Being and the Screen Stephane Vial, 2019-11-12 How digital technology is profoundly renewing our sense of what is real and how we perceive. Digital technologies are not just tools; they are structures of perception. They determine the way in which the world appears to us. For nearly half a century, technology has provided us with perceptions coming from an unknown world. The digital beings that emerge from our screens and our interfaces disrupt the notion of what we experience as real, thereby leading us to relearn how to perceive. In *Being and the Screen*, Stéphane Vial provides a philosophical

analysis of technology in general, and of digital technologies in particular, that relies on the observation of experience (phenomenology) and the history of technology (epistemology). He explains that technology is no longer separate from ourselves—if it ever was. Rather, we are as much a part of the machine as the machine is part of us. Vial argues that the so-called difference between the real and the virtual does not exist and never has. We are living in a hybrid environment—which is both digital and nondigital, online and offline. With this book, Vial endows philosophical meaning to what we experience daily in our digital age. In *A Short Treatise on Design*, Vial offers a concise introduction to the discipline of design—not a history book, but a book built of philosophical problems, developing a theory of the effect of design. This book is published with the support of the University of Nîmes, France.

Smoke Screen Sandra Brown, 2008-08-12 The themes of role reversal and the abuse of power figure prominently in a tale in which corruption and betrayals turn friends against one another and force criminals to become heroes.

Smoke Screen Terri Blackstock, 2019-11-05 One father was murdered. Another was convicted of his death. And all because their children fell in love. Nate Beckett has spent his life fighting wildfires instead of the lies and rumors that drove him from his Colorado hometown. His mother begs him to come back now that his father has been released from prison, but it isn't until he's sidelined by an injury that he's forced to return and face his past. But that means facing Brenna too. Fourteen years ago, Nate was in love with the preacher's daughter. When Pastor Strickland discovered Brenna had defied him to sneak out with Nate, the fight between the Pastor and Nate's drunken dad was loud—and very public. The Pastor was

found murdered later that night, and everyone accused Nate's father, Roy, of the murder. When the church burned down not long after, people assumed Nate set the fire to get even for his father's conviction. He let the rumors fly and left town without looking back. Brenna is stunned to learn that the man convicted of murdering her father has been pardoned. The events of that night set her life on a bad course, and now she's fighting a brutal custody battle with her ex and his new wife where he's using lies and his family's money to sway the judge. Brenna is barely hanging on. As Nate and Brenna deal with the present—including new information about that fateful night and a wildfire that's threatening their town—the past keeps igniting. Nate is the steady force Brenna has so desperately needed. But she'll have to learn to trust him again first. Full-length, stand-alone suspense novel Also by New York Times bestselling author Terri Blackstock: *If I Run*, *Intervention*, *Cape Refuge*, *Aftermath* Includes discussion questions for book clubs

One World, Big Screen M. Todd Bennett, 2012 World War II coincided with cinema's golden age. Movies now considered classics were created at a time when all sides in the war were coming to realize the great power of popular films to motivate the masses. Through multinational research, *One World*,

Smoke Screen Kyle Mills, 2004-08 Unwillingly promoted to the tobacco industry's lead spokesperson, Trevor Barnett oversees the industry's economy-staggering production freeze in the wake of a high-stakes lawsuit, placing him in a tenacious position.

Life on the Screen Sherry Turkle, 2011-04-26 *Life on the Screen* is a book not about computers, but about people and how computers are causing us to reevaluate our identities in the age of the Internet. We

are using life on the screen to engage in new ways of thinking about evolution, relationships, politics, sex, and the self. *Life on the Screen* traces a set of boundary negotiations, telling the story of the changing impact of the computer on our psychological lives and our evolving ideas about minds, bodies, and machines. What is emerging, Turkle says, is a new sense of identity—as decentered and multiple. She describes trends in computer design, in artificial intelligence, and in people’s experiences of virtual environments that confirm a dramatic shift in our notions of self, other, machine, and world. The computer emerges as an object that brings postmodernism down to earth.

