James P. Spillane

Transformational Leadership Edward J. Shelton, 2012-09 With the publication of *They Love You They Hate You: Discovering Leadership* in 2007, a new comprehensive review of basic leadership behaviors were presented to global corporations and frontline leaders that provided a guide to talent retention, empowerment, engagement, and commitment building. Now Dr. Shelton introduces *First They Came*, a popular poem attributed to Martin Niemöller describing how Hitler, during his rise to power, purged group after group without much opposition. This is a continuance on the principles of courage, trust, and serving others around you in a transformational way. Transformational leadership is a philosophy and a way of life; it cannot be gained in a leadership short course but only through study, experience, and application. Constructive leadership qualities are not secret and have been applied since the beginning of mankind. Trust, kindness, integrity, empowerment, communications, other orientation, knowledge seeking, motivation, and courage are discussed in detail with supporting cases and anecdotes. Many of these characteristics are not taught in the academic schools of management, yet they remain as powerful today as they had been in the past. *First They Came* originated as anecdotes and life experiences regarding failed and successful acts of leadership. Chapters in the book deal with leadership in military, industry, academia, the Middle East, and across cultures. In the end, Martin Niemöller's poem suggests that we must set our moral standards higher and seek for one another's best interest in life and in business.

He examines the distribution of leadership among administrators, specialists, and teachers in the school, and explains the ways in which leadership practice is stretched over leaders, followers, and aspects of the situation, including routines and tools of various sorts in the organization such as memos, scheduling procedures, and evaluation protocols. This book is a volume in the Jossey-Bass Leadership Library in Education—a series designed to meet the demand for new ideas and insights about leadership in schools.

Leaders Stanley McChrystal, Jeff Eggers, Jay Mangone, 2018-10-23 An instant national bestseller! Stanley McChrystal, the retired US Army general and bestselling author of *Team of Teams*, profiles thirteen of history's great leaders, including Walt Disney, Coco Chanel, and Robert E. Lee, to show that leadership is not what you think it is—and never was. Stan McChrystal served for thirty-four years in the US Army, rising from a second lieutenant in the 82nd Airborne Division to a four-star general, in command of all American and coalition forces in Afghanistan. During those years he worked with countless leaders and pondered an ancient question: "What makes a leader great?" He came to realize that there is no simple answer. McChrystal profiles thirteen famous leaders from a wide range of eras and fields—from corporate CEOs to politicians and revolutionaries. He uses their stories to explore how leadership works in practice and to challenge the myths that complicate our thinking about this critical topic. With Plutarch's *Lives* as his model, McChrystal looks at paired sets of leaders who followed unconventional paths to success. For instance, . . . Walt Disney and Coco Chanel built empires in very different ways. Both had public personas that sharply contrasted with how they lived in private. Maximilien Robespierre helped shape the French Revolution in the eighteenth century; Abu Musab al-Zarqawi led the jihadist insurgency in Iraq in the twenty-first. We can draw surprising lessons from them about motivation and persuasion. Both Boss Tweed in nineteenth-century New York and Margaret Thatcher in twentieth-century Britain followed unlikely roads to the top of powerful institutions. Martin Luther and his future namesake Martin Luther King Jr., both local clergymen, emerged from modest backgrounds to lead world-changing movements. Finally, McChrystal explores how his former hero, General Robert E. Lee, could seemingly do everything right in his military career and yet lead the Confederate Army to a devastating defeat in the service of an immoral cause. *Leaders* will help you take stock of your own leadership, whether you're part of a small team or responsible for an entire nation.

The Handbook for Teaching Leadership Scott Snook, Nitin Nohria, Rakesh Khurana, 2011-09-21 The last twenty-five years have witnessed an explosion in the field of leadership education. This volume brings together leading international scholars across disciplines to chronicle the current state of leadership education and establish a solid foundation on which to grow the field. It encourages leadership educators to explore and communicate more clearly the theoretical underpinnings and conceptual assumptions on which their approaches are based. It provides a forum for the discussion of current issues and challenges in the field and examines the above objectives within the broader perspective of rapid changes in technology, organizational structure, and diversity.

The Reconstruction of Leadership William Foster, 1986 The study of leadership has faltered partly because the wrong phenomenon has been studied. Whereas the usual definition considers leadership either as a personal property or as a property of position, this paper argues that it is a transient phenomenon residing neither in the person nor the situation and one that can be practiced equally well by different social players. Four attempts to redefine leadership, by Selznick, Burns, Tucker, and Bennis, do come closer to developing a hermeneutic view; however, all imply that leadership is an intrinsic property possessed by certain individuals. But in fact, leadership resides in actions, not in persons. Leadership acts are a communal, democratic effort founded in the notion of praxis and each act must have a social context and critical audience. Three elements of leadership are that it involves the penetration of structure, that it must be politically and critically educative and that it is conditioned on language and communication. Included in the document are three readings that support this position. First, *Leadership: The Socratic Model*, by L. Grob, asserts the critical spirit as the ground for all leadership; second, *Leadership Research: Choosing Gods and Devils on the Run*, by M. W. McCall, Jr., makes the case that the purpose of leadership research is to display its effectiveness or ineffectiveness and to point out areas for future research; and, finally, *Leadership Is a Language Game*, by L. R. Pondy, explores the potential influence of leaders' language on their effectiveness. The document includes 4 lists of references and an annotated bibliography of 26 suggested readings. (RG)
