Offline Donna Cooner, 2020-09-01 In this e-book original, acclaimed author Donna Cooner spins a timely and gripping story of how we live our lives on -- and off -- social media. Annie Webb is constantly online. She loves following influencer accounts, DM'ing with her two best friends, Luna and Caitlin, and posting selfies with her adorable boyfriend, Jameson. Then Jameson breaks up with Annie - online. The public humiliation is immediate and intense, and Annie is overwhelmed by the cruel comments that pour in. To help Annie cope, Luna and Caitlin make a plan: the three of them will stay off social media for a month. No posting. No scrolling. No cheating. But unplugging is much harder than they thought. And when the rest of their school finds out about their offline challenge, can the three girls keep their vow -- and their friendship?

America Offline William H Weber, 2020-03-02 A devastating cyber-attack. A deadly winter storm. And a lone man who will stop at nothing to save his family. The largest snowstorm in a hundred years is barreling down on the northern United States. When it hits it will bring over a meter of snow and numbing arctic winds. Some are prepared. Most are not. But something infinitely more dangerous is also on its way - a multi-pronged cyber-attack that will destroy the power grid, crippling the country at the worst possible moment. Like millions of others, ex-cop Nate Bauer and his family are bracing for the coming storm, unaware that it will test them in ways they could never have imagined. For hidden deep within the malignant code lies an even greater threat. One that holds the potential to destroy America forever. In the end, only a single question will matter. When the lights go out for good, who will have what it takes to survive?

The Second Offline Hidenori Tomita, 2021-09-01 This book presents current research on mobile Internet society. Past research was not able to show a clear analytical framework, thus was unable to close in on the fundamental changes in that society. This book, however, analyzes mobile Internet society by introducing the concept of "doubling of time and place" and the analytical framework of the "second offline." The emergence of the smartphone has made Internet use easier, and now, people are constantly using online information in the midst of their daily lives. Our society is transitioning from the first offline society, a society without being connected to Internet, to the second offline society, where users are connected to the Internet at all times. In this second offline society, our sense of time and place are beginning to change. Broadcast and communication media have made possible the overlapping of different places, which has been called the doubling of place. Furthermore, virtual reality (VR) and augmented reality (AR) technologies have enabled the overlap of different times, which this book calls the doubling of time. The smartphone makes both possible. With the second offline and the doubling of time and place as keywords, the book takes into consideration research that includes, among other topics, the media usage of young adults, selfies, education, social media usage, mobile games, work stations, and consumer activity in the mobile Internet society.

Online and Offline Modulators of Motor Learning Shahabeddin Vahdat,Ovidiu Lungu,Bradley King,Geneviève Albouy,Julien Doyon,2017-05-25 Both the acquisition of new and the modification of previously acquired motor skills are necessary to achieve optimal levels of motor performance in everyday functioning as well as to attain expert performance levels that are evident in sports and arts. A multitude of factors have been shown to influence the various stages of the learning process, from the acquisition (i.e., motor memory encoding) to the consolidation and subsequent retention of a skill. These factors, or modulators, can affect learning through online processes taking place during practice of a new motor skill or through offline processes occurring in the absence of task performance (i.e., after training sessions). Although much of the recent research from various disciplines has placed an increased emphasis on identifying factors that can influence the motor learning process, we lack an integrated understanding of online and offline determinants of motor skill behaviours. Potential motor learning modulators include, but are certainly not limited to, stress, anxiety, attention, executive functioning, social interaction, stimulus-response mapping, training schedule/regimen, learning environment, vigilance/consciousness states including sleep, wakefulness or meditation, brain stimulation, interference as well as resting state brain connectivity. Pathological and non-pathological (i.e., development or aging) changes in the brain can also be conceptualized as potential modulators. The aim of this Research Topic is to bridge research from the cognitive, sensory, motor and psychological domains using various behavioural paradigms and neuroimaging techniques in order to provide a comprehensive view of the online and offline modulators of motor learning, and how they interact to influence motor performance. Critically, the overarching goal is to gain a better understanding of how motor behaviour can be optimized. We believe that merging research from diverse neuroscientific communities would contribute to fulfilling this goal and potentially highlight possible shared neurophysiological mechanisms influencing motor learning.

