World Film Locations: Marseilles Marcelline Block, 2013-01-01 As France's oldest city, Marseilles has a significant cinematic culture, dating back to the 1890s when the Lumière brothers shot many films there. Due to its prolific film industry in the 1920s, Marseilles was referred to as "the French Los Angeles." *World Film Locations: Marseilles* examines the representations of this port city in cinema, through essays and film scene reviews devoted to an exploration of its topography as depicted by Jean Epstein, Jean-Luc Godard, Jean-Pierre Melville, Jean Renoir, Jean-Jacques Beineix, and many others. This volume showcases Marseilles's diversity as articulated onscreen: from the winding streets of the Panier to the Old Port's noisy markets, from the bustling Canebière to the dockyards of the Grand Port Maritime, from the cliffs of Provençal encircling the city to sun-drenched calanques leading to the dazzling cerulean sea. *World Film Locations: Marseilles* features maps of film scenes, high-quality screengrabs, and images of movie locations as they appear today, accompanied by original texts penned by leading international film scholars and critics and an interview with Marseillais director Robert Guédiguian. Marseilles has been named a 2013-14 European Capital of Culture and this book is a fitting and timely tribute.

Or Mr. Roark's mansion and lagoon on Fantasy Island? Of course, all were in Hollywood. This is a photographic guide to 382 sites in and around Los Angeles that have been used in film and television. Some are well known (Mann's Chinese Theater, the Hollywood Bowl, the Los Angeles Zoo); others are obscure (such as the Hollywood Hills house used in *Double Indemnity*, the garden from *Dark Shadows* and the Indian head

rock seen in Noah's Ark). The sites are grouped geographically, and each entry includes the exact address and photographs of what the location looks like today. A brief plot background is also provided.

*Privacy for Location-based Services* Gabriel Ghinita, 2022-05-31 Sharing of location data enables numerous exciting applications, such as location-based queries, location-based social recommendations, monitoring of traffic and air pollution levels, etc. Disclosing exact user locations raises serious privacy concerns, as locations may give away sensitive information about individuals' health status, alternative lifestyles, political and religious affiliations, etc. Preserving location privacy is an essential requirement towards the successful deployment of location-based applications. These lecture notes provide an overview of the state-of-the-art in location privacy protection. A diverse body of solutions is reviewed, including methods that use location generalization, cryptographic techniques or differential privacy. The most prominent results are discussed, and promising directions for future work are identified.

Location-Based Management for Construction Russell Kenley, Olli Seppänen, 2006-09-27 With extensive case studies for illustration, this is a practitioner's guide to an entirely new production system for construction management using flowline scheduling. Covering the entire process of presenting a comprehensive management system - from design, through measurement, scheduling, and visualization and control - its emphasis is on reducing cost and increasing quality. Perfect as a how-to guide for researchers and advanced construction students to discover the simple application of the new techniques, and invaluable for acquiring the practical tools for planning and controlling projects.

**Decision Making Algorithms for Hydro-Power Plant Location** Mrinmoy Majumder, Soumya Ghosh, 2013-06-06 The present study has attempted to apply the advantage of neuro-genetic algorithms for optimal decision making in maximum utilization of natural resources. Hydro-power is one of the inexpensive, but a reliable source of alternative energy which is foreseen as the possible answer to the present crisis in the energy sector. However, the major problem related to hydro-energy is its dependency on location. An ideal location can produce maximum energy with minimum loss. Besides, such power-plant also requires substantial amount of land which is a precious resource nowadays due to the rapid and uncontrolled urbanization observed in most of the urban centres in the World. The feasibility of such plants also depends on social acceptance as well as the level of environmental casualty and economic benefit, all of which is also spatially dependent. Decision making algorithms are applied to identify better solution if a problem has more than one alternative explication. Nature based algorithms are found to be efficient enough to catalyze such kind of decision making analysis. That is why the present study tries to utilize nature based algorithms to solve the problems of location selection for hydropower plants. The study employed six different types of nature based algorithms to select one of the locations among many available for installation of hydropower plant in the North Eastern part of the Indian subcontinent. The locations are selected based on their in stream resources and included in the decision making as alternatives. A methodology of criteria selection, determination of weightage and applications of bioinspired

algorithms are adopted to produce utmost exertion of the available natural resources with minimum hostility and wastage of the same.

**The Experiences of Film Location Tourists** Stefan Roesch,2009-12-16 Within the last decade film-induced tourism has gained increasing attention from academics and the industry alike. While most research has focused on the tourism-inducing effects of film productions, not much has been written about the film location tourists themselves. This book examines the on-site experiences of these tourists by drawing from various disciplines, including geography, sociology and psychology. The author accompanied tourists to film locations from The Lord of the Rings, Star Wars and The Sound of Music and conducted extensive on-site research with them. The results show that only by understanding the needs and wants of film location tourists can film be utilised as a successful and sustainable instrument within strategic destination marketing portfolios.
