Safer Sean Doolittle, 2009-02-24 From *Dirt to The Cleanup*, Sean Doolittle has dazzled critics and defied expectations, garnering bolder critical raves with each new novel. "Stylishly written" hailed the New York Times Book Review . . . "Superb" declared the Wall Street Journal . . . "Heart-stopping, gut-clenching, eye-opening" raved the Chicago Tribune. Now Doolittle fulfills all that promise—and more—in *Safer*, a powerhouse of suspense that will catch you off guard at every turn. . . . A young couple moves into an idyllic little cul-de-sac and ignites a harrowing journey into darkness as a shocking accusation is made, a family is shattered, and the mystery of a long-ago crime begins to unravel. For Paul Callaway and his wife, Sara, moving from the East Coast to a quiet midwestern town was a major adjustment. But right from the start, Paul has tried to fit in. He's played golf with the guys. He's even joined the Neighborhood Patrol, grabbing a flashlight and a walkie-talkie to make these neatly tended streets even safer. Then Paul makes one mistake—and now they want him gone. But nothing could have prepared Paul and Sara for the quarrel that has erupted between Paul and a neighbor—the self-appointed leader of the Neighborhood Patrol. Or for the next outrage, as police arrest Paul for a sordid crime he didn't commit. Suddenly Paul's life, university career, and marriage are at risk, as he finds himself locked in a desperate fight with an angry man, a dark conspiracy, and a secret that began with a child's disappearance ten years before.

Watch Yourself Matt Hern, 2007-07-15 From warnings on coffee cups to colour-coded terrorist gauges to ubiquitous security cameras, our culture is obsessed with safety. Some of this is driven by lawyers and insurance companies, and some by over-zealous public officials, but much is indicative

of a cultural conversation that has lost its bearings. The result is not just a neurotically restrictive society, but one which actively undermines individual and community self-reliance. More importantly, we are creating a world of officious administration, management by statistics, absurd regulations, rampaging lawsuits, and hygenically cleansed public spaces. We are trying to render the human and natural worlds predictable and calculated. In doing so, we are trampling common discourse about politics and ethics. Hern asserts that safer just isn't always better. Throughout Watch Yourself, he emphasizes the need to rethink our approach to risk, reconsider our fixation with safety, and reassert individual decision-making.

SAFER Electronic Health Records Dean F. Sittig, Hardeep Singh, 2015-04-14 This important volume provide a one-stop resource on the SAFER Guides along with the guides themselves and information on their use, development, and evaluation. The Safety Assurance Factors for EHR Resilience (SAFER) guides, developed by the editors of this book, identify recommended practices to optimize the safety and safe use of electronic health records (EHRs). These guides are designed to help organizations self-assess the safety and effectiveness of their EHR implementations, identify specific areas of vulnerability, and change their cultures and practices to mitigate risks. This book provides EHR designers, developers, implementers, users, and policymakers with the requisite historical context, clinical informatics knowledge, and real-world, practical guidance to enable them to utilize the SAFER Guides to proactively assess the safety and effectiveness of their electronic health records EHR implementations. The first five chapters are designed to provide readers with the conceptual knowledge required to understand why and how the guides were developed. The next nine chapters

focus on the underlying informatics concepts, key research activities, and methods used to develop each of the guides. Each of these chapters concludes with a copy of the guide itself. The final chapter provides a vision for the future and the work required to ensure that future generations of EHRs are designed, developed, implemented, and used to improve the overall safety of the EHR-enabled healthcare system. Taken together, the information provided in this book should help any organization, whether large or small, implement its EHR program and improve the safety and effectiveness of its existing EHR-enabled healthcare systems. This volume will be extremely valuable to small, ambulatory physician practices and larger outpatient settings as well as for hospitals and professors and instructors charged with teaching safe and effective implementation and use of EHRs. It will also be highly useful for health information technology professionals responsible for maintaining a safe and effective EHR and for clinical and administrative staff working in EHR-enabled healthcare systems.

Making Spaces Safer Shawna Potter, 2019-05-14 Shawna Potter has been a touring musician for over twenty years--and has been sexually harassed for just as long. Here's her DIY guide to fighting back.

I Can Make My World a Safer Place Paul Kivel, 2001 Through simple text, eye-catching drawings, and activities such as mazes, crosswords, and word searches, this book encourages kids to think about and act to promote peace at home, in their communities, and in the world. Harriet Tubman, Cesar Chavez, and Julia Butterfly are among those profiled as positive activists. The book differentiates public danger (gangs, drug-related violence) from private (sexual assault, domestic violence) and provides ways to stay safe and get help when necessary.

