David Rothenberg, Marta Ulvaeus

Nova Samuel R. Delany, 2002-06-11 Given that the suns of Draco stretch almost sixteen light years from end to end, it stands to reason that the cost of transportation is the most important factor of the 32nd century. And since Illyrion is the element most needed for space travel, Lorq von Ray is plenty willing to fly through the core of a recently imploded sun in order to obtain seven tons of it. The potential for profit is so great that Lorq has little difficulty cobbling together an alluring crew that includes a gypsy musician and a moon-obsessed scholar interested in the ancient art of writing a novel. What the crew doesn't know, though, is that Lorq's quest is actually fueled by a private revenge so consuming that he'll stop at nothing to achieve it. In the grandest manner of speculative fiction, *Nova* is a wise and witty classic that casts a fascinating new light on some of humanity's oldest truths and enduring myths.

Writing on Water David Rothenberg, Marta Ulvaeus, 2002 Water and its multifaceted relationship to humans, as portrayed by a wide range of writers and photographers.

NoVA James Boice, 2008-12-30 Grayson Donald, seventeen years old, has just hanged himself from a basketball hoop next to a playground in Centreville, North Virginia (NoVA). The question is, Why? In this incisive dissection of the author's hometown, James Boice scratches its shiny suburban surface to reveal a place formed from a cloud that slid west and met with the humidity and spent buckshot cartridges and Civil War bones clad in blue and gray to create concrete and vinyl siding and front yards laid in chunks, child care centers and video rental places. An exciting new voice in fiction, James Boice blends sharp social observations with dark humor and remarkable prose. In both passing glimpses and

intimate interior monologues, we come to know Grayson's family, his fellow students, his neighbors, and many who knew him only slightly, if at all. A portrait of a town emerges that renders Grayson's suicide both devastating and inevitable. NoVA is a unique and fascinating depiction of the American suburb.

The Walls Around Us Nova Ren Suma, 2014-12-12 SPECIAL PREVIEW! "Ori's dead because of what happened out behind the theater, in the tunnel made out of trees. She's dead because she got sent to that place upstate, locked up with those monsters. And she got sent there because of me." *The Walls Around Us* is a ghostly story of suspense told in two voices--one still living and one long dead. On the outside, there's Violet, an eighteen-year-old dancer days away from the life of her dreams when something threatens to expose the shocking truth of her achievement. On the inside, within the walls of a girls' juvenile detention center, there's Amber, locked up for so long she can't imagine freedom. Tying these two worlds together is Orianna, who holds the key to unlocking all the girls' darkest

mysteries. We hear Amber's story and Violet's, and through them Orianna's, first from one angle, then from another, until gradually we begin to get the whole picture--which is not necessarily the one that either Amber or Violet wants us to see. Nova Ren Suma tells a supernatural tale of guilt and innocence, and what happens when one is mistaken for the other. Praise for *Imaginary Girls*: "A surreal and dreamy world where magical thinking is carried to a chilling extreme." —Publishers Weekly, starred review Praise for *17 & Gone*: "Suma's exquisite sentence-level writing and fine eye for creepy detail are in abundant evidence." —Kirkus Reviews

Caring for the Newborn Donald E. Greydanus, 2021 This book summarizes the state of cognoscibility regarding normal newborn care that has been accumulated over the past centuries, especially the 20th and now 21st century. The preface/introduction details historical concepts that have followed newborns over the millennia of Homo sapiens sapiens' existence, such as infanticide, breast feeding, swaddling, neonatal resuscitation, and principles of caring for newborns. The mortality rate of newborns has been reduced in many parts of the world in the past two centuries, and we have learned much about how to keep increasing numbers of newborns alive and healthy. This is especially seen when healthcare providers and society collaborate in this important endeavor that includes emphasizing known preventive principles. Current modern pediatric and perinatal treatments allow newborns in the current 21st century America to have a start on an overall life expectancy of 78.5 years (up to 76 years in males and 80.9 years in females) if they receive meticulous medical care, and even if they are born into a penurious state. Such deserved care and inevitable medical discoveries will only lengthen these life

trajectories. This second edition updates principles of caring for the newborn that were identified in the first edition. It considers the newborn examination, newborn screening, safe-sleep concepts, mother and newborn skin-to-skin contact, effects of prenatal drug use, mental health issues in the newborn, maternal mood disorders, infant feeding, circumcision, anticipatory guidance, and concepts of surgery in the newborn. Also considered are selective disorders found in some newborns that includes newborn neurology, cardiology, pulmonology, nephrology, gastroenterology, endocrinology and dermatology--

Nova the Star Eater Lindsay Leslie, 2019-05-21 Nova has a big appetite for stars, so when she decides to gobble up Earth's Sun, panic erupts around the globe. Earth needs its Sun to survive! How will it get it back from Nova? One bright little girl just might have a solution. Sparkling with humor and interstellar adventure, this story showcases creative problem-solving and a subtle reminder to not eat someone else's food—or stars—without asking first. Expressive illustrations add excitement and silliness to Earth's predicament, while a mix of the fantastical and factual provides a fun way to learn just how important our Sun is. A laugh-out-loud space adventure full of gas...and heart.