The Double Screen Wu Hung, 1996-11-22 This book contemplates a large problem: what is a traditional Chinese painting? Wu Hung answers this question through a comprehensive analysis of the screen, a major format and a popular pictorial motif in traditional China. With a broad array of examples ranging from the early centuries C.E. to the 1800s, he explores the screen’s position in art – as an important site for artistic imagination, as an illusionary representation on a flat surface, and as an architectural device defining cultural conventions. A screen occupies a space and divides it, supplies an ideal surface for painting, and has been a favourite pictorial image in Chinese art since antiquity. With its diverse roles, the screen has provided Chinese painters with endless opportunities to reinvent their art. The author argues that any understanding of Chinese painting must include discussion of its material forms as well as its intimate connection with cultural context and convention. Thus, *The Double Screen* offers a powerful non-western perspective on diverse artistic and cultural genres, from portraiture and pictorial narrative to voyeurism and masquerade, and will be invaluable to anyone interested in the history of art and Asian studies as well

as to students and specialists in the field.

Screen Memories Catherine Portuges, 1993 ... excellent... --Slavic Review ... displays a depth of scholarship and breadth of research which in the main is distilled into a fascinating read. At last Mészáros is getting the attention she deserves. --Sight and Sound Drawing on personal reminiscences, interviews with Meszaros, and critiques of individual films, Portuges delineates in detailed and convincing fashion the cultural contradictions surrounding Meszaros and her art. --Signs This book provides engaging insight to works by one of Hungary's best contemporary filmmakers, Márta Mészáros. --Canadian Slavonic Papers A fascinating exploration of the culture of post-Stalinist Eastern Europe through a detailed study of the achievements of its foremost woman director--and revealing interviews with the filmmaker and her collaborators. Márta Mészáros's visual representations of youth, sexual difference, and class conflict challenged official socialist versions of gender, family relations, and workers' lives. Her films include documentaries and features and the recently completed *Diary of My Father and Mother*.

Screen-based Art Annette W. Balkema, Henk Slager, 2000 In the 21st century, the screen - the Internet screen, the television screen, the video screen and all sorts of combinations thereof - will be booming in our visual and infotechno culture. Screen-based art, already a prominent and topical part of visual culture in the 1990s, will expand even more. In this volume, digital art - the new media - as well as its connectedness to cinema will be the subject of investigation. The starting point is a two-day symposium organized by the Netherlands Media Art Institute Montevideo/TBA, in collaboration with the L&B (Lier en Boog) series and the Amsterdam School of Cultural Analysis (ASCA). Issues which emerged during the course of

investigation deal with questions such as: How could screen-based art be distinguished from other art forms? Could screen-based art theoretically be understood in one definite model or should one search for various possibilities and/or models? Could screen-based art be canonized? What are the physical and theoretical forms of representation for screen-based art? What are the idiosyncratic concepts geared towards screen-based art? This volume includes various arguments, positions, and statements by artists, curators, philosophers, and theorists. The participants are Marie-Luise Angerer, Annette W. Balkema, René Beekman, Raymond Bellour, Peter Bogers, Joost Bolten, Noël Carroll, Sean Cubitt, Călin Dan, Chris Dercon, Honoré d'O, Anne-Marie Duquet, Ken Feingold, Ursula Frohne, hARTware curators, Heiner Holtappels, Aernout Mik, Patricia Pisters, Nicolaus Schafhausen, Jeffrey Shaw, Peter Sloterdijk, Ed S. Tan, Barbara Visser and Siegfried Zielinski.

The Third Screen Chuck Martin, 2014 With the 'first screen'-the television-companies sent ads directly into consumers' living rooms, reaching millions with one campaign. The 'second screen'-the personal computer-increased interaction between companies and consumers and allowed for immediate customer feedback. Now, the 'third screen'-the mobile device- changed the game in an even more revolutionary way. *The Third Screen: The Ultimate Guide to Mobile Marketing* defines the implications, strategies, and tactics used to thrive in business during the mobile revolution. This revised, updated paperback links technological developments to behavioral changes, reveals the unexpected forces of the changes in mobile, and equips marketers and businesses for the future.

