*Need for Speed* Brian Kelleher,2014-02-25 Buckle up . . . Tobey Marshall is a mechanic struggling to save his family-owned garage. While he and his team skillfully build and race muscle cars on the side, it's not enough to keep the doors open. He reluctantly partners with his longtime rival, a wealthy, arrogant ex-professional racer, Dino Brewster. But just as a major sale to car broker Julia Bonet looks as though it will save Tobey's business, a disastrous, unsanctioned race results in Dino framing Tobey for manslaughter. Two years later, Tobey is fresh out of prison and eager for revenge. To take Dino down, he plans to enter the high-stakes De Leon race—the biggest contest of underground racing in the world—to get the money to reclaim his family business and expose Dino's deception. But getting there won't be easy, as Tobey must run a high-octane, pedal-to-the-floor gauntlet, dodging cops coast to coast and dealing with fallout from a dangerous bounty on his car. Luckily, with his team—and the surprisingly resourceful Julia—on his side, he just might defy the odds . . .

*Ultimate Speed* Samuel Hawley,Craig Breedlove,2018-10-02 An L.A. hot rodder with a high school education, a family to support and almost no money, Craig Breedlove set out in the late 1950s to do something big: harness the thrust of a jet in a car. With a growing obsession that would cost him his marriage, he started building in his dad's garage. The car's name: Spirit of America. Through perseverance and endless hard work, Craig completed Spirit and broke the land speed record on the Bonneville Salt Flats, setting a new mark of 407 mph in 1963. In the early 1970s he turned to rockets and set an acceleration record at Bonneville that stands to this day. He built a jet car in the 1990s, Spirit of America-Sonic Arrow, to go head-to-head against Britain's ThrustSSC to be the first to Mach One. Craig's subsequent crash at 675 mph remains the fastest in history. Even today, at the age of 80, he is going strong with plans for yet another Spirit of America racer. The ultimate goal: 1,000 mph. *Ultimate Speed* is the authorized biography of Craig Breedlove, a candid revelation of one of motorsports' most interesting figures based primarily on countless hours of interviews with Craig and dozens of people connected to his life.

**The History of Speed** Martin Roach,2020-10-29 'A special treat...The pictures and stories combine to provide a rich texture to telling the difficult story of why we chase speed like an addiction.' Valerie Thompson, the world's fastest female motorcycle racer Ever since we built machines that could transport us, there has been a desire to find ways to make them go faster. For some, going faster isn't enough - they want to be the fastest. This book celebrates those who have built the machines and driven them at ever greater

speeds. This is *The History of Speed*. Bestselling motorsport writer Martin Roach tells the extraordinary story of those who have come to be obsessed by speed. From Camille Jenatzy, 'the Red Devil', who became the first man to drive at over 100kmh in 1899, through the golden age of Malcolm Campbell and his Bluebird, and on to the modern era of jet- and rocket-propelled cars, we have gone faster and faster. But this book is not just about these record-breakers, Roach also looks at the technology, the engines and the inventors who helped progress in speed at all levels, from Formula One to the supercars from the likes of Ferrari and Mercedes that are eagerly snapped up by collectors, rarely to be seen on the road. Accompanied by some of the most stunning images of the cars and those who made and drove them, Roach tells a wonderful story of innovation and invention. He talks to some of the great drivers to find out what inspires them to risk their lives, and finds out from engineers how they developed their ideas. Along the way, we hear some remarkable tale and anecdotes, but also find out how the pursuit of speed can also have its costs, with many tragic heroes and heroines falling along the way. If you've ever thrilled to the roar of a sports car engine, of loved the feel of the g-force as you accelerate away, or even looked on in wonder at a powerful engine, *The History of Speed* is a book that you will not want to miss out on.

Every NASCAR fan—at one time or another—asks the same question: Why isn't my favorite driver winning? This is your chance to discover how much more there is to NASCAR than "Go fast, turn left and don't crash." If you've ever wondered why racecars don't have mufflers, how "bump drafting" works, or what in the world "Let's go up a pound on the right rear and add half a round of wedge" means, *The Physics of NASCAR* is for you. In this fast-paced investigation into the adrenaline-pumping world of NASCAR, a physicist with a passion uncovers what happens when the rubber hits the road and 800-horsepower vehicles compete at 190 miles per hour only inches from one another. Diandra Leslie-Pelecky tells her story in terms anyone who drives a car—and maybe occasionally looks under the hood—can understand. How do drivers walk away from serious crashes? How can two cars travel faster together than either car can on its own? How do you dress for a 1800°F gasoline fire? In simple yet detailed, high-octane prose, this is the ultimate thrill ride for armchair speed demons, auto science buffs, and NASCAR fans at every level of interest. Readers, start your engines.

Bonneville's Women of Land Speed Racing "LandSpeed" Louise Ann Noeth, 2021-07-12 At Bonneville, record holders must first earn the right to present themselves on the starting line. This requires passing rigorous safety and technical checks for driver, rider, and speed machine. Gender is inconsequential. Through the years, more than 200 women have made the cut and donned fireproof clothing

and helmets. Dozens have set land speed records--35 in excess of 200 miles per hour, six above 300 miles per hour, and one deaf female racer who roared past 500 miles per hour. Equally impressive are the women who helped propel the helmeted gals into glory. Few know how many women are skilled fabricators, mechanics, crew chiefs, and all-round land speed racing experts, all working out on a brutal, merciless, and barren sodium-soaked playa. And for decades dedicated volunteers have not only put down that all-important starting line but erected a speed village that inspired tens of thousands to visit, taunting the timing lights run after run. Since 1949, women have played an integral part. Without question, land speed racing has more women actively participating and setting records than any other segment of motorsports in the world.

Cafe Racers Michael Lichter, Paul d'Orleans, 2014-06-15 DIVA photographic chronology of some of the fastest, most stylish, and most individualized bikes in motorcycling history.Originally used as a slur against riders who used hopped-up motorcycles to travel from one transport café to another, "café racer" describes a bike genre that first became popular in 1960s British rocker subculture—although the motorcycles were also common in Italy, France, and other European countries. The rebellious rock-and-roll counterculture is what first inspired these fast, personalized, and distinctive bikes, with their owners often racing down public roads in excess of 100 miles per hour ("ton up," in British slang), leading to their public branding as "ton-up boys." Café Racers traces café racer motorcycles from their origins in the mid-twentieth century all the way into modern times, where the style has made a recent comeback in North America and Europe alike, through the museum-quality portraiture of top motorcycle photographer Michael Lichter and the text of motorcycle culture expert Paul d'Orléans. Chronologically illustrated with fascinating historical photography, the book travels through the numerous ever-morphing and unique eras of these nimble, lean, light, and head-turning machines. Café Racers visually celebrates a motorcycle riding culture as complex as the vast array of bikes within it.
