 2016–2017 Candlelight Movement, a historical cornerstone for democracy and social movements in South Korea. The Candlelight Movement brought profound social changes with important lessons and questions for scholars, practitioners, activists, and the public. To examine the full complexity of the movement, this edited volume utilises wide-ranging methodological and theoretical approaches, which include case study approaches, ethnography, survey, feminist film criticism, critical discourse analysis, and rhetorical criticism. Chapters place 'communication' at the centre of their analyses, calling attention to the mediated and mediated, the performative and other discursive practices of the 2016–2017 Candlelight Movement. In doing so, the book discusses not only the usual players and factors – nor the institutions that exert their influence through democratic politics and the public sphere – but also the counter-public embracing new and social media, collective singing, the body, and performance, as their choice of political media. As such, this volume offers important insights into how communication plays a critical role in forming, moving, and

transforming new social movements. The Candlelight Movement, Democracy, and Communication in Korea will appeal to students and scholars of communication and media studies, political science, sociology, and Korean studies.

Digital Marketing in Sports Brandon Mastromartino, James J. Zhang, 2023-11-10 This book examines how the sport industry is adapting to the needs of the digital-first global economy. Focusing on digital techniques in sport marketing, this volume explores new and emerging technologies and considers how they can help to build commercially successful and sustainable sport business. Featuring the work of sport business and management researchers from around the world, the book shines new light on key aspects of sport marketing such as brand development, consumer behavior and marketing communications. Illustrated with informative figures throughout, it presents cutting-edge case studies and new research on digital marketing covering topics including the metaverse and video games; esports; athlete endorsement; digital immersion; social media; equity crowdfunding; digital fandom and dark market brands. Global in scope, this book is fascinating reading for any student, researcher or industry professional looking to deepen their understanding of digital marketing in the context of the global sport industry.

Mobile Communication and the Family Sun Sun Lim, 2016-02-04 This volume captures the domestication of mobile communication technologies by families in Asia, and its implications for family interactions and relationships. It showcases research on families across a spectrum of socio-economic profiles, from both rural and urban areas, offering insights on children, adolescents, adults, and the elderly. While mobile communication diffuses through Asia at a blistering pace, families in the region are also experiencing significant changes in light of unprecedented economic growth, globalisation, urbanisation and demographic shifts. Asia is therefore at the crossroads of technological transformation and social change. This book analyses the interactions of these two contemporaneous trends from the perspective of the family, covering a range of family types including nuclear, multi-generational, transnational, and multi-local, spanning the continuum from the media-rich to the media have-less.

Smartland Korea Dal Yong Jin, 2017-02-20 An engaging and comprehensive look at the Korean smartphone industry and culture

Transnational Communities in the Smartphone Age Dae Young Kim, 2017-12-20
Transnational Communities in the Smartphone Age: The Korean Community in the Nation's Capital examines the durable ties immigrants maintain with the home country and focuses in particular on their transnational cultural activities. In light of changing technologies, especially information and communication technologies (ICTs), which enable a faster, easier, and greater social and cultural engagement with the home country, this book argues that middle-class immigrants, such as Korean immigrants in the Washington-Baltimore region, sustain more regular connections with the homeland through cultural, rather than economic or political, transnational activities. Though not as conspicuous and contentious as other forms of transnational participation, cultural transnational activities may prove to be more lasting and also serve as a backbone for maintaining longer-lasting connections and identities with the home country.

Der Social-Media-Zyklus Alexander Decker, 2018-12-19 Das Buch bietet mit dem Social-Media-Zyklus einen systematischen Ansatz zum strategischen Management von Social Media. Es illustriert die Vorgehensweise praxisnah mit vielen Beispielen und Checklisten. Unternehmen können anhand des Social-Media-Zyklus Schritt für Schritt die strategische Ausrichtung ihres Social-Media-Marketings entwickeln und im Alltag erfolgreich managen. Studierende lernen Grundlagen und einen konkret anwendbaren Ansatz für systematisches Social-Media-Management kennen. Als Unternehmen kann man heute nicht nicht Social-Media betreiben. Jedoch kommt im Alltag das systematische Vorgehen häufig zu kurz. Der strategiegeleitete Social-Media-Zyklus füllt diese Lücke. Er bietet Entscheidern und Social-Media-Managern eine konkrete Schritt-für-Schritt-Hilfestellung – beginnend bei „dem Kunden zuhören“, über die Strategie, Planung und Redaktion, den Umgang mit Shitstorms bis hin zu Social-Media-Analytics.

