Mating Norman Rush, 1992-09-01 NATIONAL BOOK AWARD WINNER • Is love between equals possible? This modern classic is a delightful intellectual love story that explores the deepest canyons of romantic love even as it asks large questions about society, geopolitics, and the mystery of what men and women really want. "Luminous...Few books evoke the state of love at its apogee." —The New York Times Book Review "The best rendering of erotic politics...since D.H. Lawrence...The voice of Rush's narrator is immediate, instructive and endearing." —The New York Review of Books The narrator of this splendidly expansive novel of high intellect and grand passion is an American anthropologist at loose ends in the South African republic of Botswana. She has a noble and exacting mind, a compelling waist, and a busted thesis project. She also has a yen for Nelson Denoon, a charismatic intellectual who is rumored to have founded a secretive and unorthodox utopian society in a remote corner of the Kalahari—one in which he is virtually the only man. What ensues is an exhilarating quest and an exuberant comedy of manners: "A dryly comic love story about grown-up people who take the life of the mind seriously." —Newsweek

Mating Norman Rush, 2013-10-03 An American anthropologist is at a loose end in Botswana. She is ferociously intelligent and wonderfully inquisitive. She is also in love with Nelson Denoon, a charismatic intellectual who runs an experimental women-only utopian village in the Kalahari. At times wildly comic but also magnificently cerebral, *Mating* is a profound exploration of the human condition and a moving love story, circling the question 'what do men and women really want?'

The Mating Season Alex Brunkhorst, 2013-12-10 An enchanting, extraordinarily imaginative novel, *The Mating Season* tells the story of the romance between two geniuses who have created their own fantastical worlds to cope with the pain of isolation. Zorka Carpenter lives a life completely devoted to animals. In a glass house on a hill she spends her days absorbed in her menagerie. Enigmatic architect Richard Dorsey has spent his life trying to escape the fame he garnered in his youth. Living in a world of his own construction, he finds solace only in the past. When these two worlds collide in a magical tryst both Zorka and Richard are challenged to escape their isolated worlds and find connection in the hearts of one another. Astonishingly inventive, Alexandria Brunkhorst's *The Mating Season* is a dazzling work of the imagination, and a piercing look at the human heart.

Mating Systems and Strategies Stephen M. Shuster, Michael J. Wade, 2019-12-31 This book presents the first unified conceptual and statistical framework for understanding the evolution of reproductive strategies. Using the concept of the opportunity for sexual selection, the authors

illustrate how and why sexual selection, though restricted to one sex and opposed in the other, is one of the strongest and fastest of all evolutionary forces. They offer a statistical framework for studying mating system evolution and apply it to patterns of alternative mating strategies. In doing so, they provide a method for quantifying how the strength of sexual selection is affected by the ecological and life history processes that influence females' spatial and temporal clustering and reproductive schedules. Directly challenging verbal evolutionary models that attempt to explain reproductive behavior without quantitative reference to evolutionary genetics, this book establishes a more solid theoretical foundation for the field. Among the weaknesses the authors find in the existing data is the apparent ubiquity of condition-dependent mating tactics. They identify factors likely to contribute to the evolution of alternative mating strategies--which they argue are more common than generally believed--and illustrate how to measure the strength of selection acting on them. Lastly, they offer predictions on the covariation of mating systems and strategies, consider the underlying developmental biology behind male polyphenism, and propose directions for future research. Informed by genetics, this is a comprehensive and rigorous new approach to explaining mating systems and strategies that will influence a wide swath of evolutionary biology.

The Evolution of Desire David M. Buss, 2016-12-27 A "drop-dead shocker" (Washington Post Book World) that uses evolutionary psychology to explain human mating and the mysteries of love If we all want love, why is there so much conflict in our most cherished relationships? To answer this question, we must look into our evolutionary past, argues prominent psychologist David M. Buss. Based one of the largest studies of human mating ever undertaken, encompassing more than 10,000 people of all ages from thirty-seven cultures worldwide, *The Evolution of Desire* is the first work to present a unified theory of human mating behavior. Drawing on a wide range of examples of mating behavior —

from lovebugs to elephant seals, from the Yanomamö tribe of Venezuela to online dating apps — Buss reveals what women want, what men want, and why their desires radically differ. Love has a central place in human sexual psychology, but conflict, competition, and manipulation also pervade human mating — something we must confront in order to control our own mating destiny. Updated to reflect the very latest scientific research on human mating, this definitive edition of this classic work of evolutionary psychology explains the powerful forces that shape our most intimate desires.

