Singing and Communicating in English Kathryn LaBouff,2007-12-21 From the Foreword by Renee Fleming: Kathryn LaBouff has developed an approach to singing in the English language which is wonderfully user-friendly, and which has surely saved much wear and tear on my voice. It is a technique that has empowered me with the knowledge and skills to bring a text to life and to be able to negotiate all of the sounds of the language with the least amount of effort. I have found her clever and extremely creative use of substitute consonants or combinations of consonants in creating clear diction utterly delightful because they are surprising and because they work. These techniques have been equally useful when singing in foreign languages. We sopranos are not usually known to have good diction, particularly in our high range. I found that working with Kathryn improved my ability to be understood by an enormous percentile of the audience with much less vocal fatigue than I would have experienced if left to my own devices. I have often told my colleagues enthusiastically of her interesting solutions to the frustrating problems of diction. I am thrilled that her techniques are now in print for all to benefit from them. In Singing and Communicating in English, internationally renowned diction coach Kathryn LaBouff provides singers with an accessible guide to the principles of English diction they need to communicate the text successfully. Her thorough and much sought-after technique clarifies the physiology of speech, emphasizes the studied practice of careful and articulate pronunciation, and focuses on the study of English cadence. Covering aspects of phonetics from vowels to diphthongs to fricatives, the book includes multiple practical exercises in International Phonetic Alphabet (IPA) transcriptions, helpful diagrams, and pronunciation drills, each chosen from the most essential English art song and operatic repertoire. In addition to standard American and British English, a variety of regional dialects and accents are covered in depth. A companion website features a full range of vowel/consonant drills, poems read aloud by the author and by theater and voiceover actor John Keating, as well as an exercise answer key, and publishers' lists to help the singer locate a vast array of English language works for performance. This book is an invaluable resource for all vocalists (both professional and aspiring), diction instructors, teachers, and coaches, and choral directors. Singing and Teaching Singing Janice L. Chapman,Ron Morris,2021-12-06 Singing and Teaching Singing: A Holistic Approach to Classical Voice, Fourth Edition continues to be a beloved resource for singers and their teachers, speech-language pathologists, and laryngologists and an adopted text for instructors and students in voice, singing, and performing arts courses. Janice L. Chapman is able to draw on her experiences as a singer with some of the world's leading opera companies to present a teaching technique specifically focusing on voice in the areas of classical and opera singing. Interspersed with the concepts and components of Chapman's methods are vignettes from her life and career, animated by her conversational and vibrant style to guide (and entertain) the reader through the book in a step-by-step fashion. Now expand to include joint authorships with Dr. Ron Morris, the fourth edition draws on his experience as a speech and language therapist, audiologist, and singer, and widens the scope of the book to view current studio teaching practices through a scientific lens. The philosophy of teaching presented combines three main facets: Holistic, Physiological, and Incremental. The Holistic segment emphasizes that the act of singing involves the whole person (i.e., body, mind, spirit, emotion, and voice); the Physiological segment stresses anatomy, muscular function, and effects of muscular interactions so that students and teachers alike can understand and visualize the functional workings of the torso, larynx, and the vocal tract and their impact on good singing practices; and the Incremental section shows that the act of singing and the teaching of singing can be broken down into manageable components that have a natural hierarchy that eventually interact and interlock. This teaching model provides a framework to master one element at a time, with the resulting effect of a complete and integrated mastery of technique. Chapman recommends this framework for rehabilitative work with the dysfunctional singer, for working with the developing singer, and for the ongoing development and maintenance

of the technically able professional singer. This highly-readable text includes contributions from renowned voice professionals, case studies, evidence-based and practical examples, exercises, and videos. New to the Fourth Edition: * New editor and co-author, Ron Morris, BSpThy (Hons); MMusStud (Voice), MSPAA, MASA (CC), PhD * The addition of completely new chapters on Laryngeal Registration, Vocal Acoustics and Acoustic Registration * Clarifications and exercises by Dr. Ron Morris on the use of the Accent Method breathing as a highly effective remedial and training technique * Expanded and updated information on Breathing and Support, Vocal Acoustics, Registers (Laryngeal and Acoustic), Teaching and Learning, Hearing and Singing, and Manual Therapy * Exercises have been significantly expanded and now are contained in a chapter of their own, which includes some information on lesson structure and practice * Significant updates reflect the current state of research and the latest advances in voice science and pedagogy have been referenced throughout * A new glossary has been added for ease of reading and clarification of pedagogical terms used in the text