Engineering a Safer World Nancy G. Leveson, 2012-01-13 A new approach to safety, based on systems thinking, that is more effective, less costly, and easier to use than current techniques. Engineering has experienced a technological revolution, but the basic engineering techniques applied in safety and reliability engineering, created in a simpler, analog world, have changed very little over the years. In this groundbreaking book, Nancy Leveson proposes a new approach to safety—more suited to today's complex, sociotechnical, software-intensive world—based on modern systems thinking and systems theory. Revisiting and updating ideas pioneered by 1950s aerospace engineers in their System Safety concept, and testing her new model extensively on real-world examples, Leveson has created a new approach to safety that is more effective, less expensive, and easier to use than current techniques. Arguing that traditional models of causality are inadequate, Leveson presents a new, extended model of causation (Systems-Theoretic Accident Model and Processes, or STAMP), then shows how the new model can be used to create techniques for system safety engineering, including accident analysis, hazard analysis, system design, safety in operations, and management of safety-critical systems. She applies the new techniques to real-world events including the friendly-fire loss of a U.S. Blackhawk helicopter in the first Gulf War; the Vioxx recall; the U.S. Navy SUBSAFE program; and the bacterial contamination of a public water supply in a Canadian town. Leveson's approach is relevant even beyond safety engineering, offering techniques for “reengineering” any large sociotechnical system to improve safety and manage risk.

Marijuana is Safer Steve Fox, Paul Armentano, Mason Tvert, 2013-09-01 In 2012,

voters in Colorado shocked the political establishment by making the use of marijuana legal for anyone in the state twenty-one years of age or older. In the wake of that unprecedented victory, nationally recognized marijuana-policy experts Steve Fox, Paul Armentano, and Mason Tvert revisit the Marijuana Is Safer message that contributed to the campaign's success--as the first edition of this book predicted it would in 2009. In this updated and expanded edition, the authors include a new chapter on the victory in Colorado and updates on a growing mountain of research that supports their position. Through an objective examination of marijuana and alcohol, and the laws and social practices that steer people toward the latter, the authors pose a simple yet rarely considered question: Why do we punish adults who make the rational, safer choice to use marijuana instead of alcohol? For those unfamiliar with marijuana, Marijuana Is Safer provides an introduction to the cannabis plant and its effects on the user, and debunks some of the government's most frequently cited marijuana myths. More importantly, for the millions of Americans who want to advance the cause of marijuana policy reform--or simply want to defend their own personal, safer choice--this book provides the talking points and detailed information needed to make persuasive arguments to friends, family, coworkers, elected officials and, of course, future voters.

Safer Beaches Tom Griffiths, 2011 Safer Beaches: Planning, Design, and Operation offers a systematic approach to planning, designing, renovating, and operating all types of beaches. It provides practices in beach management and protection and uses a needs-analysis approach to help you identify programming and activities that will maximize people's experience at the beach.

Are We Safer Now? Byron L. Cherry, 2006 Airline safety and airline security are two of the most important issues facing this nation and the world today.

As a doctoral student, author Byron Cherry researched and studied the airline industry for two years. His case study outlines his findings and how passengers' perceptions of airline safety and airline security have changed since September 11, 2001. Cherry interviews many subjects who provide such varied answers to his question about fear of another terrorist attack as I am more afraid of thunderstorms and microburst than I am of terrorism, to I fear another attack someday will occur due to human error or a daring attack not unlike 9/11. Cherry brings to the forefront the major issues that have emerged since 9/11, such as poor passenger screening methods. He also explains the implications for leaders within the airline industry and the federal government, details the limitations of the study, and makes recommendations for future research. September 11, 2001, was a day that most Americans will never forget as long they live. Are We Safer Now? Airline Security in a Post-9/11 Society offers an interesting glance into understanding the factors that influenced the change in passengers' perceptions of how safe they really are when traveling by air.

