Xander's Mate Abigail Raines, 2019-05-20 As the alpha of the Tremblay pack and the de facto leader of my entire clan, I've always followed the code of wolf shifters... Rule #1: Fealty to pack Rule #2: Loyalty to clan Rule #3: Avoid humans Though things have been changing. At least that's what I tell myself when I meet Olivia Hathaway, a witch and activist who has a lot to say about how I do things as CEO of the Tremblay Company. And... It's useless to deny the attraction between us but it's impossible to think I can ever fall in love with a human. Also.. It doesn't help that the enemies who have been after my family since my brother Aaron chose his mate, are joining together to defeat us in the name of preserving the true shifter ways. But I won't let them. Even if I have to declare war. I'll fight for my family with every breath in my body and it turns out...that includes Olivia Hathaway. Warning: 18+. For mature audiences only. This book is a standalone with a HEA ending.

The Mate Wait Lisa M. Williams, 2014-02 If good things come to those who wait, then extraordinary things should come to the Woods siblings and their friends, for as long as they've all been waiting for mates. Zonovia Woods is smart, funny, beautiful, and a fantastic friend. As the director of her family-owned and operated nonprofit organization, she's the heroine in her sunny, Southern California community and the epitome of the proverbial virtuous woman. Despite her credit, this modern-day-Ruth has yet to be claimed by some equally eligible man of God. Her older brothers, Zuriel and Zachariah Woods, are identical twins, but their lives couldn't be more different. Zuriel's happily married for years with 2.5 children. Zachariah has happily parted with the 25th woman he's dated just this month! Why don't the lives of these twin brothers mirror their identical reflections, granting Zachariah an existence that's similar to Zuriel's, rather than one that's mateless, like Zonovia's? Unfortunately, Zachariah and Zonovia aren't the only two hoping for mates. One mutual friend is anxiously searching for the one, while another friend has settled for the one right now. Even some of their seasoned, elder comrades, who've been patiently waiting for years, are starting to become weary in well doing. What's taking so long? Is it God manipulating all the pieces in this seemingly spiritual game of relationship chess? Or, is it the players, themselves, whose choices prolong or propel the battle of acquiring the best mate? Find out in *The Mate Wait*.

The Alpha's Mate Jacqueline Rhoades, 2012 Welcome to Rabbit Creek ... City girl Elizabeth Reynolds hopes to find peace and contentment in the small Appalachian town of Rabbit Creek. Okay, so the bucolic cottage she's rented turns out to be a dilapidated cabin without phone service, but the people she meets are wonderful. Friendly and down to earth, they welcome her with open arms. It's just like moving to Mayberry ... if Andy and Aunt Bea were wolves. Only an outsider would call them werewolves. They're wolvers, a community of man/beasts that have lived in these hills since their ancestors emigrated from Scotland three hundred years ago. And that gorgeous Chief of Police, Marshall Goodman, the guy she met while covered in mud and wearing granny underpants? The one who sends her heart spinning? He's their Alpha and his pack is under attack from outside forces.

Elizabeth, being a sane and reasonable woman, wants no part of any of this, but if she refuses to risk her life and her heart, the people she's grown to care about will lose everything and she'll lose the one man she was born to love.

Fate has a different plan for him. When the queen he despises declares her intention to claim him, he retreats into the jungle. What he finds there changes his world. Small, delicate, and pale skinned, Ivy Foster is nothing like the females Ketahn has known. She's not of his kind at all. Yet the moment he sees her, he knows the truth in his soul-she is his heartsthread. And now that he has her, he won't let anything take her away. Not the jungle, not the gods, not the queen and her warriors. Whether Ivy agrees or not, their webs are entangled. No one will ever sever those threads. ---- Book 1 of 3 in The Spider's Mate Trilogy. Warning: Contains darker themes and there is also a cliffhanger. Check the author's website for more detailed content warnings.

The Alpha's Mate Ava Gray,2021-03-31 I knew that Ava Bradley was mine from the moment I saw her. Fate gave me a smart and kind soul mate with a body that left me panting. But she was human. I had to play this carefully. Humans didn't know that wolf shifters existed, or what it meant to be mated to one. The last thing I wanted was to scare off my timid little mate. But my pack was in trouble. We had a history of losing good people to the Hunters that were determined to exterminate my kind. As Alpha, I had to keep my pack safe. As a shifter in love, I had to make sure that Ava didn't get caught in the crossfire. She had a dark past of her own, one that she couldn't quite escape. Would we be able to face our enemies together

and come out stronger on the other side? Or would I lose my mate before I got the chance to claim her as mine?

Mate Choice Gil G. Rosenthal, 2017-07-18 A major new look at the evolution of mating decisions in organisms from protozoans to humans The popular consensus on mate choice has long been that females select mates likely to pass good genes to offspring. In *Mate Choice*, Gil Rosenthal overturns much of this conventional wisdom. Providing the first synthesis of the topic in more than three decades, and drawing from a wide range of fields, including animal behavior, evolutionary biology, social psychology, neuroscience, and economics, Rosenthal argues that good genes play a relatively minor role in shaping mate choice decisions and demonstrates how mate choice is influenced by genetic factors, environmental effects, and social interactions. Looking at diverse organisms, from protozoans to humans, Rosenthal explores how factors beyond the hunt for good genes combine to produce an endless array of preferences among species and individuals. He explains how mating decisions originate from structural constraints on perception and from nonsexual functions, and how single organisms benefit or lose from their choices. Both the origin of species and their fusion through hybridization are strongly influenced by direct selection on preferences in sexual and nonsexual contexts. Rosenthal broadens the traditional scope of mate choice research to encompass not just animal behavior and behavioral ecology but also neurobiology, the social sciences, and other areas. Focusing on mate choice mechanisms, rather than the traits they target, *Mate Choice* offers a groundbreaking perspective on the proximate and ultimate forces determining the evolutionary fate of species and populations.
