Soft City David Sim,2019-08-20 Imagine waking up to the gentle noises of the city, and moving through your day with complete confidence that you will get where you need to go quickly and efficiently. Soft City is about ease and comfort, where density has a human dimension, adapting to our ever-changing needs, nurturing relationships, and accommodating the pleasures of everyday life. How do we move from the current reality in most cities—separated uses and lengthy commutes in single-occupancy vehicles that drain human, environmental, and community resources—to support a soft city approach? In *Soft City* David Sim, partner and creative director at Gehl, shows how this is possible, presenting ideas and graphic examples from around the globe. He draws from his vast design experience to make a case for a dense and diverse built environment at a human scale, which he presents through a series of observations of older and newer places, and a range of simple built phenomena, some traditional and some totally new inventions. Sim shows that increasing density is not enough. The soft city must consider the organization and layout of the built environment for more fluid movement and comfort, a diversity of building types, and thoughtful design to ensure a sustainable urban environment and society. *Soft City* begins with the big ideas of happiness and quality of life, and then shows how they are tied to the way we live. The heart of the book is highly visual and shows the building blocks for neighborhoods: building types and their organization and orientation; how we can get along as we get around a city; and living with the weather. As every citizen deals with the reality of a changing climate, *Soft City* explores how the built environment can adapt and respond. *Soft City* offers inspiration, ideas, and guidance for anyone interested in city building. Sim shows how to make any city more efficient, more livable, and better connected to the environment.

Small Actions: Leading Your Career To Big Success Eric Sim,Simon Mortlock,2021-11-26 The 'small actions' you take today can put you on the path to big career success tomorrow. If these actions are innovative, intelligent and well-timed, they can make a lasting impact and help you navigate your career journey in the face of uncertainty and disruptions. A key opinion leader on LinkedIn, Eric Sim shares practical and actionable tips to help you achieve your career goals. He draws these from his diverse real-life experience — from selling street food and training to be an engineer, to becoming a managing director at UBS Investment Bank. Arranged thematically into 66 bite-sized chapters, this book brings together a series of relatable stories and case studies. You'll learn valuable career lessons, such as why it's important to be a 'combo specialist', and how you can influence people and build your personal brand. Whether you're just starting out in the workforce or are looking to get further ahead, let this book inspire you to take powerful small actions of your own.

Citizen Sim: Cradle of the Stars Michael Solana,2017-07 Johnny Clark is an ordinary, teenaged slacker from an ordinary family in an ordinary town. But when he wakes up on his fifteenth birthday with memories and abilities that don't belong to him, he's strangely compelled to build a machine that turns him invisible and erases his entire life. Now, with the help of Layla Storm, a rambunctious, teenaged girl with a taste for trouble and a secret that could end the world, he must escape demonic creatures and a lethal band of interstellar assassins as he races to uncover the extraordinary truth about his past. The duo's only hope for survival lies in the mysterious clues left by the enigmatic Citizen Sim, a rogue hacker who will either save Johnny's life or be his end, but not before pushing him head first into a kaleidoscopic future world that is as dazzling as it is dangerous. *CITIZEN SIM: CRADLE OF THE STARS* kicks off a fresh new young adult sci-fi series by debut author Michael Solana, whose fully-realized space-scape of simulated reality and retro-futurism combines the best of *The Matrix* and *Ender's Game* with a brand new voice and a breakneck pace that will keep you turning pages until the very last.

SIM'S LESSEE v. IRVINE, 3 U.S. 425 (1799) ,1799 File No. 58

Dave Sim Eric Hoffman,Dominick Grace,2013-03-01 In 1977, Dave Sim (b. 1956) began to self-publish *Cerebus*, one of the earliest and most significant independent comics, which ran for 300 issues and ended, as Sim had planned from early on, in 2004. Over the run of the comic, Sim used it as a springboard to explore not only the potential of the comics medium but also many of the core assumptions of Western society. Through it he analyzed politics, the dynamics of love, religion, and, most controversially, the influence of feminism—which Sim believes has had a negative impact on society. Moreover, Sim inserted himself squarely into the comic as *Cerebus*'s creator, thereby inviting criticism not only of the creation, but also of the creator. What few interviews Sim gave often pushed the limits of what an interview might be in much the same way that *Cerebus* pushed the limits of what a comic might be. In interviews Sim is generous, expansive, provocative, and sometimes even antagonistic. Regardless of mood, he is always insightful and fascinating. His discursive style is not conducive to the sound bite or to easy summary. Many of these interviews have been out of print for years. And, while the interviews range from very general, career-spanning explorations of his complex work and ideas, to tightly focused discussions on specific details of *Cerebus*, all the interviews contained herein are engaging and revealing.

Sims F. Paul Wilson,2004-09 This new science thriller takes place in the very near future--in a world where genetically transmitted diseases are being eliminated and manual labor is gradually being transferred to sims, genetically altered chimps who occupy a gray zone between simian and human.

