Papyrus Irene Vallejo,2022-10-18 A rich exploration of the importance of books and libraries in the ancient world that highlights how humanity’s obsession with the printed word has echoed throughout the ages • “Accessible and entertaining.” —The Wall Street Journal Long before books were mass-produced, scrolls hand copied on reeds pulled from the Nile were the treasures of the ancient world. Emperors and Pharaohs were so determined to possess them that they dispatched emissaries to the edges of earth to bring them back. When Mark Antony wanted to impress Cleopatra, he knew that gold and priceless jewels would mean nothing to her. So, what did he give her? Books for her library—two hundred thousand, in fact. The long and eventful history of the written word shows that books have always been and will always be a precious—and precarious—vehicle for civilization. Papyrus is the story of the book’s journey from oral tradition to scrolls to codices, and how that transition laid the very foundation of Western culture. Award-winning author Irene Vallejo evokes the great mosaic of literature in the ancient world from Greece’s itinerant bards to Rome’s multimillionaire philosophers, from opportunistic forgers to cruel teachers, erudite librarians to defiant women, all the while illuminating how ancient ideas about education, censorship, authority, and identity still resonate today. Crucially, Vallejo also draws connections to our own time, from the library in war-torn Sarajevo to Oxford’s underground labyrinth, underscoring how words have persisted as our most valuable creations. Through nimble interpretations of the classics, playful and moving anecdotes about her own encounters with the written word, and fascinating stories from history, Vallejo weaves a marvelous tapestry of Western culture’s foundations and identifies the humanist values that helped make us who we are today. At its heart a spirited love letter to language itself, Papyrus takes readers on a journey across the centuries to discover how a simple reed grown along the banks of the Nile would give birth to a rich and cherished culture.

The Papyrus Anastasi I and the Papyrus Koller together with the parallel texts. 1911 Alan Henderson Gardiner,1911

Papyrus R. B. Parkinson,Stephen Quirke,Ute Wartenberg,1995 One of the most remarkable inventions of ancient Egypt was the making of paper from the papyrus plant. As early as 3000 BC sheets and rolls of papyrus provided an ideal surface for writing with reed pen and cakes of carbon black and red ochre pigment. Egyptian scribes used papyrus for administrative records, legal documents and letters of business and personal life. Equally important for our understanding of ancient Egypt, papyrus was used to record literary texts as well as compendia of knowledge such as the famous Rhind mathematical papyrus. Religious hymns and litanies are recorded, as are the great collections of formulae to secure life after death, the Book of the Dead.

Discarded, Discovered, Collected Arthur Verhoogt,2017-10-05 Discarded, Discovered, Collected provides an accessible introduction to the University of Michigan’s collection of papyri and related ancient materials, the widest and deepest resource of its kind in the Western hemisphere. The collection was founded in the early part of the 20th century by University of Michigan Professor of Classics Francis W. Kelsey. His original intention was to create a set of artifacts that would be useful in teaching students more directly about the ancient world, at a time when trips to ancient sites were much harder to arrange. Jointly administered by Michigan’s Department of Classical Studies and its Library, the collection has garnered significant interest beyond scholarly circles and now sees several hundred visitors each year. Of particular note among its holdings are sixty pages of the earliest known copy of the Epistles of St. Paul, which are often featured on tours of the collection by groups from religious institutions. Arthur Verhoogt, one of the current stewards of the Papyrology Collection, provides clear, insightful information in an appealing style to engage general readers and scholars alike. Extensively illustrated with some of the collection’s more spectacular pieces, this volume describes what the collection is, what kinds of ancient texts it contains, and how it has developed from Francis Kelsey’s day to the present. Verhoogt describes in detail how people who study papyri carry out their work, and how papyri contribute to our understanding of various aspects of the ancient Greco-Roman world. Translations of the ancient texts are presented so that the reader can experience some of the excitement that comes with reading original documents from many centuries ago.

The Derveni Papyrus Marco Antonio Santamaría Álvarez,2018-11-26 The Derveni Papyrus: Unearthing Ancient Mysteries collects several articles on the Derveni Papyrus addressing its Orphic poem and the religious and philosophical ideas of the anonymous author of the text.

The Egyptian Book of the Dead E. A. Wallis Budge,2010-01-01 The Book of the Dead: The Papyrus of Ani is the Book of the Dead for Ani, the scribe from Thebes, and is the largest, the most perfect, the best preserved, and the best illuminated of all the papyri, according to editor and translator E.A. Wallis Budge. Books of the Dead were ancient Egyptian funeral texts, employed from around 1550 B.C. to 50 B.C., intended to help the dead pass through the underworld into the afterlife with magic spells and inscriptions which were written on papyrus scrolls and placed in the coffin.

