

Pilot

David J. Shayler, Colin Burgess

Ask the Pilot Patrick Smith, 2004 Though we routinely take to the air, for many of us flying remains a mystery. Few of us understand the how and why of jetting from New York to London in six hours. How does a plane stay in the air? Can turbulence bring it down? What is windshear? How good are the security checks? Patrick Smith, an airline pilot and author of Salon.com's popular column, *Ask the Pilot*, unravels the secrets and tells you all there is to know about the strange and fascinating world of commercial flight. He offers: A nuts and bolts explanation of how planes fly Insights into safety and security Straight talk about turbulence, air traffic control, windshear, and crashes The history, color, and controversy of the world's airlines The awe and oddity of being a pilot The poetry and drama of airplanes, airports, and traveling abroad In a series of frank, often funny explanations and essays, Smith speaks eloquently to our fears and curiosities, incorporating anecdotes, memoir, and a life's passion for flight. He tackles our toughest concerns, debunks conspiracy theories and myths, and in a rarely heard voice dares to return a dash of romance and glamour to air travel.

I Wish I Were a Pilot Stella Blackstone, 2007 Rhyming text and illustrations portray piloting various forms of transportation including hot air balloons and bicycles.

The Heart of a Pilot Thomas Lee Bangart, 2010-04-09 It was during a time

when his family was financially down that the author discovered his passion. In a county fair where it was even hard for him and his mother to experience a single ride, he found himself fascinated with only one amusement—the old Curtis Robin airplane. Luckily for him, a family friend gave him the chance to ride it himself. As soon as the engine roared to life and the airplane lurched forward across the rough pasture and into the sky where he could see the beautiful view from above, he knew right then that he wanted to go flying for the rest of his life. Now in his late seventies, Bangart relives his wonderful journey through the skies and life to bring inspiration to others. In this autobiography, he reminisces his adventures as a pilot during the Great Depression, treating the reader with an inside look at growing to manhood during the first half of the twentieth century. His descriptions of the early days of Alaska bush flying, and the trials and hazards of the early airline flying are given in great detail. A person does not have to be a pilot or airplane enthusiast to enjoy this book. It covers such things as driving the Alaska-Canadian highway both in summer and winter weather, making a home in Alaska with a new bride, how government has brought many changes in our lives, and many insights into life itself. If you have been a passenger on an airliner during these early years, this book will give you a perception to what went on behind the closed cabin door where the pilots were secluded.

Viper Pilot Dan Hampton, 2012-10-02 THE NEW YORK TIMES BESTSELLING MEMOIR OF 21ST-CENTURY AIR COMBAT, BY ONE OF THE MOST DECORATED PILOTS IN AIR FORCE

HISTORY (NEW YORK POST) 151 combat missions 21 hard kills on surface -to -air missile sites 4 Distinguished Flying Crosses with Valor 1 Purple Heart First into a war zone, flying behind enemy lines to purposely draw fire, the wild weasels are elite fighter squadrons with the most dangerous job in the Air Force One of the greatest aviation memoirs ever written, Viper Pilot is an Air Force legend's thrilling eyewitness account of modern air warfare. For twenty years, Lieutenant Colonel Dan Hampton was a leading member of the Wild Weasels, logging 608 combat hours in the world's most iconic fighter jet: the F-16 Fighting Falcon, or Viper. He spearheaded the 2003 invasion of Iraq, leading the first flight of fighters over the border en route to strike Baghdad. Earlier, on 9/11, Hampton's father was inside the Pentagon when it was attacked; with his dad's fate unknown, Hampton was scrambled into American skies and given the unprecedented orders to shoot down any unidentified aircraft. Viper Pilot is an unforgettable look into the closed world of fighter pilots and modern air combat.

Archie Ferguson Steve Levi,2021-09-01 Archie Ferguson is the last of the original fly-by-the-seat-of-your-pants Alaska bush pilots to be the subject of a biography. Dubbed Alaska's Clown Prince, he added many hilarious chapters to Alaska's history. He is also the originator of the Arctic Bump, current practice of airline pilots who give a blast of power as they fly over the Arctic Circle to provide gullible tourists the impression that the air north of the Arctic Circle is different than air south of the Arctic Circle.

