Rebecca's Reward (Daughters of Blessing Book #4) Lauraine Snelling,2008-10-01 Nineteen-year-old Rebecca Baard has experienced more than her share of sorrow, and now she is afraid to open her heart to love. Besides, no man has ever shown enough interest in her to come courting. So Rebecca's friends set out to remedy the situation, concocting social events to attract all the eligible bachelors in Blessing and advising her in the use of feminine wiles. When none of these efforts seem to work, Rebecca tries yet another tack, only to discover that even the best of intentions can't keep events from taking a surprising turn. Will Rebecca overcome her fears, or will she settle for something less than love?

**Reward Systems** Steve Kerr,Glenn Rifkin,2008-12-04 It's one of the thorniest management problems around: dealing with unmotivated, low-performing employees. It's easy to point the finger of blame at them. But in most companies, it's the reward system, not the workforce, that's causing poor attitudes and performance: many reward systems actually discourage desired behaviors while rewarding the very actions that drive executives crazy. In *Reward Systems: Does Yours Deliver?* Steve Kerr describes the steps you must take to create an effective reward system: - Clarify what you mean by performance -- in ways that help employees understand how they can support what you're trying to accomplish - Devise an effective performance-measurement system that distinguishes between metrics used for control and those used for employees' development - Design a reward system that motivates people to do what you want them to do while also meeting their needs To get the most from employees, you don't need to add headcount, upgrade your IT capabilities, or hire consultants. You do need to develop the right reward system. This book shows you how. From our new Memo to the CEO series -- solutions-focused advice from today's leading practitioners.

**Reward System** Jem Calder,2022-07-19 Named a Best Book of the Year by The Guardian ● Esquire ● The White Review ● NPR Jem Calder's *Reward System* is a set of ultra-contemporary and electrifyingly fresh fictions about a generation on the cusp, enmeshed in Zooms and lockdowns, loneliness and love. Audacious fictions for a generation wondering: What now? Julia has landed a fresh start at an up-and-coming city restaurant. Imagine that, says her mother. I'm imagining. Her ex-boyfriend Nick is flirting with sobriety and nobody else. Did you know that adults his age are more likely to live with their parents than with a romantic partner? Life should have started to take shape by now—but instead we're trying on new versions of ourselves, swiping left and right, searching for a good answer to the question What do you do?

**Punished by Rewards** Alfie Kohn,1999 Criticizes the system of motivating through reward, offering arguments for motivating people by working with them instead of doing things to them.

Risk/Reward Anne Kreamer,2015-06-09 A persuasive and eye-opening look at the importance of embracing risk in our working lives—and how to use it to achieve lifelong career success Some of us relish the chance to fly without a net, others . . . not so much. But no matter how adventurous we might be in our personal lives, most of us are wary of allowing risk into our careers. With an economy in constant flux and a job market in which uncertainty is the only constant, stepping outside one's comfort zone can feel dangerous. But as the findings of this eye-opening and urgent book

attest, the avoidance of risk might pose the greatest danger of all to our career prospects. In *Risk/Reward*, trend-spotter and career guru Anne Kreamer makes the compelling case that embracing risk is essential to managing a twenty-first-century career. Risk-taking isn't just for entrepreneurs, nor does it require working on a figurative tightrope. Rather, Kreamer says, conscious, consistent, and modest risk-taking can help us become more able to recognize opportunity when it appears, and more likely to seize the chance to make the right change at the right moment. *Risk/Reward* presents a framework for making the most of today's ever-evolving workplace and turning risk-taking into a daily practice. Using proprietary data from three national studies about the American worker, Kreamer explores the importance of career risk-taking through profiles of four Risk/Reward personality types: Pioneers, Thinkers, Defenders, and Drifters. She presents a Risk/Reward Matrix that anyone can use to identify his or her own innate risk threshold, and she identifies constructive ways to implement risk in everyday situations—from initiating an uncomfortable conversation with a boss to sharing out-of-the-box ideas with colleagues or constructively challenging long-held practices in an organization. Peppered throughout *Risk/Reward* are insights and hard-won wisdom from notable achievers such as bestselling author Anna Quindlen, journalist Jane Pauley, CNBC financial maven Jim Cramer, thought leader Po Bronson, and Facebook COO Sheryl Sandberg. Timely and insightful, *Risk/Reward* is a unique blend of practical and inspirational wisdom that even the most risk-averse person can harness on the path toward success and fulfillment. Praise for Anne Kreamer's *It's Always Personal: Navigating Emotion in the New Workplace* "A stimulating read bolstered by . . . some of the best recent work on emotional intelligence and the science of happiness."—*The Wall Street Journal* "So what should be the rules and boundaries for showing how you feel while you work? That's a question asked and answered in Anne Kreamer's fascinating . . . look at an issue that rarely gets discussed."—*The Washington Post* "Finally, someone is willing to unpack the morass of anger, anxiety, sadness, and joy that drives the workday. . . . [Kreamer] has hit the 'It's about time!' button."—*Elle* "[A] lively, well-researched exploration of emotions on the job."—*Oprah.com* "Explores how to be true to your 'emotional flashpoints—anger, fear, anxiety, empathy, happiness and crying'—without sabotaging your career."—*The New York Times Book Review*

