Essays in Life Writing Kylie Cardell,2021-11-29 This book showcases a unique, innovative form for contemporary life narrative scholarship. Life Narrative is a dynamic and interdisciplinary field defined through attention to diverse styles of personal and auto/biographical narration and to subjectivity and ethics in acts of self-representation. The essay is a uniquely sympathetic mode for such scholarship, responsive to diverse methods, genres, and concepts and enabling a flexible, hybrid critical and creative approach. Many of the essays curated for this volume are by the authors of creative works of life writing who are seeking to reflect critically on disciplinary issues connected to practice, ethics, audience, or genre. Others show academics from a variety of disciplinary backgrounds engaged in creative critical self-reflection, using methods of cultural analysis, ethnography, or embodied scholarship to address foundational and emerging issues and concepts in relation to identity, experience, or subjectivity. Essays in Life Writing positions the essay as a unique nexus of creative and critical practice, available to academics publishing peer-reviewed scholarly work from a variety of disciplinary backgrounds, and a form of scholarship that is contributing in exciting and vigorous ways to the development of new knowledge in Life Narrative as a field. The chapters in this book were originally published as a special issue of the journal Life Writing.

The Far Right and the Environment Bernhard Forchtner,2019-09-10 At the beginning of the twenty-first century, both the crisis of liberal democracy, as visible in, for example, the rise of far-right actors in Europe and the United States, and environmental crises, from declining biodiversity to climate change, are increasingly in the public spotlight. Whilst both areas have been analysed extensively on their own, *The Far Right and the Environment: Politics, Discourse and Communication* provides much needed insights into their intersection by illuminating the environmental communication of far-right party and non-party actors in Europe and the United States. Although commonly perceived as a ‘left-wing’ issue today, concerns over the natural environment by the far right have a long, ideology-driven history. Thus, it is not surprising that some members of the far right offer distinctive ecological visions of communal life, though, for example, climate-change scepticism is voiced too. Investigating this range of stances within their discourse about the natural environment provides a window into the wider politics of the far right and points to a close connection between the politics of identity and the imagination of nature. Connecting the fields of environmental communication and study of the far right, contributions to this edited volume therefore offer timely assessments of this often-overlooked dimension of far-right politics.
