The Qur'an ,2008-04-17 'Read! Your Lord is the Most Bountiful one who taught by the pen, who taught man what he did not know.' The Qur'an, believed by Muslims to be the word of God, was revealed to the Prophet Muhammad 1400 years ago. It is the supreme authority in Islam and the living source of all Islamic teaching; it is a sacred text and a book of guidance, that sets out the creed, rituals, ethics, and laws of the Islamic religion. It has been one of the most influential books in the history of literature. Recognized as the greatest literary masterpiece in Arabic, it has nevertheless remained difficult to understand in its English translations. The message of the Qur'an was directly addressed to all people regardless of class, gender, or age, and this translation is equally accessible to everyone. The Numerical And Time Correlations In The Quran Sahal A. Mohamed, 2018 Scholars have analyzed the Holy Quran for centuries, adopting practices and guidelines drawn from its wisdom. Their studies, however, focus on the literal meaning of its verses. In this ground-breaking work, Sahal A. Mohamed uses a numerological approach to interpret the hidden meanings in the holy book. He begins with a simple question: If the Quran is truly the word of Allah, can this be shown mathematically? Through simple equations, his study uncovers correlations and patterns that prove the holy text is beyond the ability of any human, and is indeed the work of the Almighty. From the central tenets of the Islamic faith to the complexities of the human body, these numerical correlations show that the Holy Quran reflects Allah's mastery not only in its content, but in the very structure of the book itself. Its secrets are astounding in their elegance, and will help to unlock a greater understanding of our life on Earth and the foundations of space and time.

Muslims regard the Quran as Muhammad's most important miracle; a proof of his prophethood; and the culmination of a series of divine messages. The Quran describes itself as a book of

guidance for mankind. It offers detailed accounts of specific historical events, and it often emphasizes the moral significance of an event over its narrative sequence. The Quran consists of 114 chapters of varying lengths, each known as a sūrah. Each sūrah consists of several verses, known as āyāt, which originally means a sign or evidence sent by God. The Quranic content is concerned with basic Islamic beliefs including the existence of God and the resurrection. Narratives of the early prophets, ethical and legal subjects, historical events of Muhammad's time, charity and prayer also appear in the Quran. Prophets in the Quran Brannon M. Wheeler, 2002-06-18

What was the name of Noah's son who did not survive the Flood? Why do Pharaoh and Haman build the Tower of Babel? For what reasons does Moses travel to the ends of the Earth? Who is the 'Horned-One' who holds back Gog and Magog until the Day of

Judgement? These are some of the questions answered in the oral sources and Quran commentaries on the stories of the prophets as they are understood by Muslims. Designed as an introduction to the Quran with particular emphasis on parallels with Biblical tradition, this book provides a concise but detailed overview of Muslim prophets from Adam to Muhammad. Each of the chapters is organized around a particular prophet, including an English translation of the relevant verses of the Quran and a wide selection of classical, medieval and modern Muslim commentaries on those verses. Quran commentaries include references to Sunni and Shi'i sources from Spain, Central Asia, the Middle East and Africa. An extensive glossary provides an annotated list of all scholarly transmitters and cited texts with suggestions for further reading. This is an excellent book for undergraduate courses, and students in divinity and seminary programmes. Comparisons between the Quran and Bible, and among Jewish, Christian and Islamic exegesis are highlighted. Oral sources, references adapted from apocryphal and pseudepigraphical works, and inter-religious dialogue are all evident throughout these stories of the prophets. This material shows how the Quran and its interpretation are integral to a fuller and more discerning understanding of the Bible and its place in the history of Western religion.

The Quran is divided into chapters (surah in Arabic), which are then

divided into verses (ayah). Muslims believe that the Quran was verbally revealed by God to Muhammad through the angel Gabriel (Jibril), gradually over a period of approximately 23 years, beginning on 22 December 609 CE, when Prophet Muhammad SAW was 40, and concluding in 632, the year of his death. Muslims regard the Quran as the most important miracle of Prophet Muhammad SAW, a proof of his prophethood, and the culmination of a series of divine messages that started with the messages revealed to Prophet Adam (Pbuh) and ended with Prophet Muhammad SAW. The word Quran occurs some 70 times in the text of the Quran, although different names and words are also said to be references to the Quran. The Quran: With or Against the Bible? Ejaz Naqvi,
MD,2012-06-11 Too often we are tempted into thinking how wrong other people's religions and scriptures are, rather than focusing on

what's right about our own. We act like some of our politicians during election campaigns rather than following the teachings of our own holy books. Breaking the trend, author Dr. Ejaz Naqvi provides an objective, topic-by-topic review of the two most read books in the world—the Holy Bible and the Holy Quran. The Quran: With or Against the Bible? addresses the key themes of the Quran and answers commonly asked questions in search of finding common ground: • Who wrote the Quran? • Who is the “God” of the Quran? • What is the Quranic view of the prophets, especially Moses and Jesus? • What does the Quran teach about interfaith relations? • Does the Quran promote peace and harmony between Muslims and the People of the Book, or does it promote violence? • How does the Quran compare to the Bible on important themes like worshipping God, the prophets, human rights, moral values, and fighting for justice and human dignity? • Does the Quran render women as second-class citizens? Dispelling major myths, The Quran: With or Against the Bible? Systematically analyzes and compares the similarities in the paths of guidance the two scriptures have bestowed upon mankind.

Al-Quran on Oneness of The Being M.S.M Abdullah (Rah), 2012-07-16 All the prophets and Awliya (saints) that emerges from time to time in this world were those sent by Allah (the God) to rid of a mental disorder mankind has afflicted with, preventing the attainment of peace and tranquility. The cause of this mental disorder is the feeling that Allah and the creation are separate from each other. Unless this thought (Shirk-equating) is removed from the hearts and minds, there is no way to achieve the union with God. Quran Pocket Guide (Goodword) Maulana Wahiduddin Khan, 2014-02-24 The Quran is the Book of God. It has been preserved in its entirety for all time to come. The Quran is apparently in the Arabic language, but in reality, it is in the language of nature, that is, the language in which God directly addressed all human beings at the time of Creation. This divine invocation of humanity is ever-present in the consciousness of all human beings, that is why the Quran is universally understandable—to some on a conscious plane, and to others at the subconscious level. This reality has been described in the Quran as 'clear revelations in the hearts of those who have been given knowledge.' The Amazing Quran , Many centuries before the onset of Muhammad's prophethood, there was a well-known theory of atomism advanced by the Greek philosopher, Democritus. He and the people who came after him assumed that matter consists of tiny, indestructible, indivisible particles called atoms. The Arabs too, used to deal in the same concept; in fact, the Arabic word dharrah commonly referred to the smallest particle known to man. Now, modern science has discovered that this smallest unit of matter (i.e., the atom, which has all of the same properties as its element) can be split into its component parts. This is a new idea, a development of the last century; yet; interestingly enough, this information had already been documented in the Quran (Surah Saba', 34:3) which states: "He [i.e., Allah] is aware of an atom's weight in the heavens and on the earth and even anything smaller than that..."
