**Pad** Matt Maranian,2000-05 You have a futon left over from college, some dingy end tables that Aunt Miller left you, and an apartment whose carpeting dates back to the Me Decade. The decorating magazines and TV shows never seem to talk to you. So what? With some attitude, know-how, and a lot of your own style, your place can be transformed into a fabulous Shangri-La, a swanky venue fit for living and entertaining well. Pad: The Guide to Ultra-Living is filled to bursting with hip, affordable projects for every room in the house and shows how to use basics like lighting, plants, mirrors, and paint to enhance even problem areas. Numerous testimonials from real people with real living spaces demonstrate how a little spaces demonstrate how a little spunk and individuality can overcome the limitations of the average urban dwelling. Offering a complete lifestyle package, Pad has instructions for building your own home bar, ideas for party themes and recipes--and even collateral hangover cures! This total living guide will have your place all spruced up--and the envy of guests--in no time.

**Peripheral Artery Disease (PAD)** Neeraj N. Shah,2016 This is a concise summary of information on the incidence, diagnosis, classification and non-surgical treatment of peripheral artery disease (PAD). PAD imposes a significant burden on health care system. Patients suffering from PAD have leg pains, difficulty walking, and lower extremity ulcers. If untreated, this condition can result in limb loss. It is both a life and a limb-threatening condition. It is important to recognise this condition early on, even in the absence of symptoms, in order to provide the best possible therapy in a timely manner. Early and aggressive treatment of PAD is crucial for limb salvage. The surgical therapeutic options for PAD are well-known and described in the literature; however, the information on medical and other non-surgical options for PAD is scattered and not well-summarised. In this book, the authors have attempted to assimilate and summarise in one place all the available information regarding the epidemiology of PAD, clinical features of the disease, clinical and anatomical classification of PAD, medications used to treat PAD, role of fish oil supplementation in PAD and the endovascular therapeutic options for PAD. The authors have summarised the latest available endovascular interventional strategies for the management of aortoiliac, femoropopliteal as well as infrapopliteal PAD. Peripheral vascular intervention is an exciting and ever-changing field, and the authors have attempted to synthesise information from all the major and relevant studies in this field. The authors hope that their book serves as a valuable reference resource for clinicians who are actively involved in the management of patients suffering from PAD, including primary care physicians, cardiologists, vascular surgeons, and cardiovascular fellows in training.
