Animal lives worth living Ruth C. Newberry,Bjarne O. Braastad,2023-11-20 The main theme of this year's congress is 'Animal lives worth living'. This theme focuses on our responsibility for all animals kept or influenced by humans, to ensure that we can provide a life for them that takes into account all relevant aspects of animal welfare, aided by applied ethology as the key scientific discipline. This not only means avoiding and alleviating suffering but also promoting resilience and positive experiences. By monitoring and interpreting animal behaviour, we gain important insights into each of these aspects of quality of life.

Rearing Young Ruminants on Milk Replacers and Starter Feeds Upoor Krishnamoorthy,John Moran,2011 This manual presents comprehensive information on the preparation and feeding of milk replacers and starter feeds for pre-ruminants. Although the substitutes for dam's milk can be prepared from by-products of milk and feed ingredients that are not preferred for human consumption, awareness about such alternatives is limited in many developing countries. Therefore, popularization of preparation and feeding of milk replacers and starter feeds using locally available ingredients is useful in promoting survivability and growth of young stock. The target audiences for this manual are livestock extension workers engaged in developing countries. The manual is also useful for students and teachers of ruminant production and for small scale industries and researchers that wish to produce milk replacers and starter feeds.

Animal Life-Cycle Feeding and Nutrition Gerard Meurant,2012-12-02 Animal Life-Cycle Feeding and Nutrition reviews developments in feeding and nutrition throughout an animal's life cycle and covers a wide range of topics, from utilization of nutrients such as carbohydrates and proteins to nutrient digestion by ruminants, swine, poultry, and horses. Feedstuffs such as pasture and harvested forages, protein concentrates, and cereal and sorghum grains are also discussed. Comprised of 21 chapters, this book begins with a discussion on nutrients and their utilization, including carbohydrates, lipids, proteins, and minerals and vitamins. Nutrient digestion by ruminants, swine, poultry, and horses are then compared and feedstuffs for livestock are evaluated. The next section deals with feedstuffs such as pasture and harvested forages, protein concentrates, and cereal and sorghum grains, together with molasses, manure, and other miscellaneous feed ingredients. The remaining chapters explore the effect of processing on the nutrient value of feedstuffs; balancing of rations; and feeding of animals including swine, beef and dairy cattle, poultry, sheep, horses, dogs, and goats. This monograph is designed for students of animal sciences, for veterinary students as well as doctors of veterinary medicine, and for practitioners of livestock feeding.

Fibre-Rich and Wholegrain Foods Jan A Delcour,Kaisa Poutanen,2013-03-26 Consumers are increasingly seeking foods that are rich in dietary fibre and wholegrains, but are often unwilling to compromise on sensory quality. Fibre-rich and wholegrain food reviews key research and best industry practice in the development of fibre-enriched and wholegrain products that efficiently meet customer requirements. Part one introduces the key issues surrounding the analysis, definition, regulation and health claims associated with dietary fibre and wholegrain foods. The links between wholegrain foods and health, the range of fibre dietary ingredients and a comparison of their technical functionality are discussed, as are consumption and consumer challenges of wholegrain foods. Part two goes on to explore dietary fibre sources, including wheat and non-wheat cereal dietary fibre ingredients, vegetable, fruit and potato fibres. Improving the quality of fibre-rich and wholegrain foods, including such cereal products as wholegrain bread, muffins, pasta and noodles, is the focus of part three. Fibre in extruded products is also investigated before part four reviews quality improvement of fibre-enriched dairy products, meat products, seafood, beverages and snack foods. Companion animal nutrition as affected by dietary fibre inclusion is discussed, before the book concludes with a consideration of soluble and insoluble fibre in infant nutrition. With its distinguished editors and international team of expert contributors, Fibre-rich and wholegrain foods provides a comprehensive guide to the field for researchers working in both the food industry and academia, as well as all those involved in the development, production and use of fibre-enriched and wholegrain foods.