The Educational Screen , 1954

The Silver Screen Suzanne Brent, 2018-12-07 A Mysterious envelope is delivered to Kate Clifton one year after her mother's death. The contents a personal note and video reveals amazing information that turns her life upside down. Her mother confesses to being part of a group of elite scientists headed up by Howard Hughes who created a time portal. All this is hidden behind the dignified studio Tyme productions. But it is when her mother reveals the true identity of her father a 1930's matinee idol that the video bursts into flames. In kate's haste to secure answers from Sherman Avery studio head she sets in motions events that not only send her back to 1939 Hollywood but changes her life forever.

The Face on the Screen Therese Davis, 2004 There was a time in screen culture when the facial close-up was a spectacular and mysterious image... The constant bombardment of the super-enlarged, computer-enhanced faces of advertising, the endless 'talking heads' of television and the ever-changing array of film stars' faces have reduced the face to a banal image, while the dream of early film theorists that the 'giant severed heads' of the screen could reveal 'the soul of man' to the masses is long since dead. And yet the end of this dream opens up the possibility for a different view of the face on the screen. The aim of the book is to seize this opportunity to rethink the facial close-up in terms other than subjectivity and identity by shifting the focus to questions of death and recognition. In doing so, the book proposes a dialectical reversal or about-face. It suggests that we focus our attention on the places in contemporary media where the face becomes unrecognisable, for it is here that the facial close-up expresses the powers of death. Using Walter Benjamin's theory of the dialectical image as a critical tool, the book provides detailed studies of a wide range of media spectacles of faces becoming unrecognisable. It shows how the mode of recognition enabled

by these faces is a shock experience that can open our eyes to the underside of the mask of self - the unrecognisable mortal face of self we spend our lives trying not to see. Turning on itself, so to speak, the face exposes the fragile relationship between social recognition and facial recognizability in the images-cultures of contemporary media.

On the Screen Ariel Rogers, 2019-07-30 Today, in a world of smartphones, tablets, and computers, screens are a pervasive part of daily life. Yet a multiplicity of screens has been integral to the media landscape since cinema's golden age. In *On the Screen*, Ariel Rogers rethinks the history of moving images by exploring how experiments with screen technologies in and around the 1930s changed the way films were produced, exhibited, and experienced. Marshalling extensive archival research, Rogers reveals the role screens played at the height of the era of "classical" Hollywood cinema. She shows how filmmakers, technicians, architects, and exhibitors employed a variety of screens within diverse spaces, including studio soundstages, theaters, homes, stores, and train stations. Far from inert, screens served as means of structuring mediated space and time, contributing to the transformations of modern culture. *On the Screen* demonstrates how particular approaches to the use of screens traversed production and exhibition, theatrical and extratheatrical practice, mainstream and avant-garde modes, and even cinema and television. Rogers's history challenges conventional narratives about the novelty of the twenty-first-century multiscreen environment, showing how attention to the variety of historical screen practices opens up new ways to understand contemporary media.

Mind the Screen Jaap Kooijman, Patricia Pisters, Wanda Strauven, 2008 *Mind the Screen* pays tribute to

the work of the pioneering European film scholar Thomas Elsaesser, author of several volumes on media studies and cinema culture. Covering a full scope of issues arising from the author's work—from melodrama and mediated memory to avant-garde practices, media archaeology, and the audiovisual archive—this collection elaborates and expands on Elsaesser's original ideas along the topical lines of cinephilia, the historical imaginary, the contemporary European cinematic experience, YouTube, and images of terrorism and double occupancy, among other topics. Contributions from well-known artists and scholars such as Mieke Bal and Warren Buckland explore a range of media concepts and provide a mirror for the multifaceted types of screens active in Elsaesser's work, including the television set, video installation, the digital interface, the mobile phone display, and of course, the hallowed silver screen of our contemporary film culture.