Here Comes Sim Sim Fryson,2017-05-10 Here Comes Sim! That sign adorned the front of an old, beat-up pickup truck belonging to Sim Fryson, Sr., a black man born in the Deep South of Reform, Alabama, in 1896. There Goes Sim! read the sign on the back of the truck that Sim used to haul manure, dirt, and coal to help support his large family. Sim Fryson Jr., or Simmy, as his mother called him, was often teased as a child about that battered old truck. But he knew that his father, despite the persecution and prejudice he faced every day, was a man of extreme integrity. Sim Sr. treated everyone with respect and dignity and expected the same in return. That positive influence created in young Sim a burning desire to grow up to be a man his father would be proud of. This book is the story of the younger Sim's life and how he rose from humble beginnings to be a successful college-educated businessman, athlete, musician, family man, and community leader. He was the first black American to own multiple car dealership franchises of Mercedes-Benz, Honda, Nissan and Mazda. As a tribute to his father, Here Comes Sim adorned the front of every car he sold. Among many other honors, he has been listed in *Black Enterprise Magazine* as one of the top 100 Black Businesses in the country. Co-writing with author Susan Phelps Harvey, Sim tells his story with

candor. Sometimes funny, sometimes awkward, but always honest and true, Sim tells it like it is, revealing his teenage escapades, his encounters with famous athletes, and his constant drive to succeed to honor his father's name. As Sim gained success, he realized that he hadn't done it all on his own. God had blessed him. He began to study his Bible as intently and carefully as he had done everything else in his life. Along the way, he developed a new and deeper relationship with God, and discovered Bible truths that challenged him to make profound changes in the way he ran his business. His struggles with his conscience and the miraculous way God blessed his decisions to do the right thing are at the heart of this story. Sim Fryson continues to strive to live his life in a way that honors the memory of his earthly father, and, every day, he gives all the glory and praise to his heavenly Father.

Short Sims Clark Aldrich,2020-02-26 Short Sims: A Game Changer explores the design concepts, dialogue, and formatting of interactive simulations. Interactivity is the key to effective educational media in schools, corporations, the military, and government. However, challenges like ineffective linear content or expenses can derail the product. This book provides a proven methodology to guide anyone through the steps of quickly creating highly engaging and responsive content. The process combines decades of research and implementations with leading organizations (Bill & Melinda Gates Foundation, Harvard Business School Publishing, Visa, State Department) with new tools that have just emerged. Key Features This book provides numerous code examples to illustrate how to put the techniques into practice. It includes expanded introductions to mathematics fundamental to computer graphics and game development. Graphics and physics are covered in introductory overviews. Author Bio Clark Aldrich is an education technology thought leader—the author of six books and developer of patent and award-winning projects. He currently builds custom Short Sims for organizations using a revolutionary methodology he has pioneered, or helps them build their own, through www.shortsims.com. He is also the host of an audio series called Education X Media (www.edbymedia.com) about evolving pedagogy in academics, corporations, and the military. He has been called a guru by Fortune Magazine and a maverick by CNN. Aldrich and his work have been featured in hundreds of other sources, including CBS, ABC, The New York Times, USA Today, the Associated Press, Wall Street Journal, NPR, CNET, Business 2.0, BusinessWeek, and U.S. News and World Report. He has written monthly columns for Training Magazine and Online Learning Magazine. Previously, he was the founder and former director of research for Gartner's e-learning coverage. Earlier in his career, he worked on special projects for Xerox' executive team. He also served for many years as the Governor's representative on the education task force Joint Committee on Educational Technology, volunteered on several non-profit organizations aimed at child advocacy, and has served on numerous boards. He earned from Brown University a degree in cognitive science (during which he also taught at a leading environmental education foundation). He grew up in Concord, Massachusetts, and is the ninth great-grandson of Governors John Winthrop and Thomas Dudley, first and second governors of the Massachusetts Bay Colony, and Captain Walter Neale, the first colonial governor of lower New Hampshire.

Secondary Ion Mass Spectrometry SIMS V Alfred Benninghoven,Richard J. Colton,David S. Simons,Helmut W. Werner,2012-12-06 This volume contains the proceedings of the Fifth International Conference on Secondary Ion Mass Spectrometry (SIMS V), held at the Capitol Holiday Inn, Washington, DC, USA, from September 30 to October 4, 1985. The conference was the fifth in a series of conferences held biennially. Previous conferences were held in Münster (1977), Stanford (1979), Budapest (1981), and Osaka (1983). SIMS V was organized by Dr. R.J. Colton of the Naval Research Laboratory and Dr. D.S. Simons of the National Bureau of Standards under the auspices of the International Organizing Committee chaired by Prof. A. Benninghoven of the Universität Münster. Dr. Richard F.K. Herzog served as the honorary chairman of SIMS V. While Dr. Herzog is best known to the mass spectrometry community for his theoretical development of a mass spectrometer design, known as the Mattauch-Herzog geometry, he also made several early and important contributions to SIMS. In 1949, Herzog and Viehbock published a description of the first instrument designed to study secondary ions produced by bombardment from a beam of ions generated in a source that was separated from the sample by a narrow tube. Later at the GCA Corporation, he brought together a team of researchers including H.J. Liebl, F.G. Riidenauer, W.P. Poschenrieder and F.G. Satkiewicz, who designed and built, and carried out applied research with the first commercial ion microprobe.
