Reference and Information Services Kay Ann Cassell,Uma Hiremath,2013 Search skills of today bear little resemblance to searches through print publications. Reference service has become much more complex than in the past, and is in a constant state of flux. Learning the skill sets of a worthy reference librarian can be challenging, unending, rewarding, and-- yes, fun.

The Maltreatment of Children S.M. Smith,2012-12-06 The maltreatment of children is an issue that has always been with us and civilized societies provide a range of services both social and medical to care for the children and families afflicted. In recent years, greater attention has been drawn to the medical aspects by competent authorities in the fields of forensic medicine, forensic psychiatry, epidemiological psychiatry, child psychiatry and family psychiatry; as well as the social aspects by those child welfare and child care agencies who have the difficult and distasteful task of removing children, with the help of the courts, from parents who can abuse them and are not able to care for them adequately. A multitude of social agencies, whose range of activities involve both the care and, where possible, the social betterment of afflicted families are now involved. Not least in importance is an increase in our global knowledge to help in the prevention or better treatment of these problems. This means more information on familial and genetic factors in human central nervous system development in its broadest sense. This would include how the central nervous system originates, mediates and controls the build up, speed of development and impulsive release, mastery and direction of aggressive drives and impulses. Very little is so far known about these factors.

Development of Classical and Modern Geodetic Reference Systems of Albania Bilbil Nurçe,2023-03-08 This book addresses the problems of mathematical relations between global and classical coordinate references from the practical applications point of view. It presents a large cartographic and numerical information set, which provides great values for practical and academical use based on the classical Albanian coordinative reference (ALB1986/ALB1987). This information is reflected from the positional point of view in the new modern Albanian satellite reference ALBPOS (Albanian Positioning System) or ALBCORS (Albanian Continuous Operation Reference Stations System). The main purpose of this Monograph is to summarize coordinative references applied in Albania in different periods, both classical and modern. Relevant transformation models between traditional/classical reference ALB1986 / ALB1987 and GNSS satellite reference are presented. The book furthermore recommends the mathematical models of the relationship in plan and height, between the Albanian classical reference and the global/European coordinate references (ITRF, EUREF). It serves to professionals involved in fundamental geodetic works as well as all working with GNSS or developing GIS applications.

Internet Reference Support for Distance Learners Rita Pellen,William Miller,2013-12-19 Make separate library services for distance learners a thing of the past Internet Reference Support for Distance Learners takes a comprehensive look at efforts by librarians and information specialists to provide distance learners with effective services that match those already available on campus. With the development of the World Wide Web and the evolution of Web-based services, reference librarians are adding a human element to the virtual library, blurring the difference between distance learners and traditional users. This unique book examines how they deal with a wide range of related topics, including standards and guidelines, copyright issues, streaming media, and chat and digital references, and presents a historical overview of how reference and instructional services have been delivered to distance users—before and after the creation of the Internet. Internet Reference Support for Distance Learners reveals that librarians do not make a sharp distinction between reference and instruction within the context of distance learning, and that there is no clear boundary between “true” distance learners and more traditional students who might use services designed for nontraditional users. Online capabilities have allowed reference librarians to approximate services advocated by published guidelines and standards, including the ACRL Distance Learning Section’s Guidelines for Distance Learning Library Services, to provide a framework for librarians to plan services for off-campus students. Internet Reference Support for Distance Learners provides practical information on: how librarians can “keep IT simple” when designing methods to access reference support why library Web sites are vital sources of communication between the distance learning student and the reference-based instructional component how to set up a university chat service, including software selection, staff training and assessment how to provide students services beyond traditional provision of resources, including advising, enrollment, and payment of fees how to create an online assistance site that incorporates online versions of traditional print handouts, FAQs, subject guides, course-specific guides, learning modules, and instructional videos in one central location how to work with faculty to create online support for students in Blackboard courses the pros and cons of using open-source software how to create an online library assistance site how to create online information literacy course to teach independent research skills to remote students how to avoid copyright infringement and how to educate library personnel about copyright law how to use Camtasia Studio, a screen capture program to create audio and video for online presentations Internet Reference Support for Distance Learners is an invaluable resource for librarians working in academic, school, special, and public settings, and for library science faculty and students.
