Arab Television Today Naomi Sakr,2007-10-24 There is a great deal at stake for everyone in the future of Arab television. Political and social upheavals in this central but unsettled region are increasingly played out on television screens and in the tussles over programming that take place behind them. Al-Jazeera is of course only one player among a still-growing throng of satellite channels, which now include private terrestrial stations in some Arab states. It is an industry urgently needing to be made sense of; this book does exactly this in a very readable and authoritative way, through exploring and explaining the evolving structures and content choices in both entertainment and news of contemporary Arab television. It shows how owners, investors, journalists, presenters, production companies, advertisers, regulators and media freedom advocates influence each other in a geolinguistic marketplace that encompasses the Arab region itself and communities abroad. Probing internal and external interventions in the Arab television landscape, the book offers a timely and compelling sequel to Naomi Sakr's *Satellite Realms: Transnational Television, Globalization and the Middle East*, which won the Middle Eastern Studies Book Prize in 2003.

Learning from Communicators in Social Change Jan Servaes,2020-12-01 This book presents the perspectives of some of the main players, both academics and professionals, in communication for sustainable development and social change so as to provide valuable lessons for future generations of change agents. It places emphasis on both the theoretical foundation and practical applications and ethical concerns in communication for development and social change. Most of the available historical accounts in development communications make a distinction between the modernization paradigm, the dependency paradigm and the multiplicity or participatory paradigm. These historical accounts have been dominated by framing developments within these paradigms, as the logical offspring of the Western drive to develop the world after colonization and the Second World War. The subsequent collapse of the Soviet Union in the late eighties, together with the rise of the U.S. as the only remaining 'superpower,' the emergence of the European Union and China, the gradual coming to the fore of regional powers, such as the BRICS countries, and the recent meltdown of the world financial system has rendered disastrous consequences for people everywhere. This book responds to these changes and challenges in presenting a rethinking of the "power" of development, and consequently the place and role of communication in it. It is aimed at both emerging research students, policymakers and social research practitioners who are interested in the history of communication for development and social change and the role and place of major players in it. This is most applicable to the political and educational sector, as well as scholars of history, social work, and human rights. The book will provide valuable insights for beginners in these fields who are not yet familiar with the increasingly important and emerging field of global social change.

The book will help journalists and practitioners working in news media to identify best practices and discover new types of information flows in a rapidly changing news media landscape.

**The Immigration Crisis** Armando Navarro,2008-11-16 Immigration remains one of the most pressing and polarizing issues in the United States. In *The Immigration Crisis*, the political scientist and social activist Armando Navarro takes a hard look at 400 years of immigration into the territories that now form the United States, paying particular attention to the ways in which immigrants have been received. The book provides a political, historical, and theoretical examination of the laws, personalities, organizations, events, and demographics that have shaped four centuries of immigration and led to the widespread social crisis that today divides citizens, non-citizens, regions, and political parties. As a prominent activist, Navarro has participated broadly in the Mexican-American community's responses to the problems of immigration and integration, and his book also provides a powerful glimpse into the actual working of Hispanic social movements. In a sobering conclusion, Navarro argues that the immigration crisis is inextricably linked to the globalization of capital and the American economy's dependence on cheap labor.

**The Palgrave International Handbook of Women and Journalism** Carolyn M. Byerly,2016-01-12 Now in paperback for the first time, the Handbook is an academic adaptation of information contained in the Global Report on the Status of Women in News Media, a study commissioned by the International Women's Media Foundation. The book's editor was the principal investigator of the original study. This text draws together the most robust data from that original study, presenting it in 29 chapters on individual nations and three additional theoretical chapters. The book is the most expansive effort to date to consider women's standing in the journalism profession across the world. Contents organize nations in relation to their progress within newsrooms, with those most advanced in gender equality representing diversity in terms of region and national development. Contributing authors are, in most cases, the original researchers for their respective nations in the Global Report study.

