Auto Safety: NHTSA Has Options to Improve the Safety Defect Recall Process Susan A. Fleming,2011-05-12 In 2010, auto manufacturers recalled more vehicles than any other year, according to the Nat. Highway Traffic Safety Admin. (NHTSA), the federal oversight authority for vehicle recalls. However, many recalled vehicles are never fixed, posing a risk to vehicle operators, other drivers, and pedestrians. After the recent recalls of Toyota vehicles, Congress raised questions about the auto safety defect recall process, including the sufficiency of NHTSA's oversight authorities and whether vehicle owners are being effectively motivated to comply with recalls. This report reviewed laws and documents and interviewed NHTSA and stakeholders about the (1) extent of NHTSA's role in the recall process, and how its authorities compare to selected federal and foreign agencies that oversee recalls; (2) benefits and challenges of the recall process for NHTSA and manufacturers; and (3) options for improving the recall process. Figures and tables. This is a print on demand report.

The last interruption she needs is a determined private detective barging into her lab—no matter how sexy he looks wearing his Stetson hat. Recall!: California's Political Earthquake Larry N. Gerston,Terry Christensen,2015-03-26 In politics, as in so many other areas, California is unique. The state's economy - the largest in the nation, and sixth largest in the world - is given to dramatic swings. Its legislative system is often defined by gridlock on matters large and small. The use of the initiative, one of the tools of direct democracy, has become commonplace. Over the years, California has had more than its share of political turmoil. But for pure melodrama, nothing matches the 2003 campaign to recall the state's sitting governor, Gray Davis. Recall! relates the latest and most dramatic chapter in the political history of the Golden State. The authors are recognized experts on California politics and regular

local television political analysts. They provide fascinating coverage of the events leading up to Davis's replacement by bodybuilder-turned actor-turned politician Arnold Schwarzenegger; describe the large and colorful cast of characters involved in the special election; and demonstrate how California's one-of-a-kind mix of political, economic, and social circumstances made it all possible.

Anchoring Bias in Recall Data Godlonton, Susan,Hernandez, Manuel A.,Murphy, Michael,2016-05-20 Understanding the magnitude and source of measurement biases in self-reported data is critical to effective economic policy research. This paper examines the role of anchoring bias in self-reports of objective and subjective outcomes under recall. The research exploits a unique panel survey data set collected over a three-year period from four countries in Central America. It assesses whether respondents use their reported value of specific measures from the most recent survey period as a cognitive heuristic when recalling the value from a previous period, while controlling for the value they reported earlier. We find strong evidence of sizable anchoring bias in self-reported retrospective indicators for both objective measures (household and per capita income, wages, and hours spent on the household's main activity) and subjective measures (reports of happiness, health, stress, and well-being). In general, we also observe a larger bias in response to negative changes for objective indicators and a larger bias in response to positive changes for subjective indicators.
