Solvency Compendium ,2008-07 A solvency opinion provides assurance to a company's Board of

Directors and/or the lenders that the transaction will not likely subject the Company and its unsecured and other creditors to undue financial distress. Houlihan will undertake a solvency opinion engagement for companies involved in highly leveraged transactions. Examples include leveraged buyouts, leveraged recapitalizations, leveraged dividends or other such situations where there may be minimal equity involved. Houlihan has also completed solvency opinions for spin-off transactions in conjunction with capital restructuring and significant debt refinancing. The Federal Bankruptcy Code defines insolvent as the condition in which the total of a person's debts exceeds the value of its property at a fair valuation. Recent case law suggests that the fair valuation of property is its value on a going-concern basis. A solvency letter expresses an independent expert opinion on a borrower's ability to remain solvent under the burden of additional liability, to pay debts as they mature, and to continue operations as a going-concern in dynamic economic conditions. In connection with a leveraged recapitalization, interested parties such as new secured lenders and sellers will often, due to fraudulent conveyance concerns, seek an independent determination and opinion as to the impact of the acquisition debt on working capital, cash flow, and equity value. Houlihan is highly familiar with the Tests of Capitalization and Solvency and is able to efficiently and cost-effectively provide analysis that provides a layer of comfort to interested parties.

Sustainability, Eco-efficiency, and Conservation in Transportation Infrastructure Asset Management

Massimo Losa, Tom Papagiannakis, 2014-04-28 Worldwide there is a growing interest in efficient planning and the design, construction and maintenance of transportation facilities and infrastructure assets. The 3rd

International Conference on Transportation Infrastructure ICTI 2014 (Pisa, April 22-25, 2014) contains contributions on sustainable development and preservation of transportation in

Deep Energy Retrofit Guide for Public Buildings Rüdiger Lohse, Alexander Zhivov, 2019-04-10 This book provides detailed information on how to set up Deep Energy Retrofits (DERs) in public buildings, and shares in-depth insights into the current status of the major technologies, strategies and practical best practice examples of how to cost-effectively combine them. Case studies from Europe are analyzed with respect to energy use before and after renovation, reasons for undertaking the renovation, co-benefits achieved, resulting cost-effectiveness, and the business models employed. The building sector holds the potential for tremendous improvements in terms of energy efficiency and reducing carbon emissions, and energy retrofits to the existing building stock represent a significant opportunity in the transition to a low-carbon future. Moreover, investing in highly efficient building materials and systems can replace long-term energy imports, contribute to cost cutting, and create a wealth of new jobs. Yet, while the technologies needed in order to improve energy efficiency are readily available, significant progress has not yet been made, and “best practices” for implementing building technologies and renewable energy sources are still relegated to small “niche” applications. Offering essential information on Deep Energy Retrofits, the book offers a valuable asset for architects, public authorities, project developers, and engineers alike.

De-Shuang Huang,Kang-Hyun Jo,Hong-Hee Lee,Hee-Jun Kang,Vitoantonio Bevilacqua,2009-09-19 The International Conference on Intelligent Computing (ICIC) was formed to provide an annual forum dedicated to the emerging and challenging topics in artificial intelligence, machine learning, bioinformatics, and computational biology, etc. It aims to bring - gether researchers and practitioners from both academia and industry to share ideas, problems, and solutions related to the multifaceted aspects of intelligent computing. ICIC 2009, held in Ulsan, Korea, September 16-19, 2009, constituted the 5th - ternational

Conference on Intelligent Computing. It built upon the success of ICIC 2008, ICIC 2007, ICIC 2006, and ICIC 2005 held in Shanghai, Qingdao, Kunming, and Hefei, China, 2008, 2007, 2006, and 2005, respectively. This year, the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing. Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. Therefore, the theme for this conference was “Emerging Intelligent Computing Technology and Applications.” Papers focusing on this theme were solicited, addressing theories, methodologies, and applications in science and technology.

Simulation for Policy Inquiry Anand Desai,2012-06-12 Public policy and management problems have been described as poorly defined, messy, squishy, unstructured, intractable, and wicked. In a word, they are complex. This book illustrates the development and use of simulation models designed to capture some of the complexity inherent in the formulation, management, and implementation of policies aimed at addressing such problems. Simulation models have long existed at the fringes of policy inquiry but are not yet considered an essential component of the policy analyst's toolkit. However, this situation is likely to change because with improvements in computational power and software, simulation is now easier to include in the standard repertoire of research tools available for discovery and decision support. This volume provides both a conceptual rationale for using simulations to inform public policy and a practical introduction to how such models might be constructed and employed. The focus of these papers is on the uses of simulation to gain understanding and inform policy decisions and action. Techniques represented in this volume include Monte Carlo simulation, system dynamics and agent based modeling.