Safer Than a Known Way Pamela Rosewell Moore, 1988

To Err Is Human Institute of Medicine, Committee on Quality of Health Care in America, 2000-03-01 Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. To Err Is Human breaks the silence that has

surrounded medical errors and their consequence—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, How can we learn from our mistakes? Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. To Err Is Human asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital

administrators, medical educators and students, health caregivers, health journalists, patient advocates—as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

Safer Vaccines Safer Children: Make Covid-19 Vaccines Safer by Protecting the Biochemistry Dr. Robert S. Caires DC Esq. inactive, 2020-10-18 How many vaccines that contain unnatural to human biology chemicals can be injected before your children suffer autism or some other condition? The answer is unclear, which is why it is imperative to parents— for the sake of their children's health and very future—to never inject chemicals that could do irreparable harm. The less unnatural to human biology chemicals in vaccines the SAFER our children are. Dr. Robert Caires DC, Esq. inactive, a doctor and lawyer, explains why parents are placed in the uncomfortable position of refusing to vaccinate their children with vaccines that have unhealthy chemicals. Parents will consider SAFER vaccines. This book is a detailed account on how most vaccines are laced with harmful chemicals that can degenerate the health of children and even cause autism. Children deserve SAFER vaccines and parents need to protect children from CHEMICALIZATION! He makes a compelling argument that to assure SAFER vaccines, vaccination should not be mandated and that vaccine producers need to be held accountable and liable for injuries induced by vaccine chemicals. The priority must be safety, but for far too long, it's been all about profits. Be safe, not sorry; only consider SAFER vaccines. The autism epidemic rages on because the main etiology of autism is the unnatural to human biology chemicals in vaccines that penetrate brain cells. Empower yourself, keep your children safe, and help change the system with the insights in Safer Vaccines, Safer Children.

The SAFER-R Model George Everly, Jr., 2017-04 Psychological Crisis Intervention: The SAFER-R Model is designed to provide the reader with a simple set of guidelines for the provision of psychological first aid (PFA). The model of psychological first aid (PFA) for individuals presented in this volume is the SAFER-R model developed by the authors. Arguably it is the most widely used tactical model of crisis intervention in the world with roughly 1 million individuals trained in its operational and derivative guidelines. This model of PFA is not a therapy model nor a substitute for therapy. Rather it is designed to help crisis interventionists stabilize and mitigate acute crisis reactions in individuals, as opposed to groups. Guidelines for triage and referrals are also provided. Before plunging into the step-by-step guidelines, a brief history and terminological framework is provided. Lastly, recommendations for addressing specific psychological challenges (suicidal ideation, resistance to seeking professional psychological support, and depression) are provided.

Safer Skies David Soucie, 2015-02-17 The past and future of airline safety—a memoir of successes, crashes, and near misses—by a former FAA accident inspector. Boarding an airplane strikes at least a small sense of fear into most people. Even though we all have heard that the odds of being struck by lightning are greater than the odds of perishing in a plane crash, it still doesn't feel that way. Airplane crashes might be rare, but they do happen, and they're usually fatal. David Soucie insists that most of these deaths could be prevented. He's worked in the cockpit, on the hangar floor, within the aviation boardroom, and inside the Washington, DC, beltway. He's seen

death up close and personal—deaths of colleagues and friends that might have been prevented if he had approved certain safety measures in the aircraft they were handling. Years of experience have led Dave to become an impassioned consultant on the topic of airline safety. This includes not only advising the Obama administration, but also the Department of Transportation, the Department of Defense, Homeland Security, NASA, and the Office of National Intelligence. Soucie was also a lead consultant and analyst for coverage of Malaysia Airlines Flight 370, which went missing in March 2014. Find out the truth about airplane safety and discover what the future holds for air travel in Safer Skies.

Safer Sanctuaries , 2023-05-01 Since 1998, Safe Sanctuaries has been a trusted source of guidance for churches and other affiliated institutions as they work to reduce the risk of abuse in their communities through proven policies and practices. A changing world, however, requires a constant renewal of these trusted strategies along with new and updated approaches to the work of preventing abuse. Safer Sanctuaries: Nurturing Trust within Faith Communities builds on the strong foundation of past resources while also inspiring and preparing churches for the work of the future. Safer Sanctuaries acknowledges the fears that swirl around the subject of abuse and encourages churches to respond with honesty, open communication, and accountability to the challenges faced in these communities. This approach allows communities to encourage flourishing instead of fear and build welcoming, thriving communities that are open and safe for everyone. The seven sections of this resource walk through the theological grounding of

this work, the psychology of abuse prevention, the basic guidelines for risk reduction, age-level specific guidance, step-by-step instructions on designing and implementing a churchwide policy, how to respond to abuse, and an affirmation and encouragement for the work ahead. Safer Sanctuaries is also a comprehensive volume that includes chapters with guidance for working with: Nursery-age and preschool children Elementary-age children Youth People with disabilities Older adults Camping and retreat attendees College students Sample forms are also provided for help in screening workers, requesting background checks, checking references, and reporting suspected abuse. Building a safer sanctuary can be a life-giving and community enhancing work of ministry for a congregation. It can be an empowering, joyful way of being in community that promotes the safety and security of all people.

Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Safer : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature,

captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
