Scientist, Scientist, Who Do You See? Chris Ferrie, 2018-04-03 A scientific twist on a beloved children's classic that's sure to delight both parent and child! Scientist, Scientist, Who do you see? I see Marie Curie in her laboratory! The adored children's classic Brown Bear, Brown Bear gets a nerdy makeover in this science picture book by the #1 bestselling science author for kids. Chris Ferrie! Young readers will delight at taking a familiar text and poking fun at it all while learning about scientists and how they changed the world. Back matter includes brief biographical information of the featured scientists. This sweet baby scientist book parody is the perfect inspiration for scientists of all ages! One of the best books about scientists for kids of the year! Full of scientific rhyming fun, Scientist, Scientist, Who Do You See? features appearances by some of the world's greatest scientists! From Albert Einstein to Marie Curie and Ahmed Zewail, from Charles Darwin to Chien-Shiung Wu and Grace Hopper... and more!

What Is a Scientist? Barbara Lehn, 1999-08 Simple text and photographs depict children engaged in various activities that make up the scientific process.

On Being a Scientist National Academy of Sciences, Committee on Science, Engineering, and Public Policy, National Academy of Engineering, Institute of Medicine, 1995-02-10 Though this book is aimed primarily at graduate students and beginning researchers, its lessons apply to all scientists at all stages of their scientific careers. The future of science depends on attracting outstanding young people to research - not only of enormous energy and talent but people of strong character who will be tomorrow's leaders.

The Scientist as Rebel Freeman Dyson, 2014-08-26 From Galileo to today's amateur astronomers, scientists have been rebels, writes Freeman Dyson. Like artists and poets, they are free spirits who resist the restrictions their cultures impose on them. In their pursuit of nature's truths, they are guided as much by imagination as by reason, and their greatest theories have the uniqueness and beauty of great works of art. Dyson argues that the best way to understand science is by understanding those who practice it. He tells stories of scientists at work, ranging from Isaac Newton's absorption in physics, alchemy, theology, and politics, to Ernest Rutherford's discovery of the structure of the atom, to Albert Einstein's stubborn hostility to the idea of black holes. His descriptions of brilliant physicists like Edward Teller and Richard Feynman are enlivened by his own reminiscences of them. He looks with a skeptical eye at fashionable scientific fads and fantasies, and speculates on the future of climate prediction, genetic engineering, the colonization of space, and the possibility that paranormal phenomena may exist yet not be scientifically verifiable. Dyson also looks beyond particular scientific questions to reflect on broader philosophical issues, such as the limits of reductionism, the morality of strategic bombing and nuclear weapons, the preservation of the environment, and the relationship between science and religion. These essays, by a distinguished physicist who is also a prolific writer, offer informed insights into the history of science and fresh perspectives on contentious current debates about science, ethics, and faith.

How to be a Scientist Steve Mould, 2017-05-09 Learn how to think like a scientist, look at the world in a brand-new way and have tons of fun with science comedian Steve Mould's bold and playful kids science book. Supporting STEM and STEAM education initiatives, How to be a Scientist will inspire kids to ask questions, do activities, think creatively, and discover amazing fun facts! A firm favorite in classrooms and homes alike, this science book for kids has earned itself a permanent spot on many family bookshelves. With more than 40 fun questions, experiments, games, and real-life scenarios that make scientific concepts fun and relevant, it's not hard to see why! Simple activities with undetermined answers encourage curious young readers to find new ways to test ideas. The stories of the great scientists and their discoveries (and failures) are told in an entertaining way to provide even further inspiration for budding young scientists. This educational book has the amazing ability to cover a wide range of ages, so if your children have an age gap this is a fantastic way to get them to engage with each other in a fun and educational way. It is informative, colorful, well written and draws you into its pages with an insatiable appetite for the simpler facts of science. Most of the home science experiments for kids are easy to do with items most people already have around the house, making it super easy to go from idea to execution. Explore, Investigate And Test Your Ideas! Discover the skills it takes to become a scientist. Being a scientist isn't just about wearing a white coat and doing experiments in a lab. It's about exploring, investigating, testing and figuring out how things work. How To Be A Scientist is packed with fun activities and projects that let you answer lots of tricky questions and help to explain the world around you. This kid's educational book challenges children to think for themselves and covers topics like: - Weather, making a tornado, the water cycle, how to make a compass - Energy, hot air balloons, electricity, Newton and Einstein - The solar system, making a sundial, creating your own sunrise, phases of the moon How to be a Scientist (Careers for Kids) is one of four fantastic books in the How to... educational books series, including How To Be A Math Genius, How to Be Good at Math, and How to Make a Better World. Official reviews include: International Literacy Association's Children's Choices 2018 Reading List Readers will be inspired to learn more about how to think and act like these famous scientists while uncovering deep scientific knowledge they can apply through fun-filled science projects. Minnesota Parent This mix of classic and unusual science anecdotes and experiments is just the thing for budding STEM/STEAM fans, including tips for learning how to think and act like a scientist with fun activities and simple scientific explanations of biology, anatomy, physics, astronomy, chemistry and more.

Moments in the Life of a Scientist Bruno Rossi, 1990-08-23 During recent decades, our vision of the world of physics - from the subatomic world to

the cosmos - has undergone a profound evolution. In this book, one of the scientists who contributed to this development narrates the story of his life and his work.

A Scientist at the Seashore James S. Trefil,2012-12-13 A noted physicist and popular science writer explains why the sea is salty, how bubbles form on the water's surface, where waves come from, and other curiosities. 1987 edition.