Research Anthology on Usage, Identity, and Impact of Social Media on Society and Culture

Management Association, Information Resources,2022-06-10 Much of the world has access to internet and social media. The internet has quickly become a new hub for not only communication, but also community development. In most communities, people develop new cultural norms and identity development through social media usage. However, while these new lines of communication are helpful to many, challenges such as social media addiction, cyberbullying, and misinformation lurk on the internet and threaten forces both within and beyond the internet. The Research Anthology on Usage, Identity, and Impact of Social Media on Society and Culture is a comprehensive resource on the impact social media has on an individuals' identity formation as well as its usage within society and cultures. It explores new research methodologies and findings into the behavior of users on social media as well as the effects of social media on society and culture as a whole. Covering topics such as cultural diversity, online deception, and youth impact, this major reference work is an essential resource for computer scientists, online community moderators, sociologists, business leaders and managers, marketers, advertising agencies, government officials, libraries, students and faculty of higher education, researchers, and academicians.

Tackling Cyberbullying and Related Problems Yuichi Toda,Insoo Oh,2020-11-12 This book looks at innovative tools developed by Japanese and Korean researchers and practitioners to tackle cyberbullying and internet-related problems (addiction, cybercrimes, etc.). The contributors have created preventative and intervention measures for children using games, apps, manga and anime videos, which are more accessible for children than textbooks or classroom-based lessons. The contributors cover their experiences of developing these new approaches with children, parents and teachers as well as giving insights and evidence into how these innovative techniques and methods work. By sharing their expertise, the authors hope to contribute to further improvements of games, apps, manga and anime and to improve the safety of children online.

Digital Capital Sora Park,2017-11-10 This book describes and understands the many factors that influence a person's behavior towards digital technologies, and how that affects the person's potential to benefit from digital society. The ability to adapt to these new technological environments - and the extent to which an individual embraces them - has become critical to an individual's well-being and quality of life, the underlying assumption being that only by effectively engaging with digital technologies can the user accrue benefits from the experience. By introducing the concept "digital capital," which refers to the conditions that determine how people access, use, and engage with digital technology, Park examines how the digital ecosystem of the user lead to new forms of digital inequality. Using numerous empirical studies on internet users and non-users, as well as recommending small localized solutions to the big global problem, a critical and alternative perspective of the digital divide is provided.

Social Networking and Education Tomayess Issa,Pedro Isaias,Piet Kommers,2015-10-03 The present work is intended to assist academics, researchers and proponents of online learning and teaching. Academics will be able to share the findings presented in this book, and the Social Networking and Education Model (SNEM), with their students (i.e. Masters and PhD). It is envisaged that this book will assist researchers and anyone interested in online learning to understand the opportunities and risks associated with the use of Social Networking in the education sector, and assist them to implement SN by means of the new SNEM model. The reader will benefit from our examinations of the risks and opportunities associated with the use of Social Networking in the education sector in various regions around the world: Asia-Pacific, Europe, Mediterranean, America, Middle East and the Caribbean. In addition, a Social Networking and Education Model (SNEM) will be developed to promote and implement Social Networking in the education sector.

Networked Collective Actions Hyunjin Seo,2021-12-14 The summer of 2016 saw one of the most significant citizen protests in the history of democratic South Korea, eventually culminating in the impeachment and conviction of then President Park Geun-hye for corruption. Concerns about the president's behavior were raised in a polarized media environment with low public trust, where extreme right-wing media outlets amplified conspiracy theories and false claims in opposition to impeachment. How then was it possible for pro-impeachment protests seeking major social change to

succeed? And why did pro-Park protesters and government efforts to defend Park ultimately fail? Based on interviews with key players in the impeachment movement and original analyses of news reports and social media posts, *Networked Collective Actions* untangles the intricate interactions among different actors that were supported and sometimes constrained by the technological, socio-political, and legal environments in which they occurred. Moreover, Hyunjin Seo develops a theoretical framework for understanding collective actions in dynamic information ecosystems and analyzes how information consumption patterns might prompt someone to either immediately reject a certain piece of information or to reconsider and adopt that same information. Seo provides a nuanced examination of the role of journalism in a democracy where non-traditional intermediaries (e.g., social media influencers and bots) have emerged as important producers and filters of information, and in light of declining trust in news media.

