Maps and Civilization Norman J. W. Thrower,2008-11-15 In this concise introduction to the history of cartography, Norman J. W. Thrower charts the intimate links between maps and history from antiquity to the present day. A wealth of illustrations, including the oldest known map and contemporary examples made using Geographical Information Systems (GIS), illuminate the many ways in which various human cultures have interpreted spatial relationships. The third edition of Maps and Civilization incorporates numerous revisions, features new material throughout the book, and includes a new alphabetized bibliography. Praise for previous editions of Maps and Civilization: "A marvelous compendium of map lore. Anyone truly interested in the development of cartography will want to have his or her own copy to annotate, underline, and index for handy referencing."—L. M. Sebert, Geomatica

Family Maps of Scott County, Indiana, Deluxe Edition Gregory A. Boyd,Gregory a Boyd J D,2010-05-20 Locating original landowners in maps has never been an easy task-until now. This volume in the Family Maps series contains newly created maps of original landowners (patent maps) in what is now Scott County, Indiana, gleaned from the indexes of the U.S. Bureau of Land Management. But it offers much more than that. For each township in the county, there are two additional maps accompanying the patent map: a road map and a map showing waterways, railroads, and both modern and many historical city-centers and cemeteries. Included are indexes to help you locate what you are looking for, whether you know a person's name, a last name, a place-name, or a cemetery. The combination of maps and indexes are designed to aid researchers of American history or genealogy to explore frontier neighborhoods, examine family migrations, locate hard-to-find cemeteries and towns, as well as locate land based on legal descriptions found in old documents or deeds. The patent-maps are essentially plat maps but instead of depicting owners for a particular year, these maps show original landowners, no matter when the transfer from the federal government was completed. Dates of patents typically begin near the time of statehood and run into the early 1900s. 118 pages with 32 total maps What's Mapped in this book (that you'll not likely find elsewhere) . . . 1242 Parcels of Land (with original landowner names and patent-dates labeled in the relevant map) 15 Cemeteries plus . . . Roads, and existing Rivers, Creeks, Streams, Railroads, and Small-towns (including some historical), etc. What YEARS are these maps for? Here are the counts for parcels of land mapped, by the decade in which the corresponding land patents were issued: DecadeParcel-count 1820s37 1830s786 1840s292 1850s124 1860s1 1900s2 What Cities and Towns are in Scott County, Indiana (and in this book)?