Offline First Web Development Daniel Sauble,2015-11-20 Design and implement a robust offline app experience using Sencha Touch and PouchDB About This Book Understand the design principles behind a well-designed offline experience Create the illusion of being online when you're really offline Use common libraries such as Sencha Touch and PouchDB to enhance the offline experience of mobile apps Who This Book Is For Do you want to make your app experience more robust and delightful? Are you eager to write apps that cater to a wider audience, not just the Silicon Valley crowd? Do you need to persuade your peers that offline-first is a worthwhile development paradigm? If your answer to all or any one of these questions is yes, then this is the book is for you. Some previous coding and command-line experience would be useful, but is not required. What You Will Learn Design the

behavior of the app, taking offline, online, and the transition between those two states into account Seamlessly implement the offline/online experience that you've designed using Sencha Touch and PouchDB Show the user what's happening under the hood with online/offline indicators and Good Mobile Messaging Employ various strategies to cope with unreliable network conditions Help the user resolve conflicts related to the “split-brain” problem Choose intelligent defaults based on usage of the app Use point-to-point networking to partially overcome a lack of Internet connectivity In Detail When building mobile apps, it's easy to forget about the moments when your users lack a good Internet connection. Put your phone in airplane mode, open a few popular apps, and you'll quickly see how they handle being offline. From Twitter to Pinterest to Apple Maps, some apps might handle being offline better—but very few do it well. A poor offline experience will result in frustrated users who will abandon your app, or worse, turn to your competitor's apps! Expert or novice, this book will teach you everything you need to know about designing and building a rigorous offline app experience. By putting the offline experience first, you'll have a solid foundation to build upon, avoiding the unnecessary stress and frustration of trying to retrofit offline capabilities into your finished app. This basic principle, designing for the worst-case scenario, could save you countless hours of wasted effort. Style and approach This book adopts an iterative approach to designing and building a mobile app, where each chapter builds on the one before, resulting in a fully-functional app that demonstrates the concepts taught, each one of which is explained through the use of an example.

The Link between Specific Forms of Online and Offline Victimization Shelly L.

Clevenger, Catherine D. Marcum, 2023-09-06 This book features the empirical work of internationally known scholars, providing an in-depth examination of the overlap between online and offline victimization and offending. The vast expanse of the Internet has provided a limitless playground for offenders to prey on those unaware of their predators, or well as those who are intimately familiar with their offenders. However, the Internet does not isolate offenders into mutually exclusive categories. Instead, it has allowed many offenders to use both offline and online platforms to commit crime. It also opened up more opportunity for violation of victims. This volume features two divisions of the American Society of Criminology, the Division of Victimology and Division of Cybercrime, who have joined forces to sponsor a special issue on the overlap between forms of online and offline victimization and offending. International scholars in this book provide a notable spectrum of different forms of this phenomenon, as well as predictors of these behaviors. The Link between Specific Forms of Online and Offline Victimization will be a key resource for academics, researchers, and advanced students of Victimology, Cybercrime, Criminology and Criminal Justice. The chapters included in this book were originally published in Victims & Offenders.

Hybrid Offline/Online Methods for Optimization Under Uncertainty A. De

Filippo, 2022-04-12 Balancing the solution-quality/time trade-off and optimizing problems which feature offline and online phases can deliver significant improvements in efficiency and budget control. Offline/online integration yields benefits by achieving high quality solutions while reducing online computation time. This book considers multi-stage optimization problems under uncertainty and proposes various methods that have broad applicability. Due to the complexity of the task, the most popular approaches depend on the temporal granularity of the decisions to be made and are, in general, sampling-based methods and heuristics. Long-term strategic decisions that may have a major impact are typically solved using these more accurate, but expensive, sampling-based approaches. Short-term operational decisions often need to be made over multiple steps within a short time frame and are commonly addressed via polynomial-time heuristics, with the more advanced sampling-based methods only being applicable if their computational cost can be carefully managed. Despite being strongly interconnected, these 2 phases are typically solved in isolation. In the first part of the book, general methods based on a tighter integration between the two phases are proposed and their applicability explored, and these may lead to significant improvements. The second part of the book focuses on how to manage the cost/quality trade-off of online stochastic anticipatory algorithms, taking advantage of some offline information. All the methods proposed here

provide multiple options to balance the quality/time trade-off in optimization problems that involve offline and online phases, and are suitable for a variety of practical application scenarios.

The studies address three major strands of human identity, each of which can be thought of as an aggregative abstraction with its own complexities: personal identity, group identity and collective identity. The contributions pay special attention to the interplay between the public and private dimensions of the interactions and audiences, as well as the potential impact of social and technical affordances of different communicative settings and online and offline modes of identity construction.