His title, the Craziest Pilot in the World, was given to him by The Saturday Evening Post in its December 1945 issue. Ferguson, who died in 1967, was an excellent example of the colorful character/con men who made Alaska what it is today.

Crossing the Bar Paul Lobo, 2016-09-06 There is nothing placid about San Francisco Bay. Its raucous waters have hosted brutal storms, daring rescues, horrendous accidents, and countless hours of drama and tension. Captain Paul Lobo knows that better than most people. As a licensed harbor pilot in those treacherous waters, Lobo captained nearly 6,500 boats in a thirty-one year career—everything from mega-yachts to the USS Enterprise to the Love Boat. Each trip tells its own story, and Lobo shares many. Here readers will find gripping, tense adventure stories, all well told. Reading *Crossing the Bar* is like being on the rolling bridge with Lobo. Here are tragic deaths and lives saved, inspiring rescues, devastating storms, and the infamous and horrendous oil spill after the Cosco Busan rammed the Oakland Bay Bridge—which resulted in the first imprisonment of a maritime pilot for making an error. Readers will also find a December sea rescue Lobo assisted with in hurricane strength winds and monstrous seas. Without Lobo's pilot boat and its crews' supreme effort, the ship they saved would have foundered on the rocky Marin County,

California, coastline with the loss of all hands. Skyhorse Publishing, as well as our Sports Publishing imprint, is proud to publish a broad range of books for readers interested in sports—books about baseball, pro football, college football, pro and college basketball, hockey, or soccer, we have a book about your sport or your team. In addition to books on popular team sports, we also publish books for a wide variety of athletes, including books on running, cycling, horseback riding, swimming, tennis, martial arts, golf, camping, hiking, aviation, boating, and so much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Scrappy Howard C. “Scrappy” Johnson, Ian A. O’Connor, 2016-10-14 From World War II to high above the Earth to Vietnam, this memoir tells the story of fighter pilot Howard C. “Scrappy” Johnson. Beginning with his early years in Knoxville, Tennessee, the book follows Johnson through his career at the University of Louisville and his enlistment as an Air Force cadet at the onset of World War II. After World War II, Johnson served a tour of duty in

the skies over Korea and in 1958 broke the world's altitude record by over 14,000 feet, soaring at 91,249 feet in his F-104A Starfighter. For this remarkable feat he was awarded the Collier Trophy, aviation's highest honor. In Vietnam, he was director of operations for the 388th Tactical Fighter Wing and was instrumental in founding the Red River Valley Fighter Pilots, a group dedicated to the remembrance of fallen and captured airmen. Written with panache, this work records the bigger-than-life adventures of one of America's finest.

The Last of NASA's Original Pilot Astronauts David J. Shayler, Colin Burgess, 2017-06-19 Resulting from the authors' deep research into these two pre-Shuttle astronaut groups, many intriguing and untold stories behind the selection process are revealed in the book. The often extraordinary backgrounds and personal ambitions of these skilled pilots, chosen to continue NASA's exploration and knowledge of the space frontier, are also examined. In April 1966 NASA selected 19 pilot astronauts whose training was specifically targeted to the Apollo lunar landing missions and the Earth-orbiting Skylab space station. Three years later, following the sudden cancellation of the USAF's highly classified Manned Orbiting Laboratory (MOL) project, seven military astronauts were also co-opted into NASA's space program. This book represents the final chapter by the authors in the story of American astronaut selections prior to the era of the Space Shuttle. Through personal interviews and original NASA documentation, readers will

also gain a true insight into a remarkable age of space travel as it unfolded in the late 1960s, and the men who flew those historic missions.

