Platinum Jennifer Lynn Barnes,2007 Among the Goldens at Emory high, Lilah Covington is Platinum - the hottest of the hot. She's popular, beautiful, and much smarter than she looks. But most importantly to Lilah, she's in complete control of her own destiny - if only someone would tell that to the mysterious ghost boy roaming the halls. Ever since Lissy and Lexie James arrived in town, Lilah's perfect world has been coming unhinged. No-one else can see the ghost who's trailing her around campus, and - forget the rumour mill - her memories have her more sidetracked than any gossip could. It looks as if the James family legacy of supernatural sight might be contagious. And to make matters worse, mutiny is brewing among the Goldens, and if Lilah isn't careful, she may just lose her top-tier boyfriend to her second-in-command. Lilah knows the rules better than anyone, but between her newfound visions, an absolutely fatal attraction to a boy who isn't real, and the threat of a supernatural enemy with a sting deadlier than any Queen Bee, it's going to take everything Lilah has to stay on top at Emory. And to prove once and for all that - highlights and high heels aside - those who make the rules are the only ones who can break them. -- Publisher.

Platinum Aliya S. King, 2010-07-06 You only think you want this life . . . Alex Maxwell is planning her wedding to up-and coming music artist Birdie, ghostwriting video vixen Cleopatra Wright's memoir, and she's just been assigned the story of the year by her editor in chief at a major music industry magazine—an article about the glamorous lives of women married to platinum-selling hip-hop artists. Alex has been interviewing celebrities and hangers-on long enough to know all that glitters isn't gold, so she's determined to get the real scoop. Still, it's not going to be easy to get past the wives' gilded cages. . . Beth Saddlebrook, wife of aging rapper Z. They have three beautiful boys and a seemingly endless supply of cash. But Beth spends her days trying to keep Z off drugs and fielding calls from women hollering she's just a "small-town white bitch" and claiming to be carrying Z's baby. Only one person understands what she's going through. . . Kipenzi Hill, multiplatinum-selling R&B artist and Beth's best friend. Her relationship with rap star and record label president Jake is an open secret in the industry. She knows Jake loves her, but he'd rather break up than publicly acknowledge it. Now she has learned that the newest (and much younger) R&B sensation Bunny has been signed to Jake's label. Josephine Bennett, wife to Jamaican singer and überproducer Ras Bennett. Josephine doesn't just want to spend her husband's money, she wants to contribute. Her fashion company is finally starting to get media attention when her husband admits to something she's suspected all along—he's fallen in love with another woman. Cleopatra Wright, every man's dream girl, a video vixen with a story to tell and scores to settle. Cleo's got that thing no one can put a finger on and no man (or woman) can resist. Some would call her evil or misguided or both, but Cleo always moves with a purpose and she'll stop at nothing to get what she wants. . . Alex realizes she may have more in common with these women than she'd like. What if this is a glimpse of how her life will be if Birdie finally gets signed to a major label? Stuck between her loyalty to this newfound sisterhood and her obligation to write the truth, Alex is forced to rethink everything she knows about work, friendship, and love.

Platinum-Group Element Exploration D.L. Buchanan, 2012-12-02 The platinum-group elements (PGE) include platinum, palladium, rhodium, ruthenium, iridium and osmium. They are currently receiving world-wide attention as an attractive exploration target because they offer the dual attraction of rare, high value precious metals as well as major industrial applications. Platinum has aesthetic qualities, combined with a permanent lustre, which encourage its use in the manufacture of jewellery and, like gold, it also finds an investment role. Platinum, rhodium and palladium have important applications as catalysts, enabling petroleum and other fuels and chemicals to be produced efficiently from crude oil. This book gives a practical set of guidelines for implementing a programme of PGE exploration, detecting subtle indications of mineralization and assessing the economic potential of a group of mafic or ultramafic rocks. Background material is given on the economic and geological framework of the PGE in the first chapter, while theoretical aspects of magma chemistry are covered in the next three. Chapters 5 and 6 review current world-wide exploration activity within the context of available reserves of PGE, and in Chapter 7 factors which need to be considered in exploration for new deposits are outlined. The last chapter discusses evaluation guidelines. As the PGE are both costly and almost indestructible they are normally recycled;

nevertheless, a substantial annual input of new metal is needed to replace process losses, to permit increases in capacity in the dependent industries and to provide for new uses. For example, a major new market for platinum will be created if the European Community countries are required to fit catalytic converters to new cars. At present, South Africa and the USSR are the sources of most of the western world's newly mined PGE, with virtually all the South African production derived from the Bushveld Complex. Much of the material presented in this book is based on the author's experience of these rocks, and emphasis is given to the dominant role played by magmatic sulphides as potent collectors of PGE. Consumers of minerals and metals, however, prefer to have a diversity of supply and a new PGE producer is therefore likely to attract a ready market. Not only does the book provide a wealth of practical information for mining geologists, it also contains much of interest to those in natural resource management and investment.

Platinum Metals in the Environment Fathi Zereini, Clare L.S. Wiseman, 2014-11-06 This edited volume presents new data and insights from the most internationally respected PGE experts, representing a variety of disciplines ranging from chemistry, geochemistry, biology, environmental science to toxicology and environmental health. It builds upon three previous co-edited books published by Springer, Zereini and Alt (Eds.) (1999, 2000 and 2006), incorporating the most recent advances on the topic. The book covers the following topical areas related to PGE: sources and applications, analytical methods, environmental fate, bioavailability and chemical behaviour, use of bioindicators and human exposures and health risk potential. Highly interdisciplinary in orientation, this book is a comprehensive guide to academics, students and professionals working in a number of different scientific fields, who are interested in topics related to platinum metal emissions in the environment.