Researching Language and Social Media Ruth Page, David Barton, Carmen Lee, Johann Wolfgang Unger, Michele Zappavigna, 2022-02-27 *Researching Language and Social Media: A Student Guide* introduces the linguistic frameworks currently used to analyse language found in social media contexts. This highly accessible guidebook outlines the practical steps and ethical guidelines entailed when gathering linguistic data from social media sites and platforms. In this new edition, the authors update the range of social media interactions used as examples and draw attention to important developments such as “fake news” and new areas of debate such as hate speech. Expanding the geographical and multilingual aspects, this edition also includes examples from Asia and the Arabic-speaking world. With updated methods that help students study the language of social media from a multimodal perspective, the recent uptake in image sharing, video-chat, and graphicons will also be addressed. Each chapter begins with a clear summary of the topics covered and also suggests sources for further reading to supplement the initial discussion and case studies. This timely book is an essential guide for students of English language and linguistics, media, and communication studies.

Smart Healthcare Analytics: State of the Art Prasant Kumar Pattnaik, Ashlesha Vaidya, Suneeta Mohanty, Satarupa Mohanty, Ana Hol, 2021-09-30 This edited book helps researchers and practitioners to understand e-health, m-healthcare architecture through IoT and the state of the art in IoT counter measures. This book provides a comprehensive discussion on a functional framework for IoT-based healthcare systems, intelligent medicine box, RFID technology, HMI, cognitive interpretation, BCI, remote health monitoring systems, wearable sensors, WBAN, healthcare analytics, machine learning (ML) techniques for IoT-enabled healthcare services, security and privacy issues in IoT-based healthcare monitoring systems. The book discusses integration of IoT with big data and cloud computing for solving several real-time problems by the use of smart healthcare applications. In these applications, the cloud computing provides a common workplace for IoT and big data, big data provides data analytics technology and IoT provides the source of data. It serves as a reference resource for researchers and practitioners in academia and industry.

Digital Mediascapes of Transnational Korean Youth Culture Kyong Yoon, 2019-10-28 Drawing on vivid ethnographic field studies of youth on the transnational move, across Seoul, Toronto, and Vancouver, this book examines transnational flows of Korean youth and their digital media practices. This book explores how digital media are integrated into various forms of transnational life and imagination, focusing on young Koreans and their digital media practices. By combining theoretical discussion and in depth empirical analysis, the book provides engaging narratives of transnational media fans, sojourners, and migrants. Each chapter illustrates a form of mediascape, in which transnational Korean youth culture and digital media are uniquely articulated. This perceptive research offers new insights into the transnationalization of youth cultural practices, from K-pop fandom to smartphone-driven storytelling. A transnational and ethnographic focus makes this book the first of its kind, with an interdisciplinary approach that goes beyond the scope of existing digital media studies, youth culture studies, and Asian studies. It will be essential reading for scholars and students in media studies, migration studies, popular culture studies, and Asian studies.

Bullying and Violence in South Korea Trent Bax, 2017-02-10 This book provides a fully-

contextualised, multidisciplinary examination of bullying and violence in South Korean society. Bullying and violence has been a pressing societal issue since 2011, having been labelled as a 'social evil' to be eradicated by the government. However, the issue has been incorrectly confined to schools when in fact it is widespread in society and in professional settings, as Bax argues in this original new text. Through twenty in-depth case studies and original case material from a Juvenile Detention Centre, Bax examines the historical, cultural, political and social contexts of bullying and violence to better understand the nature of these crimes, the perpetrators, and how they come together in the broader cultural landscape within which the individual, the family, the school and the community are embedded.

Creating with Mobile Media Marsha Berry, 2017-09-29 This book investigates the convergence between locative, mobile and social media in order to show how people use mobile media for their creative practice—creative writing, photography, video and filmmaking. The central thematic focus of this book explores how mobile media has created new opportunities and contexts for creative practitioners. It draws together creative practice research with non-representational theory and digital ethnography to provide a fresh perspective on the place mobile media has in our everyday creative lives. Fictionalized and semi-fictional vignettes are used to present empirical material taken from fieldnotes and interviews to demonstrate how new forms and genres of art making have arisen because of the affordances of mobile media. The chapters in this volume have been arranged into a sequence according to the kinds of actions that make up various creative practices.