The Papyrus of Ani is a key scroll in understanding Egyptian Books of the Dead, and this text is ideal for those interested in the early discovery and translation of Egyptian hieroglyphics. This is the original 1895 edition and includes the full version of The Papyrus of Ani. SIR ERNEST ALFRED THOMPSON WALLIS BUDGE (1857-1934) was born in Bodmin, Cornwall in the UK and discovered an interest in languages at a very early age. Budge spent all his free time learning and discovering Semitic languages, including Assyrian, Syriac, and Hebrew. Eventually, through a close contact, he was able to acquire a job working with Egyptian and Iraqi artifacts at the British Museum. Budge excavated and deciphered numerous cuneiform and hieroglyphic documents, contributing vastly to the museum's collection. Eventually, he became the Keeper of his department, specializing in Egyptology. Budge wrote many books during his lifetime, most specializing in Egyptian life, religion, and language.

Papyrus: The Plant that Changed the World: From Ancient Egypt to Today's Water Wars John Gaudet,2014-06-15 At the center of the most vital human-plant relationship in history, Papyrus evokes the mysteries of the ancient world while holding the key to the world's wetlands and atmospheric stability. From ancient Pharaohs to twenty-first century water wars, papyrus is a unique plant that is still one of the fastest growing plant species on earth. It produces its own "soil"—a peaty, matrix that floats on water—and its stems inspired the fluted columns of the ancient Greeks. In ancient Egypt, the papyrus bounty from the Nile delta provided not just paper for record keeping—instrumental to the development of civilization—but food, fuel and boats. Disastrous weather in the sixth century caused famines and plagues that almost wiped out civilization in the west, but it was papyrus paper in scrolls and codices that kept the record of our early days and allowed the thread of history to remain unbroken. The sworn enemy of oblivion and the guardian of our immortality, it came to our rescue then and will again. Today, it is not just a curious relic of our ancient past, but a rescuing force for modern ecological and societal blight.

Papyrus John Gaudet,2015-05-15 From ancient Pharaohs to 21st Century water wars, papyrus is a unique plant that is now the fastest growing plant species on earth. It produces its own "soil"—a peaty, matrix that floats on water—and inspired the fluted columns of the ancient Greeks. In ancient Egypt, the papyrus bounty from the Nile delta provided not just paper for record keeping—instrumental to the development of civilization—but food, fuel and boats. Disastrous weather in the 6th Century caused famines and plagues that almost to wipe out civilization in the west, but it was papyrus to the rescue. Today, it is not just a curious relic of our ancient past, but a rescuing force for modern ecological and societal blight. In an ironic twist, Egypt is faced with enormous pollution loads that forces them to import food supplies, and yet papyrus is one of the most effective and efficient natural pollution filters known to man. Papyrus was the key in stemming the devastation to the Sea of Galilee and Jordan River from raging peat fires (that last for years), and the papyrus laden shores of Lake Victoria—which provides water to more than 30 million people—will be crucial as the global drying of the climate continues.

The Fragments of the Hieratic Papyrus at Turin Sir John Gardner Wilkinson,1851

Studies on the Derveni Papyrus, Volume II Glenn W. Most,2022-09-30 Studies on the Derveni Papyrus, volume II brings together two new editions of the first fragmentarily extant columns of the Derveni Papyrus and seven scholarly articles devoted to their interpretation. The Derveni Papyrus is by far the most important textual discovery of the 20th century regarding early Greek philosophy, religion, exegetical theory and practice, linguistic ideas, and a host of other areas and issues. But the editorial and interpretative history of this extraordinary document has been very checkered. While the interpretation of the better preserved later columns is still highly controversial in many regards, at least the text of those columns has by and large found a scholarly consensus; but the editorial and interpretative situation with the worse preserved first columns is quite different. This volume offers not one but two editions of the first columns, by Richard Janko and by Valeria Piano, given that it is not currently possible to agree upon a single edition; and it explains clearly and in detail the papyrological problems and doubts that lead to these two editions, making it possible for readers (even non-papyrologists) to form their own informed judgment about the most likely readings to be adopted. Furthermore, it contains a number of articles by leading scholars on the Derveni Papyrus, above all offering original solutions to the question of the relation between the earlier and the later columns, but also providing analysis and interpretation of other, related problems.

The Mortuary Papyrus of Padikakem Yekaterina Barbash,2011-12-31 This new study is the first translation of the papyrus of Padikakem, with an extensive commentary. The complete early Ptolemaic manuscript from the Walters Art Museum contains two uncommon texts in hieratic. The initial text, a Ritual of Introducing the Multitude on the Last Day of Tekh, is identified as a temple liturgy by its rubric title, while its themes recall love poetry and the Lamentations of Isis and Nephthys. The second text, a rarely attested Book III of glorification spells (sakhw) has an exclusively mortuary character. The spells of this section largely originate in the Pyramid Texts and include specific instructions for recitation by the lector priest. The two texts are established as a coherent composition that belongs to the Greco-Roman tradition of merging Egyptian funerary practices with temple liturgies. The diverse sources and themes of the texts shed light on the evolution of Osirian and mortuary theologies from the Old Kingdom onwards. The study also thoroughly examines the development of grammar and paleography among the parallels.