The Composition of Kepler's Astronomia Nova James R. Voelkel, 2001-11-18 This is one of the most important studies in decades on Johannes Kepler, among the towering figures in the history of astronomy. Drawing extensively on Kepler's correspondence and manuscripts, James Voelkel reveals that the strikingly unusual style of Kepler's magnum opus, *Astronomia nova* (1609), has been traditionally misinterpreted. Kepler laid forth the first two of his three laws of planetary motion in this work. Instead of a straightforward presentation of his results, however, he led readers on a wild goose chase, recounting the

many errors and false starts he had experienced. This had long been deemed a "confessional" mirror of the daunting technical obstacles Kepler faced. As Voelkel amply demonstrates, it is not. Voelkel argues that Kepler's style can be understood only in the context of the circumstances in which the book was written. Starting with Kepler's earliest writings, he traces the development of the astronomer's ideas of how the planets were moved by a force from the sun and how this could be expressed mathematically. And he shows how Kepler's once broader research program was diverted to a detailed examination of the motion of Mars. Above all, Voelkel shows that Kepler was well aware of the harsh reception his work would receive--both from Tycho Brahe's heirs and from contemporary astronomers; and how this led him to an avowedly rhetorical pseudo-historical presentation of his results. In treating Kepler at last as a figure in time and not as independent of it, this work will be welcomed by historians of science, astronomers, and historians.

Wetware Craig Nova, 2003-04-08 As a programmer for Galapagos Wetware, Hal Briggs is responsible for writing the genetic code for simple, efficient creatures to be employed in menial jobs--sweeping streets or washing dishes. But the demands for "wetware" are changing, and Briggs is given a project that calls for more sophisticated models: clients are demanding more human appearance and behavior. As the project progresses, Briggs finds himself endowing the new models with more than the specifications dictate, giving them distinct personalities and talents and highly developed acumens. When two of his pet projects, Jack and Kay, escape, Briggs reexamines their codes and makes a terrifying yet provocative discovery. From Craig Nova, a master of the modern novel, comes a tale eerie in its vision of a future not far off, of a world precariously close to today's.

Girl Gone Nova Pauline Baird Jones,Ana Baird,2014-02-22 Best book (Long and Short Reviews); SingleTitles Reviewers' Choice Award; TwoLips Recommended ReadEpic Book

Award - Best Science Fiction Romance A science fiction/action adventure romance novel Doc—Delilah Oliver Clementyne's—orders are simple: do the impossible and do it yesterday. A genius/bad ass, she does the impossible on a regular basis. But this time the impossible is complicated by an imminent war between the Earth expedition to the Garradian Galaxy and the Gadi, an encounter with some wife-hunting aliens, and not one but two bands of time travelers. The only way it could get worse? If the heart she didn't know she had starts beating for the wrong guy... Praise for *Girl Gone Nova*: "I love the adventure, the alien setting, the action and the humor of these stories. Pauline sets up a believable time travel scenario with all the paradoxes that should be expected. The characters are rich and likable; even the pirate, bad boy Vidor, has engaging qualities. The writing has a wonderful fast pace that fits the tale. This can be read alone but it works much better if you read *The Key* first.: Reviews by Martha's Bookshelf "Pauline Baird Jones has been one of my favorite authors since I read her Eppie award-winning *Out of Time*, a World War II time travel that truly captured the flavor of that wartime era. I also read *The Key*, the exciting prequel to *Girl Gone Nova*, and this book blows them both away. Like its predecessor, *Girl Gone Nova* is set in the present day. With all its twists and turns – enough to rival a West Virginia highway – *Girl Gone Nova* is one of the most wildly unbelievable, yet believable books I've ever read. It's simply one of the best sci-fi romances ever written." Two Lips Reviews, Five Lips! "Girl Gone Nova is an action-filled science fiction treat! Stuffed full of intrigue, time-traveling, wisecracks and every girl's dream of love and happily-ever-after, it's a sure-fire hit with any lover of the genre. Ms. Jones has a talent for bringing unusual characters forth and making them seem like 'one of the guys', it's a talent you're

sure to remember for a long time to come, as is her amazing novel, *Girl Gone Nova*.” Long and Short Romance Reviews “After a multiyear absence, Baird Jones makes a very welcome return by once again visiting the alternate reality first explored in *The Key*. Time paradoxes run amok in this extraordinarily complex tale. Amongst the densely packed and mind-bending action, there's also some welcome humor. A spectacular ride!” Romantic Times Magazine

A Room Away From the Wolves Nova Ren Suma, 2018-09-04 A critically-acclaimed, spellbinding ghost story set in a refuge for troubled girls deep in the heart of New York City, from the New York Times bestselling author of *The Walls Around Us*.
