**Advances in Understanding Human Performance** Tadeusz Marek, Waldemar Karwowski, Valerie Rice, 2010-06-21 Combining emerging concepts, theories, and applications of human factors knowledge, this volume focuses on discovery and understanding of human performance issues in complex systems, including recent advances in neural basis of human behavior at work (i.e. neuroergonomics), training, and universal design. The book is organized into ten sections that focus on the following subject matters: I: Neuroergonomics: Workload Assessment II: Models and Measurement in Neuroergonomics III: Neuroergonomics and Human Performance IV: Neuroergonomics and Training Issues V: Trainees: Designing for Those in Training VI: Military Human Factors: Designing for Those in the Armed Forces VII: New Programs/New Places: Designing for Those Unfamiliar with Human Factors VIII: Universal Design: Designing to Include Everyone IX: Designing for People with Disabilities X: Children and Elderly: Designing for Those of Different Ages Sections I through IV of this book focus on neuroscience of human performance in complex systems, with emphasis on the assessment and modeling of cognitive workload, fatigue, and training effectiveness. Sections V through X concentrate on applying human factors to special populations, with the caveat that the design information may not generalize to (or be of interest to) other populations. This broadens the conventional definition which limits special populations to those who have limitations in their functional abilities, i.e. those with chronic disabilities due to illness, injury, or aging. Thus, special populations can incorporate certain investigations and designs focused on military, students, or even developing countries and those naïve to the field of human factors, as well as those who are affected by disabilities and aging (both young and old). Many chapters of this book focus on analysis, design, and evaluation of challenges affecting students, trainees, members of the military, persons with disabilities, and universal design. In general, the chapters are organized to move from a more general, to a more specialized application. For example, the subtopics for those with disabilities include designing websites, workstations, housing, entrepreneur training, communication strategies, products, environments, public transportation systems, and communities. This book is of special value to a large variety of professionals, researchers and students in the broad field of human performance who are interested in neuroergonomics, training effectiveness, and universal design and operation of products and processes, as well as management of work systems in contemporary society. We hope this book is informative, but even more - that it is thought provoking. We hope it inspires, leading the reader to contemplate other questions, applications, and potential solutions in creating designs that improve function, efficiency, and ease-of-use for all. Seven other titles in the Advances in Human Factors and Ergonomics Series are: Advances in Human Factors and Ergonomics in Healthcare Advances in Applied Digital Human Modeling Advances in Cross-Cultural Decision Making Advances in Cognitive Ergonomics Advances in Occupational, Social and Organizational Ergonomics Advances in Human Factors, Ergonomics and Safety in Manufacturing and Service Industries Advances in Ergonomics Modeling & Usability Evaluation

It became known as Anthrax Island. Now government scientists have returned to the island. They become stranded by an equipment failure and so John Tyler is flown in to fix the problem. He quickly discovers there's more than research going on. When one of the scientists is found impossibly murdered inside a sealed room, Tyler realises he's trapped with a killer... A gripping thriller that will leave you guessing until the final page. Perfect for fans of Terry Hayes, James Swallow and Alistair MacLean. **Talking Collective Action** Ole Pütz, 2019-07-17 An ethnographic study of anti-nuclear movement groups that both challenges assumptions of traditional social movement studies of strategic action and shows what can be gained through microanalysis of talk in meetings, this book advances social movement studies methodologically and theoretically through the application of a new method of sequential analysis. Drawing on both conversation analysis and objective hermeneutics, it builds on microanalysis to scale up from sequences of talk to meetings, from meetings to groups, and from groups to the anti-nuclear movement, thus addressing a common criticism of analyses of face-to-face interactions: that they fail to demonstrate how their findings are relevant for questions beyond the interaction itself and thus for a broader sociological audience. A demonstration of the ways in which strategic deliberations by activists are subject to dynamics of face-to-face interaction, Talking Collective Action shows how groups adopt different styles of planning to engage with their environment and affect the groups' development over time. As such, it will appeal to social scientists with interests in social movements, organizations and conversation analysis.