The Mating Game Pamela C. Regan, 2016-01-12 Pamela C. Regan's *The Mating Game: A Primer on Love, Sex, and Marriage*, Third Edition is the only introductory text about human mating relationships aimed specifically at a university audience. Encompassing a wide array of disciplines, this comprehensive review of theory and empirical research takes an integrated perspective on the fundamental human experiences of attraction and courtship; mate selection and marriage; and love and sex. Strongly grounded in methodology and research design, the book offers relevant examples and anecdotes along with ample pedagogy that will spark debate and discussion on provocative and complex topics.

The Animal Mating Game Ann Downer, 2016-08 This book discusses courtship, sex, and mating habits across the animal kingdom, covering birds, reptiles, amphibians, fishes, and mammals, as well as select invertebrates.--

Wild Connection Jennifer L. Verdolin, 2014 Wild Kingdom meets Sex and the City in this scientific perspective on dating and relationships. A specialist in animal behavior compares the courtship rituals and mating behaviors of animals to their human equivalents, revealing the many and often surprising ways we are both similar to and different from other species. What makes an individual attractive to the opposite sex? Does size matter? Why do we tend to keep score in our relationships? From

perfume and cosmetics to online dating and therapy, our ultimate goal is to successfully connect with someone. So why is romance such an effort for humans, while animals have little trouble getting it right? *Wild Connection* is full of fascinating and suggestive observations about animal behavior. For example, in most species smell is an important component of determining compatibility. So are we humans doing the right thing by masking our natural scents with soaps and colognes? Royal albatrosses have a lengthy courtship period lasting several years. These birds instinctively know that casual hook-ups are not the way to find a reliable mate. And older female chimpanzees often mate with younger males. Is this the evolutionary basis of the human cougar phenomenon? Fun to read as well as educational, this unique take on the perennial human quest to find the ideal mate shows that we have much to learn from our cousins in the wild.

Dating, Mating, and Marriage Martin King Whyte, 2018-02-06 This book examines the American system of dating, mate choice, and marriage. It analyzes a wide range of established ideas about how dating and mate choice are changing, and identifies changes and continuities in premarital experiences in twentieth century America. A variety of ideas about what sorts of dating and premarital experiences will make for a successful marriage are tested and for the most part disproven, raising serious doubts about our fundamental assumption that dating experience helps individuals make a wise choice for a future mate. Marital success turns out to depend not so much on premarital experiences or on the social background characteristics of couples (such as race, religion, and social class) as on the way in which couples structure their day-to-day marital life together. Through its detailed examination of a wide range of ideas and predictions about dating, mating, and marriage, and through its dramatic findings, *Dating, Mating, and Marriage* challenges many previous assumptions and conclusions about the fate of American marriage and elevates our knowledge of the

American system of mate choice to a higher level.

Mating in Captivity Esther Perel, 2007-10-30 One of the world's most respected voices on erotic intelligence, Esther Perel offers a bold, provocative new take on intimacy and sex. *Mating in Captivity* invites us to explore the paradoxical union of domesticity and sexual desire, and explains what it takes to bring lust home. Drawing on more than twenty years of experience as a couples therapist, Perel examines the complexities of sustaining desire. Through case studies and lively discussion, Perel demonstrates how more exciting, playful, and even poetic sex is possible in long-term relationships. Wise, witty, and as revelatory as it is straightforward, *Mating in Captivity* is a sensational book that will transform the way you live and love.

Human Mating Patterns Society for the Study of Human Biology, 1988-12-15 This book examines the causes and consequences of different mating patterns in man with particular reference to historical, biological, medical and demographic factors. Each of these reference points are covered in carefully edited and integrated papers for advanced students and research workers in human biology and genetics.

The Nature of Sex Carin Bondar, 2015 Thought about sex today? Of course you have! It's about the most natural thing any animal can do. But have you ever wondered how human sex compares to that of other beasts? It's far from merely inserting part A into slot B. The sex lives of our animal cousins are fiendishly difficult, infinitely varied and often violent. They involve razor sharp penises, murderous cannibals and chemical warfare in an epic battle between the sexes. Like us, animals must first find the perfect partner. You think we have it tough? Try having to do it while being hunted down by predators, against a backdrop of unpredictable or life-threatening conditions. Then, sperm and egg must successfully meet. Can you imagine doing this when your partner is intent on killing you or when

other disgruntled singles are determined to throw you off your game? The next task is to ensure that the resultant offspring reach sexual maturity in order to keep the cycle going. The myriad ways in which this is accomplished is ingenious. Join Carin Bondar on a fascinating journey from puberty to old age across the entire animal kingdom - it will forever change your idle daydreams about the nature of sex.