The American Pilot David Greig, 2005 A spy plane crash-lands in a remote valley in a distant country. The local villagers take in the wounded pilot and argue his fate. The American Pilot explores the way the world sees America and the way America sees the world. The American Pilot premiered with the RSC at The Other Place, Stratford-upon-Avon in April 2005. 'Greig at his best.' Evening Standard. 'One of the most intellectually stimulating dramatists around... A richly provocative new play.' Guardian 'The sheer brilliance of Greig, storyteller and seer.' Herald. The American Pilot premiered with the RSC at The Other Place, Stratford Upon Avon, in April 2005.

An Ace of the Eighth Norman J. Fortier, 2003-04-29 FOR A FIGHTER PILOT IN THE MIGHTY EIGHTH, DEATH WAS ALWAYS A HEARTBEAT AWAY. When the skies of Europe blazed with the fiercest air battles in history, fighter pilots like Norman "Bud" Fortier were in the thick of it, flying four hundred miles an hour at thirty thousand feet, dodging flak and dueling with Nazi aces. In their role as "escorts" to Flying Fortresses and Liberators, the fighter squadrons' ability to blast enemy aircraft from the sky was key to the success of pinpoint bombing raids on German oil refineries, communication and supply lines, and other crucial targets. Flying in formation with the bomber stream, Fortier and the rest of his squadron helped develop dive-bombing and

strafing tactics for the Thunderbolts and Mustangs. As the war progressed, fighter squadrons began to carry out their own bombing missions. From blasting V-1 missile sites along France's "rocket coast" and the hell-torn action of D day to the critical attacks on the Ruhr Valley and massive daylight raids on German industrial targets, Fortier was part of the Allies' bitter struggle to bring the Nazi war machine to a halt. In describing his own hundred-plus missions and by including the accounts of fellow fighter pilots, Fortier recaptures the excitement and fiery terror of the world's most dangerous cat-and-mouse game.

Rattler One-Seven Chuck Gross,2006-06-13 Rattler One-Seven puts you in the helicopter seat, to see the war in Vietnam through the eyes of an inexperienced pilot as he transforms himself into a seasoned combat veteran. At the age of twenty, Chuck Gross spent his 1970-71 tour with the 71st Assault Helicopter Company flying UH-1 Huey helicopters. He inserted special operations teams into Laos and participated in Lam Son 719, a misbegotten attempt to assault and cut the Ho Chi Minh Trail, during which his helicopter was shot down and he was stranded in the field.

Once A Fighter Pilot Jerry W. Cook,2002-05-17 * The true adventure tales of

a U.S. Air Force fighter who flew more than 400 combat hours while on duty in Vietnam * Provides a rare insider's glimpse into the world of the flying elite, detailing their education, training, emotions, and day to day experiences * Poignant, sometimes funny, brutally honest, always exciting, and an eye-opening look at one of the most tumultuous eras in U.S. history.

Apollo Pilot Donn Eisele, 2017-01-01 In October 1968 Donn Eisele flew with fellow astronauts Walt Cunningham and Wally Schirra into Earth orbit in Apollo 7. The first manned mission in the Apollo program and the first manned flight after a fire during a launch pad test killed three astronauts in early 1967, Apollo 7 helped restart NASA's manned-spaceflight program. Known to many as a goofy, lighthearted prankster, Eisele worked his way from the U.S. Naval Academy to test pilot school and then into the select ranks of America's prestigious astronaut corps. He was originally on the crew of Apollo 1 before being replaced due to injury. After that crew died in a horrific fire, Eisele was on the crew selected to return Americans to space. Despite the success of Apollo 7, Eisele never flew in space again, as divorce and a testy crew commander led to the three astronauts being labeled as troublemakers. Unbeknownst to everyone, after his retirement as a technical assistant for manned spaceflight at NASA's Langley Research Center in 1972, Eisele wrote in detail about his years in the air force and his time in the Apollo program. Long after his death, Francis French discovered Eisele's unpublished memoir, and Susie Eisele Black (Donn's widow) allowed French

access to her late husband's NASA files and personal effects. Readers can now experience an Apollo story they assumed would never be written as well as the story behind its discovery.