Who Is a Scientist? Laura Gehl,2021-10-05 Scientists work hard in the lab and in the field to make important discoveries. But who are they really? It turns out they are just like us! Scientists can be any race. And any gender. They can wear lab coats, jeans, or even tutus. And they are people who love to fly drones, make art, and even eat French fries! Meet fourteen phenomenal scientists who might just change the way you think about who a scientist is. They share their scientific work in fields like entomology, meteorology, paleontology, and engineering as well as other interesting facts about themselves and their hobbies. And if you like this, you'll like that flowchart in the back of the book helps students identify science careers they might be interested in. Scan a QR code at the end of the book for a video of the scientists introducing themselves!

This Little Scientist Joan Holub,2018-09-25 Learn all about scientists who changed history in this engaging and colorful board book perfect for inventors-in-training! Asking why. Then making a guess. Asking how. Then proving with tests. Little scientists make great big discoveries. In this follow up to This Little President, This Little Explorer, and This Little Trailblazer now even the youngest readers can learn all about great and empowering scientists in history! Highlighting ten memorable scientists who paved the way, parents and little ones alike will love this discovery primer full of fun, age-appropriate facts and bold illustrations.

Mind, Life and Universe Lynn Margulis,Eduardo Punset,2007-08-15 Nearly forty of the world's most esteemed scientists discuss the big questions that drive their illustrious careers. Co-editor Eduardo Punset—one of Spain's most loved personages for his popularization of the sciences—interviews an impressive collection of characters drawing out the seldom seen personalities of the world's most important men and women of science. In *Mind, Life and Universe* they describe in their own words the most important and fascinating aspects of their research. Frank and often irreverent, these interviews will keep even the most casual reader of science books rapt for hours. Can brain science explain feelings of happiness and despair? Is it true that chimpanzees are just like us when it comes to sexual innuendo? Is there any hard evidence that life exists anywhere other than on the Earth? Through Punset's skillful questioning, readers will meet one scientist who is passionate about the genetic control of everything and another who spends her every waking hour making sure African ecosystems stay intact. The men and women assembled here by Lynn Margulis and Eduardo Punset will provide a source of endless interest. In captivating conversations with such science luminaries as Jane Goodall, James E. Lovelock, Oliver Sachs, and E. O. Wilson, Punset reveals a hidden world of intellectual interests, verve, and humor. Science enthusiasts and general readers alike will devour *Mind, Life and Universe*, breathless and enchanted by its truths.

Don't Be Such a Scientist, Second Edition Randy Olson,2018-04-10 In *Don't Be Such a Scientist*, Randy Olson shares lessons of his transformation from tenured professor to Hollywood filmmaker, challenging the science world to toss out its stodgy past in favor of something more dynamic --and ultimately more human. In this second edition, Olson builds upon the radical approach of *Don't Be Such a Scientist* through timely updates and new stories. In his signature candid style, Olson weighs in on recent events in the science community, celebrating the rise in grassroots activism while critiquing the scientific establishment. In an age of renewed attack on science, *Don't Be Such a Scientist, Second Edition* is a provocative guide to making your voice heard.--

The Scientists: An Epic of Discovery Andrew Robinson,2023-04-25 An intriguing and illuminating read for science buffs, those fascinated by the lives and minds of great men and women, and anyone curious about how we came to understand the physical world The ideas, experiments, and inventions of great scientists have revolutionized our understanding of the world around us. Theories, discoveries, and technologies—from relativity, the genetic code, and the periodic table to synthetic drugs, nuclear weapons, and brain scans—have transformed the physical world and our lives. Copernicus, Crick, Watson, Galileo, Marie Curie: these are some of the forty pioneers behind modern science whose stories are explored here. The scientists come from around the globe and represent multiple nationalities—American, English, German, French, Dutch, Czech, Indian, Japanese, and more. Often unorthodox thinkers, they frequently had to struggle against hostile contemporaries to gain recognition for their ideas and discoveries. All the major scientific disciplines are covered, including astronomy, biology, biochemistry, chemistry, computing, ecology, geology, medicine, neurology, physics, and psychology, as well as mathematics.

Little Scientist Board Book Set Mudpuppy,2018-06-05 Mudpuppy's Little Scientist Board Book Set is comprised of colorful illustrated portraits of real women who have made historical impact on the world. Illustrations by Lydia Ortiz and words by Emily Kleinman introduce children to these important people in history with images that are fun for youngsters and also realistic. The Board Book Set includes 4 mini board books, 8 chunky pages per book, packaged in a slipcase box. -Slipcase box: 4 x 4 x 4 -Greyboard contains 90% recycled paper. Printed with nontoxic inks.

The Scientist's International Directory ,1895

How to be a Better Scientist Andrew Johnson,John Sumpter,2018-11-20 Understanding the fundamentals of conducting good science, that will have an impact, is the goal of every aspiring scientist. Providing a wealth of tips, How to be a Better Scientist is the book to read if you want to succeed in this competitive field. Helping readers gain an insight into what good science means and how to conduct it, this book is ideal to read cover-to-cover or dip into. It includes easily accessible guidance on topics such as: • What characteristics should a scientist have? • Understanding the hypothesis • Integrity in science • Lack of confidence and the embarrassment factor • Time management • Coping with rejection • Interacting with the science community With its broad focus, this friendly guide will enthuse, inspire and challenge, and is an essential companion for all aspiring scientists.

Distinguished African American Scientists of the 20th Century James H. Kessler,J. S. Kidd,Renee A. Kidd,Katherine A. Morin,1996-01-08 From George Washington Carver to Dr. Mae Jemison, African Americans have been making outstanding contributions in the field of science. This unique resource goes beyond the headlines in chronicling not just the scientific achievements but also the lives of 100 remarkable men and women. Each biography provides an absorbing account of the scientist's struggles, which often included overcoming prejudice, as they pursued their educational and professional goals.