**Newspaper Building Design and Journalism Cultures in Australia and the UK: 1855–2010** Carole O'Reilly,Josie Vine,2022-11-30 This book examines the micro-cultural ideologies of the journalism profession in Britain and Australia by focusing on the design, execution and development of newspaper building architecture. Concentrating on the main newspaper buildings in some of the major metropolitan areas in Australia (Melbourne, Sydney, Adelaide) and the UK (Manchester, London, Edinburgh and Liverpool) from 1855 to 2010, *Newspaper Building Design and Journalism Cultures in Australia and the UK: 1855–2010* interweaves a rich analysis of spatial characteristics of newspaper offices with compelling anecdotes from journalists' working lives, to examine the history, evolution and precarious future of the physical newsroom and the surrounding interior and exterior space. The book argues that newspaper buildings are designed to accommodate and extend journalism's professional values and belief systems over time and that their architecture reflects

ideological change and continuity in these value and belief systems, such as the evolution from trade to profession. Ancillary factors, such as the influence of the newspapers' owners on the building design and the financing of new structures are also considered. As professional practice rapidly shifts out of the newspaper offices, this insightful study questions what this may mean for the future of the industry. *Newspaper Building Design and Journalism Cultures in Australia and the UK: 1855–2010* will benefit academics and researchers in the areas of media, journalism, cultural studies and urban history.

**Energy Regulation in Africa** Ishmael Ackah,

*Newsmaking Cultures in Africa* Hayes Mawindi Mabweazara, 2018-06-05 This book contributes to a broadened theorisation of journalism by exploring the intricacies of African journalism and its connections with the material realities that underpin the profession on the continent. It pulls together theoretically driven studies that collectively deploy a wide range of evidence to shed some light on newsmaking cultures in Africa – the everyday routines, defining epistemologies, as well as ethical dilemmas. The volume digs beneath the standardised and universalised veneer of professionalism to unpack routine practices and normative trends shaped by local factors, including the structural conditions of deprivation, entrenched political instability (and interference), pervasive neo-patrimonial governance systems, and the influences of technological developments. These varied and complex circumstances are shown to profoundly shape the foundations of journalism in Africa, resulting in routine practices that are both normatively distinct and equally in tune with (imported) Western journalistic cultures. The book thus broadly points to the dialectical nature of news production and the inconsistent and contradictory relationships that characterise news production cultures in Africa.

Media Madness: The Corruption of Our Political Culture (Large Print 16pt) James Bowman, 2010-11 Although there is widespread acknowledgment that the mainstream media is in crisis - a crisis underscored as much by declining authority as declining circulation and viewership - no one has explained its intellectual and moral causes. James Bowman' media critic for The New Criterion' provides a scintillating and fast - paced anatomy of the mainstream media self - generated demise. In Media Madness' Bowman looks behind the headlines to examine mainstream media's governing myths. Writing

with acerbic wit' he shows how the mainstream media's embrace of a spurious notion of objectivity combined with its addiction to scandal' moral equivalence' and an unshakable conviction of its own moral superiority have done irreparable damage to the media's public authority and have helped precipitate a worldwide exodus to the blogosphere and other sources of news and comment.

*A Robust Think Tank for Africa* Francis Chishala,2014-10-08 The book is in three parts and deals with (i) social, political, economic issues about Africa; (ii) theories of communication and how they are applied to contemporary situation: case of Africa; and (iii) about issues of religion and social justice. The chapters on Africa highlights the need for political will in its leaders, a new breed of leadership that is selfless, a robust intelligentia to chart a new path of development and concern for the plight of the marginalized, especially the young. The essay chapters deal with creating new theories of communication in dealing with the fast-paced media of our time. The chapters on faith deal with reconciliation and forgiveness, Christmas as time to think about children, and parable of talents teaching us care ethics. The book will inspire all those who have a heart for Africa and its many challenges and hopes. It will inspire those who want to understand the media in our modern age. Indeed, it will inspire all those who would want to tap on faith to learn the variable lesson that care and concern for the impoverished is a responsibility for all and an act of acting justly as individuals, corporate bodies, and governments. The chapters in this book are an example of journalism based on tested principles of faith and of care ethics. Indeed, for robust think tanks and leaders of Africa and those nations interested in the plight of Africa, it cannot go without saying that Africa is not only a new frontier to be cared for but an emerging frontier and partner in development and innovation as the sun shines brighter across the vast lands of mother Africa.
