The United States Social Networking Market Timo Beck,2010 Scientific Essay from the year 2009 in the subject Business economics - Company formation, Business Plans, grade: 1,0, University of St Andrews (School of Management), language: English, abstract: Only those networks, which are most innovative, and the most convenient for usage are likely to attract a critical mass of users and become successful. Such is the situation with Facebook at the moment and MySpace in the past. These social networks are the leaders in the US market, and Facebook currently leads in the competition with its unique open platform strategy - a valuable, rare and rather hard-to-imitate

resource. Some unique features and capabilities of Cyworld included the security of customers' information, the guarantee of protection from fraud, and the experience of tremendous success in Korea. Cyworld was predominantly used to manage already existing relationships its members were freer in their interactions, including commercial ones, and their privacy and identity was protected by the KBA system. The unprecedented popularity of Cyworld in South Korea where almost all young population is registered in this social network allowed stating that Cyworld is likely to perform successfully at the global level. Cyworld's unique features and capabilities, however, turned out to be tied to its domestic market and inappropriate to compete with networks such as Facebook in the US. A variety of factors such as lack of technological innovations (closed platform), the mentality of other countries' population, psychosocial issues, market saturation, and cultural barriers contributed to the failure of Cyworld in the United States social networking market.

Future Information Communication Technology and Applications Hoe-Kyung Jung, Jung Tae Kim, Tony Sahama, Chung-Huang Yang, 2013-05-25 These proceedings are based on the 2013 International Conference on Future Information & Communication Engineering (ICFICE 2013), which will be held at Shenyang in China from June 24-26, 2013. The conference is open to all over the world, and participation from Asia-Pacific region is particularly encouraged. The focus of this conference is on all technical aspects of electronics, information, and communications ICFICE-13 will provide an opportunity for

academic and industry professionals to discuss the latest issues and progress in the area of FICE. In addition, the conference will publish high quality papers which are closely related to the various theories and practical applications in FICE. Furthermore, we expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.

Mediatized Transient Migrants Claire Shinhea Lee, 2019-11-26 Mediatized Transient Migrants: Korean Visa-Status Migrants' Transnational Everyday Lives and Media Use examines the role of digital media in Korean visa-status migrants' everyday lives in terms of their senses of home, belonging, and

identity. Based on personal interviews with 40 migrants (temporary workers, academic students, and their dependents) living in Austin, Texas, Claire Shinhea Lee argues that the mundane use of homeland media brought by new media technology allows these migrants to make, connect to, and complicate home in their transnational space. Through the theoretical framework of mediatization and transnationalism, Lee links a transnational polymedia environment and emerging digital culture (cord-cutting and algorithmic culture) to interrogate mobility and migration in the globalization era. The book reveals not only the multi-positionality within the transient migration but also the gendered structure of the visa system.