Corporate Governance in the 21st Century Luke Nottage,Leon Wolff,Kent Anderson,2009-01-01
Corporate Governance in the 21st Century is a very useful addition to the literature on corporate

governance in Japan. It is worth reading simply because it updates many of the ongoing issues such as adoptions of takeover defenses, appointments of independent directors, and increases in foreign direct investment. It is also useful because it examines corporate governance from the perspectives of business as well as law. Furthermore, it provides the beginnings of a framework through which to understand the process of gradual transformation. Christina L. Ahmadjian, *Journal of Japanese Studies* An invaluable set of resources for everyone with an interest in corporate governance in Japan. Covering both basic information and recent developments, the collection provides readers with an excellent survey of the complexity of modern corporate governance and its legal setting. . . in Japan. Hideki Kanda, University of Tokyo, Japan The essays in this collection approach Japanese corporate governance in the 2000s from a variety of novel perspectives novel in terms of subject matter, methodology, and points of comparison. The result is a comprehensive portrait of the current dynamics of change and stasis in the institutional environment for Japanese firms. Curtis Milhaupt, Columbia Law School, US The lost decade of economic stagnation in Japan during the 1990s has become a found decade for regulatory and institutional reform. Nowhere is this more evident than in corporate law. In 2005, for example, a spate of reforms to the Commercial Code culminated in the new Company Act, a statute promising greater organisational flexibility and shareholder empowerment for Japanese corporations competing in a more globalised economy. But does this new law herald a more Americanised system of corporate governance? Has Japan embraced shareholder primacy over its traditional loyalty to other key stakeholders such as main banks , core employees, and partners within diffuse corporate (keiretsu) groups? This book argues that a more complex gradual transformation is

unfolding in Japan a process evident in many other post-industrial economies. The book brings together contributions from academics and practitioners from Japan, Australia, New Zealand, Canada and the United States. It includes chapters on comparative corporate governance theory and methodology, lifelong employment, the main bank system, board structures, and governance issues in small and medium-sized enterprises. The procedural, substantive and FDI policy dimensions of takeover law and practice are discussed, as well as empirical changes to corporate governance practices in large, publicly listed companies during the past twenty years. The authors rich mix of national, disciplinary and professional backgrounds allows for a broad comparative perspective on developments in Japanese corporate governance. The book will be of great interest to scholars and students of law, business, political economy and Japanese studies, and will also appeal to corporate lawyers and policymakers.

Effective Client Management in Professional Services Jack Berkovi, 2016-04-29 How do firms become Client-centric? Effective Client Management in Professional Services is about putting the Client first, everywhere, in the activities of professional services firms. The book introduces The Client Management Model to enable firms to assess their level of Client orientation and relationship development. It also features The Client Management Index which enables firms to benchmark their result against their peers. Many firms are still developing and improving their commercial structures and approaches to attract, develop and retain Clients. Characteristically, professional services firms tend to lag their consumer goods and service industry counterparts in overall commerciality. Only recently have they discovered the value of having a strong brand promise with the associated employee engagement. In many firms achievement

of Client satisfaction is not a strategic objective; this may need to be reviewed. This book provides a comprehensive, pragmatic guide to the Client relationship journey, from identifying potential Clients to their engagement, care, retention, development, loyalty and beyond. The handbook format has exercises and tools which can help to establish which Clients are likely to be the most lucrative and thus provide the desired financial returns. The book also includes insights from top practitioners, anecdotes, case studies, charts and useful exercises and checklists. Readers can also determine their own level of effectiveness using the end of chapter reviews and a diagnostic tool to produce a Client Management Profile.

Pavement, Roadway, and Bridge Life Cycle Assessment 2020 John Harvey, Imad L. Al-Qadi, Hasan Ozer, Gerardo Flintsch, 2020-05-30 An increasing number of agencies, academic institutes, and governmental and industrial bodies are embracing the principles of sustainability in managing their activities. Life Cycle Assessment (LCA) is an approach developed to provide decision support regarding the environmental impact of industrial processes and products. LCA is a field with ongoing research, development and improvement and is being implemented world-wide, particularly in the areas of pavement, roadways and bridges. **Pavement, Roadway, and Bridge Life Cycle Assessment 2020** contains the contributions to the International Symposium on Pavement, Roadway, and Bridge Life Cycle Assessment 2020 (Davis, CA, USA, June 3-6, 2020) covering research and practical issues related to pavement, roadway and bridge LCA, including data and tools, asset management, environmental product declarations, procurement, planning, vehicle interaction, and impact of materials, structure, and construction. **Pavement, Roadway, and Bridge Life Cycle Assessment 2020** will be of interest to researchers, professionals, and policymakers in academia,

industry, and government who are interested in the sustainability of pavements, roadways and bridges.
