Privacy Rights In The United States Counsel Mayabi,2015-04-14 Seminar paper from the year 2015 in the subject Law - Comparative Legal Systems, Comparative Law, grade: A, , course: Constitutional Law, language: English, abstract: The topic on privacy of the people has been a concern for many recently. This is because governments have been seeking to get personal information about citizens for purposes of maintaining security and taming terrorism. The foregoing is not acceptable as everyone is entitled to the right of privacy and no one should be allowed to deny anyone that liberty to have privacy. The paper therefore seeks to discuss how privacy issues have been dealt with in the US especially how the Federal and State governments apply restrictions to the topic.

The Role of Education In Fighting Inequality Counsel Mayabi,2015-02-17 Seminar paper from the year 2014 in the subject Sociology - Knowledge and Information, University of Nairobi (Law), course: Social Foundations of Law, language: English, abstract: The presence of unequal opportunities and incentives for varied social statuses in a community or a state sums up my definition, which is open to debate, of inequality. These include the unequal distribution of resources and the distribution that is based on already established patterns that have been socially defined. In this context, there are categories of people in a given society and resources are distributed based on the category into which the people fall. Because of the inequalities in the society, the people at the upper classes would be always ahead of those in the lower-class. Those at the lower-class will therefore find it hard to abridge the wide gap between the classes. Some have said that education is the only way up the social ladder. A few however, refute the claim that no one needs to be educated to avoid poverty. That is education is no guaranteed solution for the inequalities They say, we cannot run to education as the only solution to poverty. Going to institutions of higher learning to find a way out of poverty or social problems should be out of anyone's mind (Marsh, p12). However, such mentality is not in its entirety justifiable as the power of education cannot be underestimated. Education may not be the only way out, but at least it has a bearing on the overall call for equality. Having said this, my paper finds out and its main purpose is to provide a justification that education may be in one way or another, a way out of inequality and poverty as would be argued in the rest part of this paper.

Guide to Electoral Fraud Tah Asongwed, 2004 GUIDE TO ELECTORAL FRAUD Loser take all By Tah Asongwed Some people mistakenly thought elections could be fraud free until they witnessed a form of electoral fraud practiced in the United States of America during the 2000 presidential elections. Until then, it had always been assumed that electoral fraud was a plague that affected mainly developing countries, especially African countries where elections, by their very nature and definition, are fraud-stained. Guide to Electoral Fraud (Loser take all) is a very original and professional work of art that lays down the broad strokes of electoral fraud actions that can be undertaken by any individual or group of individuals aspiring to an elective office. While its main focus is Africa, there is no doubt that politicians and readers all over the world will find it extremely useful. Everywhere on the African continent, people at all levels are involved in an oedipal struggle for survival and regeneration and clamoring for the right to take part in selecting those who should reign over them. This is a basic, fundamental, and legitimate quest for self-development because no people, no matter how lowly, can accept to carry the yoke of oppression indefinitely. Moreover, people want to believe the illusion that elections produce good leaders. President Gaulus Machando Mayabi has felt obliged to draw the attention of the world, and particularly that of incumbent and aspiring African tribal president-monarchs, to what they need to do to continue maintaining themselves in power by force so as to keep their people in abject subjugation and their countries on the straight and downward road to political, economic, and cultural ruin. There comes a time in the political life of nations and in the political fortunes of leaders when someone, preferably a man of honor and integrity like President Gaulus Machando Mayabi, has to take up the gauntlet in the defense of his fellow African tribal president-monarchs and himself under the pretext that he is defending the nation and its institutions. Guide to Electoral Fraud (Loser take all) has therefore been written to cater primarily to the interests of reigning tribal African president-monarchs. But beyond serving the needs of African tribal president-monarchs and aspiring candidates for elective office, it is also intended to serve a much wider and composite audience made up of international observers, donor countries, foreign embassy staff, international spy networks, political scientists, African and foreign politicians, students of politics, human rights organizations, etc. Although most African tribal president-monarchs are already very familiar with the methods described in this book, it is hoped that the book will serve as a ready reckoner and as a kind of vade mecum so that each time they want to organize an election, all they have to do is pick up the book and refer to the appropriate recipe, and then use their imagination to concoct the menu they want to serve their people. Their imagination is therefore the limit. Guide to Electoral Fraud (Loser take all) is an elections rulebook and the holy grail of election malpractice. It rightly parts the curtains for the world to peep inside the dark kitchen where African elections are cooked. The reader will be able to take a glimpse at the soot-stained white chefs and advisers of African tribal president-monarchs while sniffing the suffocating stench of the elections mishmash. Chances are that readers will be knocked out instantly by the black pall of smoke from the kitchen but, hopefully, the smoke shouldn't take long to clear for them to see through the election smokescreen and behold the stark nudity of the African tin gods sitting round the fireplace and stirring the election cauldron. There is no doubt that Guide to Electoral Fraud (Loser take all) will fill the yawning gap that exists in the world's knowledge about the way undemocratic elections are con

