Practical Rails Plugins shows you how to capitalize upon the wide variety of plugins at your disposal by guiding you through their integration into a number of interesting projects. You'll learn how to rapidly augment projects involving asynchronous video transcoding, geocoding and mapping, content management, community ratings, and PDF generation. You'll also learn how to create and distribute your own plugins. The ultimate guide to building powerful web sites faster using Rails plugins Demonstrates how to use popular plugins within a number of practical (and fully functional) projects and mini–applications Shows you how to create and distribute your own plugins

Overcoming Barriers to Deployment of Plug-in Electric Vehicles National Research Council,Transportation Research Board,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on Overcoming Barriers to Electric-Vehicle Deployment,2015-06-26 In the past few years, interest in plug-in electric vehicles (PEVs) has grown. Advances in battery and other technologies, new federal standards for carbon-dioxide emissions and fuel economy, state zero-emission-vehicle requirements, and the current administration's goal of putting millions of alternative-fuel vehicles on the road have all highlighted PEVs as a transportation alternative. Consumers are also beginning to recognize the advantages of PEVs over conventional vehicles, such as lower operating costs, smoother operation, and better acceleration; the ability to fuel up at home; and zero tailpipe emissions when the vehicle operates solely on its battery. There are, however, barriers to PEV deployment, including the vehicle cost, the short all-electric driving range, the long battery charging time, uncertainties about battery life, the few choices of vehicle models, and the need for a charging infrastructure to support PEVs. What should industry do to improve the performance of PEVs and make them more attractive to consumers? At the request of Congress, Overcoming Barriers to Deployment of Plug-in Electric Vehicles identifies barriers to the introduction of electric vehicles and recommends ways to mitigate these barriers. This report examines the characteristics and capabilities of electric vehicle technologies, such as cost, performance, range, safety, and durability, and assesses how these factors might create barriers to widespread deployment. Overcoming Barriers to Deployment of Plug-in Electric Vehicles provides an overview of the current status of PEVs and makes recommendations to spur the industry and increase the attractiveness of this promising technology for consumers. Through consideration of consumer behaviors, tax incentives, business models, incentive programs, and infrastructure needs, this book studies the state of the industry and makes recommendations to further its development and acceptance.

  A Beginner's Guide to Writing Minecraft Plugins in JavaScript Walter Higgins,2015-04-10 The book is for anyone who wants to learn how to modify Minecraft--no previous programming experience required! The book uses JavaScript, a popular programming language for creating websites and scripting. Aimed at kids who already play Minecraft, this guide will teach coding through a series of Recipes (the term used in-game when crafting new objects). For example, in the game, one of the first things any player must do is create a Workbench, or Crafting Table, which will in turn enable the player to create sophisticated tools. Recipe 1 in the book (the term Recipe and Chapter is interchangeable) is 'A modding Workbench' and its ingredients are the tools the reader will need to begin modding. The goal of each Recipe/chapter is to introduce a new JavaScript concept or expand upon a previously introduced concept. The author will present each recipe as a useful addition to the game while gently introducing programming concepts in an approachable style. This unique approach gets over the problem of introducing JavaScript in an interesting way and avoids spending 3 or 4 chapters explaining JavaScript core concepts in a vacuum. Several Recipes will be covered, including Rolling Dice, Snowball Fight, Piggie Pandemonium, Advanced Modding, and more.
