A Theory of Semiotics Umberto Eco, 1979 . . . the greatest contribution to [semiotics] since the pioneering work of C. S. Peirce and Charles Morris. —Journal of Aesthetics and Art Criticism . . . draws on philosophy, linguistics, sociology, anthropology and aesthetics and refers to a wide range of scholarship . . . raises many fascinating questions. —Language in Society . . . a major contribution to the field of semiotic studies. —Robert Scholes, Journal of Aesthetics and Art Criticism . . . the most significant text on the subject published in the English language that I know of. —Arthur Asa Berger,

Journal of Communication Eco's treatment demonstrates his mastery of the field of semiotics. It focuses on the twin problems of the doctrine of signs—communication and signification—and offers a highly original theory of sign production, including a carefully wrought typology of signs and modes of production.

The Seven Wonders of the Ancient World Peter A. Clayton,Martin Price,1988 First published in 1988. Can you name the Seven Wonders of the Ancient World? Did they even exist? The Pharos at Alexandria survived into the Middle Ages, but the Hanging Gardens of Babylon exist only in references by ancient authors and the Colossus of Rhodes if too improbable to have existed in the

form and place traditionally ascribed to it. The Seven Wonders of the Ancient World sets the record straight, with an attractive account of each Wonder in the context in which it was built. The authors combine ancient sources with the results of modern scholarship and excavations to recreate a vivid picture of the Seven Wonders. All experts in their specialist fields, the contributors bring together facts and background that are remarkably difficult to find from any other single source and establish for the first time the archaeology and location of each Wonder.