Contemporary Literature from Northeast India Amit R. Baishya, 2018-10-03 The Northeast Indian borderlands, a cultural crossroads between South, Southeast and East Asia, constitute an important post-colonial exception to the narratives of nation, troubling the common perception of India as an ostensibly liberal regime. This book is the first to consider the representations of the effects of political terror and survival in contemporary literature from Northeast India. Fictions from this polyglot region offer alternative representations that show the post-colonial nation-state to engage in acts of aggression that parallel colonial regimes. The militarization of everyday life and the subsequent growth of cultures of impunity has left a lasting impact on ordinary existence in this border zone. Like in the much more widely discussed case of Kashmir, the governance of the Northeast

region is not characterized so much by the management of life, the domain of what Michel Foucault calls biopolitics, but rather around the preponderance and distribution of death, what the postcolonial critic Achille Mbembe calls necropolitics. Not surprisingly, along with Mbembe's theorizations, the influential works of the Italian philosopher, Giorgio Agamben, on 'bare life' have provided fruitful pathways to a study of the sovereign politics of death and political terror in this region. The author draws upon the conceptual literature on political terror and sovereign power through a reading of Anglophone fictions alongside Assamese fictional narratives (all published after 1990), but shifts the onus from the 'why' of violence to the 'how' of lived experience. An original study of contemporary survivalist fictions that explores survival under conditions of civil and military threat, this book is a valuable contribution to the field of contemporary global literature focusing on cartographies of death and sovereign terror and postcolonial literature.

Fat Girls in Black Bodies Joy Arlene Renee Cox, Ph.D.,2020-09-29 Combatting fatphobia and racism to reclaim a space for womxn at the intersection of fat and Black To be a womxn living in a body at the intersection of fat and Black is to be on the margins. From concern-trolling--I just want you to be healthy--to outright attacks, fat Black bodies that fall outside dominant constructs of beauty and wellness are subjected to healthism, racism, and misogynoir. The spaces carved out by third-wave feminism and the fat liberation movement fail at true inclusivity and intersectionality; fat Black womxn need to create their own safe spaces and community, instead of tirelessly laboring to educate and push back against dominant groups. Structured into three sections--belonging, resistance, and acceptance--and informed by personal history, community stories, and deep research, *Fat Girls in Black Bodies* breaks down the myths, stereotypes, tropes, and outright lies we've been sold about race, body size, belonging, and health. Dr. Joy Cox's razor-sharp cultural commentary exposes the racist roots of diet culture, healthism, and the ways we erroneously conflate body size with personal responsibility. She explores how to reclaim space and create belonging in a hostile world, pushing back against tired pressures of going along just to get along, and dismantles the institutionally ingrained myths about race, size, gender, and worth that deny fat Black womxn their selfhood.

Cultural Logics and Global Economies Edward F. Fischer,2010-01-01 As ideas, goods, and people move with increasing ease and speed across national boundaries and geographic distances, the economic changes and technological advances that enable this globalization are also paradoxically contributing to the balkanization of states, ethnic groups, and special interest movements. Exploring how this process is playing out in Guatemala, this book presents an innovative synthesis of the local and global factors that have led Guatemala's indigenous Maya peoples to assert and defend their cultural identity and distinctiveness within the dominant Hispanic society. Drawing on recent theories from cognitive studies, interpretive ethnography, and political economy, Edward F. Fischer looks at individual Maya activists and local cultures, as well as changing national and international power relations, to understand how ethnic identities are constructed and expressed in the modern world. At the global level, he shows how structural shifts in international relations have opened new venues of ethnic expression for Guatemala's majority Maya population. At the local level, he examines the processes of identity construction in two Kaqchikel Maya towns, Tecpán and Patzún, and shows how divergent local norms result in different conceptions and expressions of Maya-ness, which nonetheless share certain fundamental similarities with the larger pan-Maya project. Tying these levels of analysis together, Fischer argues that open-ended Maya cultural logics condition the ways in which Maya individuals (national leaders and rural masses alike) creatively express their identity in a rapidly changing world.

An Ode to Boyhood Love Raunak Baral,2022-02-28 This book is a collection of poems that have been written since 2015. The main subject matter is love, and how providence plays a part in love. The author often makes references to a Higher power and how the hand of God is in everything and how we are puppets when it comes to God. Most of the poems are about women who came into his life and added substance and color to it. The book ranges from highs to lows. In some parts the author is filled with love, positivity and joy; and in others, despair. This beautiful transition from high to low and back again is what makes us human beings leading human lives.

Gender and Criminality in Bangla Crime Narratives Shampa Roy,2017-05-22 This book examines diverse literary writings in Bangla related to crime in late nineteenth and early twentieth century colonial Bengal, with a timely focus on gender. It analyses crime-centred fiction and non-fiction in the region to see how actual or imagined crimes related to women were shaped and fashioned into images and narratives for contemporary genteel readers. The writings have been examined within a social-historical context where gender was a fiercely contested terrain for publicly fought debates on law, sexual relations, reform, and identity as moulded by culture, class, and caste. Both canonized literary writings (like those of Bankim Chatterji) as well as non-canonical, popular writings (of writers who have not received sufficient critical attention) are scrutinised in order to examine how

criminal offences featuring women (as both victims and offenders) have been narrated in early manifestations of the genre of crime writing in Bangla. An empowered and thought-provoking study, this book will be of special interest to scholars of criminology and social justice, literature, and gender.
