**Parenting** Paul David Tripp, 2016-09-14 Winner of the ECPA Book of the Year Award for Christian Living What is your calling as a parent? In the midst of folding laundry, coordinating carpool schedules, and breaking up fights, many parents get lost. Feeling pressure to do everything “right” and raise up “good” children, it’s easy to lose sight of our ultimate purpose as parents in the quest for practical tips and guaranteed formulas. In this life-giving book, Paul Tripp offers parents much more than a to-do list. Instead, he presents us with a big-picture view of God’s plan for us as parents. Outlining fourteen foundational principles centered on the gospel, he shows that we need more than the latest parenting strategy or list of techniques. Rather, we need the rescuing grace of God—grace that has the power to shape how we view everything we do as parents. Freed from the burden of trying to manufacture life-change in our children’s hearts, we can embrace a grand perspective of parenting overflowing with vision, purpose, and joy.

The Attachment Parenting Book William Sears, Martha Sears, 2001-09-01 America's foremost baby and childcare experts, William Sears M.D. and

Martha Sears, R.N., explain the benefits -- for both you and your child -- of connecting with your baby early. Would you and your baby both sleep better if you shared a bed? How old is too old for breastfeeding? What is a father's role in nurturing a newborn? How does early attachment foster a child's eventual independence? Dr. Bill and Martha Sears -- the doctor-and-nurse, husband-and-wife team who coined the term attachment parenting -- answer these and many more questions in this practical, inspiring guide. Attachment parenting is a style of parenting that encourages a strong early attachment, and advocates parental responsiveness to babies' dependency needs. The Attachment Parenting Book clearly explains the six Baby B's that form the basis of this popular parenting style: Bonding, Breastfeeding, Babywearing, Bedding close to baby, Belief in the language value of baby's cry, and Beware of baby trainers. Here's all the information you need to achieve your most important goals as a new parent: to know your child, to help your child feel right, and to enjoy parenting.

**Unconditional Parenting** Alfie Kohn, 2006-03-28 The author of *Punished by Rewards* and *The School Our Children Deserve* builds on his parenting theories of working with children rather than trying to control them, argues against practices that teach children that they must earn a parent's approval, and presents techniques that promote desired child qualities through unconditional

support. Reprint. 30,000 first printing.

*Parenting Matters* National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and

targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**The Collapse of Parenting** Leonard Sax, 2015-12-29 In this New York Times bestseller, one of America's premier child psychologists offers a must-read account of the dismal state of parenting today, and a vision for how we can better prepare our children for the challenges of the adult world In *The Collapse of Parenting*, internationally acclaimed author Leonard Sax argues that rising levels of obesity, depression, and anxiety among young people can be traced to parents abdicating their authority. The result is children who have no standard of right and wrong, who lack discipline, and who look to their peers and the Internet for direction. Sax shows how parents must reassert their authority - by limiting time with screens, by encouraging better habits at the dinner table, and by teaching humility and perspective - to renew their relationships with their children. Drawing on nearly thirty years of experience as a family physician and psychologist, along with hundreds of interviews with children, parents, and teachers, Sax offers a blueprint parents can use to help their children thrive in an increasingly complicated world.

*Contemporary Parenting* Guerda Nicolas, Anabel Bejarano, Debbiesiu L. Lee, 2015-10-05 Through a global, multidisciplinary perspective, this book describes how four factors influence parenting practices: a country's historical and political background, the parent's educational history, the economy and the parent's financial standing, and advances in technology. Case studies that

illustrate the impact these four factors have on parents in various regions help us better understand parenting in today's global, interconnected world. Descriptions of parenting practices in countries from Europe, North and South America, Africa, Asia, and the Caribbean give readers a contemporary perspective. Both research and clinical implications when working with families from various cultures are integrated throughout. Part I reviews the four major factors that shape parenting practices. Part II features cases written by contributors with extensive experience in parenting practice and research that bring to life the ways in which these four factors influence parenting within their region. Each chapter in Part II follows the same format to provide consistency for comparative purposes: an introduction, historical and political, economic, educational, and societal factors and parenting practices, and a conclusion. Each case reviews: Historical and political factors such as slavery, war, and natural disasters and how these factors impact cultural beliefs, parenting behaviors, and a child's development Economic factors which impact the capacity for consistent, involved parenting which can result in low IQ, behavioral problems, depression, and domestic conflict and the need to account for financial factors when developing intervention programs Educational levels impact on parenting practices and their children's achievements Advances in technology and its impact on parenting practices. Intended for graduate or advanced undergraduate courses in families in global context, immigrant families, family or public policy, multiculturalism or cross-cultural psychology, social or cultural development, counseling, social work, or international development taught in human development and family studies, psychology, social work, sociology, anthropology, racial studies, and

international relations, this book also appeals to practitioners and researchers interested in family studies and child development and policy and program managers of governments, NGOs, and mental health agencies.

*The Problem with Parenting* Nancy A.

McDermott, 2020-08-24 *The Problem with Parenting* serves as an essential guide to the recent origins and current excesses of American parenting for students, parents, and policy makers interested in the changing role of the family in childrearing. Family scholarship focuses predominately on the evolution of family structure and function, with only passing references to parenting. Researchers who study parenting, however, invariably regard it as a sociological phenomenon with complex motivations rooted in such factors as class, economic instability, and new technologies. This book examines the relationship between changes to the family and the emergence of parenting, defined here as a specific mode of childrearing. It shows how, beginning in the 1970s, the family was transformed from a social unit that functioned as the primary institution for raising children into a vehicle for the nurturing and fulfillment of the self. The book pays special attention to socialization and describes how the change in our understanding of parenthood—from a state of being into the distinct activity of parenting—is indicative of a disruption of our ability to transfer key cultural values and norms from one generation to the next.
