On Recruitment Mitch Sullivan,2017-12-07 This book will be appreciated by people who don't ever need to be involved in the hiring of a new staff member. Everybody has to work in recruitment at some point in their life – even if it's only to find a job. Mitch Sullivan has experienced recruitment from a number of different perspectives – not least those of a hiring manager and a job seeker. He's spent

nearly 30 years in the industry – in agencies, in large corporates and as a recruitment copywriter. His blogging style has been described as “three cords and the truth” – partly because each blog generally takes less than a couple of minutes to read and partly because of the unapologetic sarcasm (or wit if you're feeling generous) he uses to deliver this honesty. This book is a collection of some of the 160 blogs he's written on recruitment, covering areas of the industry as diverse as agency culture, retained recruitment, assessment, employer branding, job advertising, the candidate experience and even employee engagement.

Recruitment and Retention in the Armed Forces Great Britain: National Audit Office,2006-11-03

This two volume NAO report examines the recruitment and retention of armed forces personnel. As of

July 2006, the trained strength of the armed forces stood at around 180,690, with an estimated shortfall of 5,170 against the Departments requirement. Overall the armed forces are not in manning balance, with the figures masking a wider shortage of trained personnel within a range of specific trade groups across all three services. All three services expect to be within manning balance by April 2008, though historically the services have consistently run below the full manning requirement. The NAO has identified 88 operational pinch point trades where there is insufficient trained strength to perform operational tasks. The report sets out a number of conclusions and recommendations, including: that the Department should review overall manning requirements within individual operational pinch points and also develop guidelines on the expected levels of voluntary outflow for individual operational pinch points; regular surveys of personnel should be carried out, focusing on factors that reduce retention; the Department should also assess the impact of the work/life balance and the extent to which breaches of individual harmony may be understated; further, the Department should look to investigate measures to provide greater stability and certainty of work patterns for personnel between operational

deployments; also that a cost effective analysis should be conducted on the payment of financial retention incentives and the impact on decisions to continue serving in the armed forces; the Department should also review the scope of schemes which provide opportunities to offer competitive salaries, and consider the recruitment to a wider range of trades than is currently the practice; the Department should also develop a clear order of priority for the wide range of long-term projects it has planned and commit to firm timescales and funding programmes for the most important. A companion volume (HC 1633-II, session 2005-06, ISBN 0102943575) is available separately which contains case studies and detailed survey results.

The Hiring Prophecies Andrew LaCivita, 2015-05-05 A ten-year study by milewalk, which included more than ten thousand employees and two hundred companies, surfaced the hidden reasons why employers have difficulty hiring and retaining top talent. A job candidate's often faulty decision-making approach coupled with short-term emotions and other external influencers exacerbate an already-systemic issue regarding how employers evaluate job seekers. Companies will struggle with these

challenges until they fully understand and account for the real reasons they have difficulty recruiting the right resources. In *The Hiring Prophecies: Psychology behind Recruiting Successful Employees*, a milewalk Business Book, learn a proven recruitment methodology that counteracts these ever-present challenges when evaluating job candidates. Once employers understand and implement the methods that address the true predictors of recruiting and retention success, they will be on their way to hiring employees who stay!

Opportunities and Challenges in Teacher Recruitment and Retention Carol R. Rinke, Lynnette

Mawhinney,2019-05-01 Opportunities and Challenges in Teacher Recruitment and Retention serves as a comprehensive resource for understanding teachers' careers across the professional lifespan. Grounded in the notion that teachers' voices are essential for understanding teachers' lives, this edited volume contains chapters that privilege the voices of teachers above all. Book sections look closely at the particular issues that arise when recruiting an effective, committed, and diverse workforce, as well as the challenges that arise once teachers are immersed in the classroom setting. Promising directions are also included for particularly high-need areas such as early childhood teachers, Black male teachers, STEM teachers, and urban teachers. The book concludes with a call for self-care in teachers' lives. Chapter contributions come from a variety of contexts across the United States and around the world. However, regardless of context or methodology, these chapters point to the importance of valuing and respecting teachers' lives and work. Moreover, they demonstrate that teacher recruitment and retention is a complex and multifaceted issue that cannot be addressed through simplistic policy changes. Rather, attending to and appreciating the web of influences on

teachers lives and careers is the only way to support their work and the impact they have on our next generation of students.