Neurobiology of Sensation and Reward Jay A. Gottfried, 2011-03-28 Synthesizing coverage of sensation and reward into a comprehensive systems overview, *Neurobiology of Sensation and Reward* presents a cutting-edge and multidisciplinary approach to the interplay of sensory and reward processing in the brain. While over the past 70 years these areas have drifted apart, this book makes a case for reuniting sensation and reward by highlighting the important links and interface between the two. Emphasizing the role of reward in reinforcing behaviors, the book begins with an exploration of the history, ecology, and evolution of sensation and reward. Progressing through the five senses, contributors explore how the brain extracts information from sensory cues. The chapter authors examine how different animal species predict rewards, thereby integrating sensation and reward in learning, focusing on effects in anatomy, physiology, and behavior. Drawing on empirical research, contributors build on the themes of the book to present insights into the human sensory rewards of perfume, art, and music, setting the scene for further cross-disciplinary collaborations that bridge the neurobiological interface between sensation and reward.

**Reward System** Jem Calder, 2022-07-19 "Reward System is an exhilarating and beautiful book by an extraordinarily gifted writer. Reading these stories, I found myself thinking newly and differently about contemporary life." —Sally Rooney, author of *Beautiful World, Where Are You* Julia has landed a fresh start—at a "pan-European" restaurant. "Imagine that," says her mother. "I'm imagining." Nick is flirting with sobriety and nobody else. Did you know adults his age are now more likely to live with their parents than with a romantic partner? Life should have started to take shape by now—but instead we're trying on new versions of ourselves, swiping left and right, searching for a convincing answer to that question: "What do you do?" Jem Calder's *Reward System* is a set of ultra-contemporary and electrifyingly fresh fictions about work, relationships, and the strange loop of technology and the self. They are about a generation on the cusp: the story of two people enmeshed in Zooms and lockdowns, loneliness and love, devices and desires. Hyperaware but also deeply confused about who they are, Julia and Nick reveal the way we live now in a startling new light.

**Five Thousand Dollars Reward** A. Frank [pseud.] Pinkerton, 2014-12-09 [...] No? Wal, he didn't like me. I reckon I'll hev a kiss afore I go, anyhow. He began to move toward her. She started to escape through the open door, but was not quick enough. The man's hand grasped her arm and she felt herself drawn toward him. Then Victoria Vane uttered a piercing scream. Stop that yellin', you fool! hissed the tramp. He drew her to him and bent to press his bearded lips to her cheek. [...].

The Hidden Costs of Reward Mark R. Lepper, David Greene, 2015-09-16 Originally published in 1978, this volume provided a broad survey of the latest research and theory, at the time, concerning the potential detrimental effects of inappropriate uses of tangible rewards to modify behaviour. Overall, this research questions the dominant paradigm within which reinforcers, by definition, have positive effects on performance and subsequent behaviour, and suggests new directions for the study of human motivation. In a series of five original integrative essays, the contributors summarize their own and related research programmes. These theoretical essays are complemented by two introductory chapters, that provide a historical context for this research, and four discussion chapters, that speak to broader issues, including both the implications and limitations of the research presented. At the time, this was the latest information on a most provocative area.

**Reward Management** Michael Armstrong, Helen Murlis, 2007 Based on the authors' experience, research and benchmarking activities, this definitive book explains that reward management is about performance - of individuals, teams and the whole organization. It examines in detail the processes and various approaches that can be adopted to achieve and reward outstanding skill and competence levels in the workplace. Comprehensive and highly practical in its approach, it takes a strategic perspective and addresses the wide gap that exists between theory and

practice, with a focus on the implications for practitioners. This revised fifth edition includes new and updated chapters on age discrimination, bonus schemes, recognition schemes and pensions.

Drive Daniel H. Pink, 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing*. Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.
