Daimler V8 S.P. 250 Brian Long,2008-01-15 Today very much part of the classic car scene around the world, the Daimler SP250 sports car has a fascinating and eventful history. The idea of staid and traditional Daimler building an open sports car is surprising enough in itself: that the car should be fiberglass-bodied, V8 engined and have a daring futuristic appearance stretches credibility to the limit...but that's exactly what the company did produce between 1959 and 1964. A bold new design, the "Dart" as it was originally to be called, should have been struggling Daimler's savior and a springboard to a range of new models, including saloons and coupes. Things didn't quite work out that way and Daimler was acquired by Jaguar, which led to the SP250's Edward Turner-designed V8

engine being used in a Daimler-badged version of the Jaguar MkII saloon. Here is the full story of the SP250 including concept, development and production history. Also covered are related models, specials, buying and restoration, chassis numbers, production numbers, color schemes, clubs and specialists. Altogether a source book of essential information for SP250 and Daimler enthusiasts.

Ferrari 333 SP Terry O'Neil, 2015-06-01 This book details the origin and racing history of the Ferrari 333 SP. Uniquely, none of the 333 SP models were entered into races by Ferrari itself. The cars were built specifically for customer use; a purchase price of \$900,000 included two spare engines and race technical support supplied by Ferrari engineers. A total of 40 cars were built; the first four by Ferrari, the remainder manufactured by Dallara & Michellotto using Ferrari engines. All of the cars were sold to, and race entries made by, privateer teams. From 1994, the cars contested the IMSA World Sports Car Championship, the United States Road Racing Championship, and the American Le Mans Series, at circuits throughout North America. In 1997, the cars also featured in the Europe-based International Sports Racing Series, as well as the 24 Hours of Le Mans. Two years later, the Doran-Lista team installed a Judd V10 engine into its 333 SP, with the aim of increasing power and improving fuel efficiency. In all, from the 126 races entered, 47 victories were claimed by the 333 SP.

eSourcing Capability Model for Service Providers eSCM-SP Bill Hefley, 2015-01-01 The eSourcing Capability Model for Service Providers (eSCM-SP) is the best practices model that supports sourcing organizations successfully manage and reduce their risks and improve their capabilities across the entire sourcing life-cycle. It addresses the critical issues related

to IT-enabled sourcing (eSourcing) for both outsourced and in-sourced (shared services) agreements. Each of the Model's 84 Practice is distributed along three easy to follow dimensions: Sourcing Life-cycle, Capability Area, and Capability Level, and have been applied in IT, BPO, and KPO settings. The eSCM-SP has been designed to complement existing quality models so that service providers can capitalize on their previous improvement efforts. ITIL V3 suggests that ITIL be supplemented with eSCM when service management is performed in the context of a sourcing arrangement. A series of documents comparing the eSCM-SP with other models and standards has been developed. Developed by The IT Services Qualification Center (ITSqc) and endorsed by a number of organizations including IAOP (International Association of Outsourcing Professionals), this title represents a major step forward for professionals looking to implement Best Practice within the Industry.