**Every Week a Season** Brian Curtis, 2007-12-18 "Brian Curtis tells the stories behind the stories. He brings the meetings, practice sessions, recruiting calls and game day experience to light like never before. Fans who want to know what goes on behind the scenes will find out in this book." –RON ZOOK, head football coach, the University of Florida In Every Week a Season, acclaimed sports reporter and author Brian Curtis takes readers on an unprecedented whirlwind tour of NCAA Division I football. It's a world that breeds great drama, a world that millions watch but few understand. It is a multibillion-dollar business. It is an obsession. To get to the beating heart of college football, Curtis embarked on a breakneck itinerary that took him where all red-blooded college football fans long to be: behind the scenes at nine big-time programs. In nine weeks, Curtis visited Colorado State University, the University of Georgia, Boston College, the University of Tennessee, the University of Maryland, the University of Wisconsin, Louisiana State University, Florida State University, and Arizona State University. He braved the rain to watch

Wisconsin pull off the upset of the year; he was at Neyland Stadium to see Tennessee manage a thrilling overtime victory; he was in Tallahassee to witness Florida State's dramatic double overtime battle for the ACC title. As added bonuses, he was with Georgia when the team fought for the SEC Championship, and on the LSU sideline when the boys from Baton Rouge defeated Oklahoma to capture the BCS National Championship. At each stop, he brings us inside the game's inner sanctum: in team meetings and scouting sessions; on the field and on the sidelines, during scrimmages, practices, and games; at pre-game traditions, meals, and religious services; in the locker room before the game and at half-time. Virtually nothing and no one was off-limits. Along with the players, Curtis got to know the coaches—from the young guns to the legends—spending time with them in their offices and on the road. We see firsthand the challenges of running a major college football program—when called on, coaches must serve as CEOs, PR gurus, lawyers, politicians, and policemen. We also learn of the sacrifices made by wives and children that enable coaches to keep the numerous young athletes under their supervision focused, secure, and happy. Brian Curtis gives a no-holds-barred insider's account that will rank as one of the most honest and accurate books on big-time sports in America. Short of strapping on a helmet, you'll never get closer to the game.

**Wrecked on the Bermudas** William E. Meyer,1892

**Casper the Commuting Cat** Susan Finden,2010-08-05 Casper became a national celebrity when newspapers ran the story of the amazing cat that regularly took the No. 3 bus on 11-mile journeys around his home town, Plymouth, in Devon. While his devoted owner, Susan Finden, had wondered where her elusive pet was disappearing to each day, Casper was brightening the lives of countless commuters as they went about their business. Bus drivers, too, were getting well-acquainted with Casper, and notices went up in their depot alerting staff that a very special passenger might board their vehicle. In fact, he became a mascot for the bus company, and pictures of him and Susan adorned No. 3 buses. When Casper was sadly killed by a car in early 2010 messages of sympathy flooded in from places as far a field as Australia and Argentina. It quickly became clear that Casper and his remarkable story had touched the lives of so many people around the world. Movingly told by the owner who loved him dearly, Casper the Commuting Cat is the touching story of a very special black-and-white cat who rode the bus and stole our hearts.

**The Unthinkable Revolution in Iran** Charles Kurzman,2005-09-06 The shah of Iran, Mohammad Reza Pahlavi, would remain on the throne for the foreseeable future: This was the firm conclusion of a top-secret CIA analysis issued in October 1978. One hundred days later the shah--despite his massive military, fearsome security police, and superpower support was overthrown by a popular and largely peaceful revolution. But the CIA was not alone in its myopia, as Charles Kurzman reveals in this penetrating work; Iranians themselves, except for a tiny minority, considered a revolution inconceivable until it actually occurred. Revisiting the circumstances surrounding the fall of the shah, Kurzman offers rare insight into the nature and evolution of the Iranian revolution and into the ultimate unpredictability of protest movements in general. As one Iranian recalls, The future was up in the air. Through interviews and eyewitness accounts, declassified security documents and underground pamphlets, Kurzman documents the overwhelming sense of confusion that gripped pre-revolutionary Iran, and that characterizes major protest movements. His book provides a striking picture of the chaotic conditions under which Iranians acted, participating in protest only when they expected others to do so too, the process approaching critical mass in unforeseen and unforeseeable ways. Only when large numbers of Iranians began to think the unthinkable, in the words of the U.S. ambassador, did revolutionary expectations become a self-fulfilling prophecy. A corrective to 20-20 hindsight, this book reveals shortcomings of analyses that make the Iranian revolution or any major protest movement seem inevitable in retrospect.
