Super-Scenic Motorway Anne Mitchell Whisnant,2006-10-02 The most visited site in the National Park system, the 469-mile Blue Ridge Parkway winds along the ridges of the Appalachian mountains in Virginia and North Carolina. According to most accounts, the Parkway was a New Deal Godsend for the needy, built without conflict or opposition by landscape architects and planners who traced their vision along a scenic, isolated southern landscape. The historical archives relating to this massive public project, however, tell a different and much more complicated story, which Anne Mitchell Whisnant relates in this revealing history of the beloved roadway.

Outer Banks Scenic Byway Douglas Stover,2016-04-25 The Outer Banks National Scenic Byway stretches the length of North Carolina's 200-mile barrier islands. The unique maritime culture shared by the 21 coastal villages led to the road's designation as a National Scenic Byway in 2009. The route is entered from the north at Whalebone Junction in Nags Head, North Carolina, and from the south at the North River Bridge on US 70 East, just past Beaufort, North Carolina. Encompassing 142.5 driving miles, six and a half hours of travel time, and two ferries, the byway traverses Hatteras Island, Ocracoke, and Down East in Dare County and Hyde and Carteret Counties. This book explores the region's rich maritime history, culture, and traditions, such as boatbuilding, decoy carving, fishing, lighthouse-keeping, and living with the powerful forces of water and wind. Travelers can experience local seafood, ascend three lighthouses, and discover outdoor trails and endless miles of marsh and beaches offering bird-watching and solitude.

Road to Rainier Scenic Byway Donald M. Johnstone,the South Pierce County Historical Society,2018-07-30 The Road to Rainier Scenic Byway has grown from a Native American forest trail, hundreds of years old, to a modern forest highway carrying 1.5 million travelers a year. In 1833, a European tourist first reached a glacier, and soon others followed, seeking the wonders of Mount Rainier. In

1903, the railroad reached Eatonville; and national park visitors, who started as a few thousand, became tens of thousands. With a market for timber, hundreds rushed to claim the lands. Forestry and tourism both thrived off the rich natural resources, and as the region developed, purely commercial ventures were supplemented with educational outreach. Charles L. Pack Experimental Forest, established in 1926, conducts scientific research into forest management and sustainability. Historical interpretation has become a function of the Mount Rainier Scenic Railroad and Logging Museum. The Road to Rainier Scenic Byway continues to serve all as it heads to scenic Mount Rainier.

Indiana's Ohio River Scenic Byway Leslie Townsend, 2007 The Ohio River Scenic Byway, designated a national scenic byway in 1996, travels through quaint river towns, thriving cities, and beautiful countryside on its 302-mile journey through southern Indiana. Indiana's history and early settlement began along the Ohio River and includes prehistoric Native American sites, 400-million-year-old Devonian fossil beds, the site where Lewis and Clark first met on the Corps of Discovery voyage, and Indiana's first state capitol. Communities along the Ohio River Scenic Byway include Lawrenceburg, Aurora, Rising Sun, Vevay, Madison, Jeffersonville, Clarksville, New Albany, Corydon, Leavenworth, Cannelton, Tell City, Troy, Rockport, Newburgh, Evansville, and Mount Vernon. The byway celebrates the scenic, recreational, and historic in its architecture, winding roads, and overlooks.

The world-class lens of Willard Clay reveals secrets about his home state that justify another nickname: the State of Hidden Delights. For Wild & Scenic Illinois, Willard Clay has crisscrossed the state's byways and trails in his search for the rare, the beautiful, the seldom-seen jewels of the Illinois landscape. Wild & Scenic Illinois is the most discerning and the most rhapsodic portrait of the natural face of Illinois ever published. Clay has gleaned images from every province in Illinois, ranging across all seasons, times, and natural subjects. Modeling Forest Scenic Beauty Thomas Capnor Brown, 1984 Statistical models are presented which relate near-view scenic beauty of ponderosa pine stands in the Southwest to variables describing physical characteristics. The models suggest that herbage and large ponderosa pine contribute to scenic beauty, while numbers of small and intermediate-sized pine trees and downed wood, especially as slash, detract from scenic beauty. Areas of lower overstory density and less tree clumping were preferred. Moderate harvest of relatively dense stands tends to improve scenic beauty once the stand has recovered from obvious harvest effects. The recovery period can be greatly reduced by slash cleanup.

Mount Tamalpais Scenic Railway Fred Runner, 2009 A hundred years ago, high on the summit of Mount Tamalpais, stood a grand lodge with a breathtaking view. For 33 years, elegantly dressed men and women came to visit on the gritty steam trains of a famous twisting railroad known affectionately as the Crookedest Railroad in the World. They could dine, dance, and spend the night, and in the morning coast down the mountain in a gravity car. The Mount Tamalpais Scenic Railway had 281 curves in 8 1/5 miles. It had a branch into Muir Woods. It was built by business-minded conservationists in seven months in 1896 and climbed from a depot on the dirt streets of Mill Valley through a redwood forest and on to the rocky summit one-half mile above San Francisco Bay--P.
