Home by Novogratz Cortney Novogratz, Robert Novogratz, 2012-10-09 Get the Novogratz look In this book, design duo Robert and Cortney Novogratz (stars of HGTV's Home by Novogratz) give us an inside look at twenty of their favorite projects to show us how to achieve their signature vintage modern style. See how they effortlessly mix contemporary furniture with thrift-store finds, and learn all sorts of tricks for creating a stylish home no matter what the obstacles: seven children, small spaces, or a tiny budget. From toddler-friendly bedroom for triplets to a beach retreat for two twenty-somethings, from a New Jersey basement to a Palm Beach cabana, Home by Novogratz proves that good design is just a book away.

Do Photo Andrew Paynter, 2020 In a world where everyone is a photographer now, how do you stand out? The answer can be found in this simple but profound book. It will train your eye to see what others don't. -- David Hieatt This isn't a book about how to take the best pictures. It's not even about the technical aspects of photography or how to make it as a photographer. In fact, it argues that you should take fewer photographs. By sharing 10 practices honed over a lifetime spent behind the lens working with clients such as Adidas, Levi Strauss, and Apple, photographer Andrew Paynter encourages you to develop a more considered approach to photography so that you craft pictures with care. Do Photo teaches novice, intermediate and advanced photographers - and everyone in between - how to use their cameras to really connect with subjects, create memorable and more impactful photographs, and to enjoy the process along the way. And guess what? It all starts before you even pick up the camera.

Photo Archives and the Idea of Nation Costanza Caraffa, Tiziana Serena, 2014-12-16 The question of the (photographic) construction and representation of national identity is not limited to the 'long 19th century', but is a current issue in the post-colonial, post-global, digital world. The essays by international contributors aim at studying the relationship between photographic archives and the idea of nation, yet without focusing on single symbolic icons and instead considering the wider archival and sedimental dimension.

PHOTO ART THERAPY Jerry L. Fryear, Irene E. Corbit, 1992-01-01 PHOTO ART THERAPY: A JUNGIAN PERSPECTIVE illuminates and guides the reader through new possibilities for art therapy practice, approached by the authors as a creative interaction with different artistic media and therapeutic methods. Although the book is based on Jungian theory and practice, the authors carefully explore cooperation with other therapeutic perspectives, all of which are in keeping with Jung's belief in transcendent universals and multifaceted therapeutic practices. The book is divided into four sections: Self-Understanding, Alleviating Distress and Symptoms, Group Therapy, and Discussion. Wherever possible and practical, photo art therapy work done by clients as illustrations of the concepts is included. The text not only demonstrates innovative ways of combining artistic media but allows clients to articulate the inner workings of the therapeutic process through an engaging series of dialogues and narrations. The book establishes a twofold landmark in elucidating art therapy's close and vital connections to both phototherapy and the discipline of Jungian psychotherapy.

Photographs Objects Histories Elizabeth Edwards,Janice Hart,2004-06 This innovative volume explores the idea that while photographs are images, they are also objects, and this materiality is integral to their meaning and use. The case studies presented focus on photographs active in different institutional, political, religious and domestic spheres, where physical properties, the nature of their use and the cultural formations in which they function make their 'objectness' central to how we should understand them. The book's contributions are drawn from disciplines including the history of photography, visual anthropology and art history, with case studies from a range of countries such as the Netherlands, North America, Australia, Japan, Romania and Tibet. Each shows the methodological strategies they have developed in order to fully exploit the idea of the materiality of photographic images.