The Mating Rituals of the Burning Giraffe Morgan Benson, 2010-03-08 Set in a world where clocks melt and gentlemen rain from the sky, *The Mating Rituals Of The Burning Giraffe* is a grown-ups fable, inspired by the surrealist paintings, sculptures, and sketches of Magritte, Dal, and Monty Python. It's a brightly colored delirium, dedicated to the indomitable child. The story follows Billy Dada, a young man about to enter a state of higher learning where he will be taught the principles of categorizing biological diversity, from smelly wolves to cats with heads like mushrooms, from hares with fangs to enormous clams, but who, amidst the books and lectures, nurtures a fascination with the giraffe infernalis, a pyrrhic obsession that's about to turn into a scathfire. So begins a black-and-blue excursion into the brushstrokes on life's canvas. It's a slab of confusion and desperation, a swirl of hardships and sorrows inside a frame of meaning. *The Mating Rituals of the Burning Giraffe* is an adult fairytale about how fate tears us apart unless we move with it. It's a way to move with it. Move with it.

Mate Choice Paul Patrick Gordon Bateson, 1983-04-28 Twenty-one specially-commissioned articles provide a clear picture of the current state of thinking about mate choice. Brings together modern thinking on the various functions of mate choice and its role in evolution.

A Mating in the Wilds Ottwell Binns, 2020-07-29 Reproduction of the original: *A Mating in the Wilds* by Ottwell Binns

The Mating Mind Geoffrey Miller, 2011-12-21 At once a pioneering study of evolution and an accessible and lively reading experience, a book that offers the most convincing—and radical—explanation for how and why the human mind evolved. Consciousness, morality, creativity, language, and art: these are the traits that make us human. Scientists have traditionally explained

these qualities as merely a side effect of surplus brain size, but Miller argues that they were sexual attractors, not side effects. He bases his argument on Darwin's theory of sexual selection, which until now has played second fiddle to Darwin's theory of natural selection, and draws on ideas and research from a wide range of fields, including psychology, economics, history, and pop culture. Witty, powerfully argued, and continually thought-provoking, *The Mating Mind* is a landmark in our understanding of our own species.

Monogamy Ulrich H. Reichard, Christophe Boesch, 2003-09-11 This book explores the biological roots of social, sexual and reproductive monogamy in birds, mammals and humans.

Mating Intelligence Unleashed Glenn Geher PhD, Scott Barry Kaufman PhD, 2013-01-30 Psychologists often paint a picture of human mating as visceral, instinctual. But that's not the whole story. In courtship and display, sexual competition and rivalry, we are also guided by what Glenn Geher and Scott Barry Kaufman call Mating Intelligence--a range of mental abilities that have evolved to help us find the right partner. Mating Intelligence is at work in our efforts to form, maintain, and end relationships. It guides us in flirtation, foreplay, copulation, finding and choosing a mate, and many other behaviors. In *Mating Intelligence Unleashed*, psychologists Geher and Kaufman take readers on a fascinating tour of the crossroads of mating and intelligence, drawing on cutting-edge research on evolutionary psychology, intelligence, creativity, personality, social psychology, neuroscience, and more. The authors show that despite what you may read in the latest issue of *Maxim*, *Playboy*, *Vogue*, or *GQ*, physical attractiveness isn't the whole story. Human mating draws on a range of mental skills and attributes--from the creative use of pick-up lines, to displays of charisma, intelligence, humor, personality, and compassion. Along the way, the authors shed new light on age-old questions, such as: What role does personality play in mating? Which traits are attractive--and

which traits repulse? How do people really choose mates? How do men and women deceive each other? How important is emotional intelligence? Why do people create art--and does it have anything to do with sex? Do nice guys really finish last? Since Glenn Geher coined the term Mating Intelligence in 2006, it has drawn a great deal of media attention, ranging from a Psychology Today cover story to articles in the New Scientist, the Washington Times, the Huffington Post, and elsewhere. Now, in Mating Intelligence Unleashed, readers will have the first full account of this revolutionary new approach to dating, mating, and love.
