**Cultures of Computer Game Concerns** Estrid Sörensen,2018-05-31 The same computer games are played by youths all over the world, and worldwide games become matters of concern in relation to children: worries rise about addiction, violence, education, time, and economy. Yet, these concerns vary depending upon where they are situated: in families, legal contexts, industry or science. They also play out differently across countries and cultures. Helpful Hackers Chris van 't Hof, 2016-02-16 'Hospital leaks patient records', 'Public transport smartcard has more holes than a sieve', 'Mobile banking app unsafe' – it seems that everything can be hacked these days. Fortunately, the person who discovers a flaw is not necessarily a cybercriminal but is often someone who wants to help improve cyber security. He or she immediately contacts the system owner so that the problem can be solved. A well-coordinated approach allows everyone to learn from the exercise we call 'responsible disclosure'. The Netherlands is a world leader in responsible disclosure. The Dutch like to resolve conflicts through a process of general consultation: the famous 'polder model'. This seems a particularly appropriate approach in the realm of IT and cyber security, since there is no central authority with overall responsibility but many diverse players, each responsible for their own tiny part of a vast and complex system. In this book, we hear from the hackers, system owners, IT specialists, managers, journalists, politicians and lawyers who have been key players in a number of prominent disclosures. Their stories offer a glimpse into the mysterious world of cyber security, revealing how hackers can help us all. [www.helpfulhackers.nl](http://www.helpfulhackers.nl) Chris van 't Hof is an internet researcher and presenter with a background in sociology and electrical engineering. This is his eighth book. While a researcher at the Rathenau Institute, he authored a number of titles including Check in / Check out: the Public Space as an Internet of Things and RFID and Identity Management in Everyday Life. Hedgspeth, 2015-03-05 Shifting the discourse from a focus on academic language to the more dynamic but less researched construct of academic literacies, this volume addresses three key questions: • What constitutes academic literacy? • What does academic literacy development in adolescent multilingual students look like and how can this development be assessed? • What classroom contexts foster the development of academic literacies in multilingual adolescents? The contributing authors provide divergent definitions of academic literacies and use dissimilar theoretical and methodological approaches to study literacy development.
