Site Matters Andrea Kahn,Carol J. Burns,2020-12-21 In the era of the Anthropocene, site matters are more pressing than ever. Building on the concepts, theories, and multi-disciplinary approaches raised in the first edition, this publication strives to address the changes that have taken place over the last 15 years with new material to complement and re-position the initial volume. Reaching across design disciplines, this highly illustrated anthology assembles essays from architects, landscape architects, urban designers, planners, historians, and artists to explore ways to physically and conceptually engage site. Thoughtful discourse and empirically grounded pieces combine to provide the language and theory to contextualize the meanings of site in the built environment. The increasingly complex hybridity of constructed environments today demands new tools for thinking about and working with site. Drawing contributions from outside and within the traditional design disciplines, this edition will trace important developments in site thinking with new essays on topics such as climate change, landscape as infrastructure, shifts from global to planetary urbanization debates, and the proliferation of participatory site transformation practices. Edited by two leading practitioners and academics, Site Matters juxtaposes timeless contributions from individuals including Elizabeth Meyer, Robert Beauregard, and Robin Dripps with original new writings from Peter Marcuse, Jane Wolff, Neil Brenner, and Thaisa Way, amongst others, to recontextualize and reignite the debate around site. An ideal text for students, academics, and researchers interested in site and design theory.

On this Site Joel Sternfeld,1996 In this sobering collection of photographs, Joel Sternfeld looks at fifty places where violence has stained the American landscape. Arriving long after news photographers have gone, he presents us with the landscape that is left behind, the ordinary site that remains after the tragedy. Free of the sensationalism of contemporary reporting, these unadorned images, and the brief text that accompanies them, have a surprising power, allowing us to contemplate the meaning of what has taken place, and what has been lost. In this work, one of the most acclaimed photographers of our time extends the documentary tradition, finding a way to visualize our beleaguered national sense, shaken by decades of violence. This groundbreaking work asks that we broaden our conventional definition of violence to include the consequences of corporate irresponsibility and governmental indifference. These picture stand as a heartfelt memorial. They mark sites that have become an indelible part of the American landscape. They ask us to stand on that difficult threshold between what has happened and what little remains; between what we know and what cannot be understood. This, too, is the American landscape.

Guidance Document for Cleanup of Surface Tank and Drum Sites, 1985

The Frozen Saqqaq Sites of Disko Bay, West Greenland - Qeqertasussuk and Qajaa (2400-900 BC) Bjarne Grønnow, 2017-03-01 Qeqertasussuk and Qajaa are the only known sites of the Early Arctic Small Tool tradition in the Eastern Arctic, where all kinds of organic materials - wood, bone, baleen, hair, skin - are preserved in permafrozen culture layers. Together, the sites cover the entire Saqqaq era in Greenland (c. 2400-900 BC). Technological and contextual analyses of the excellently preserved archaeological materials from the frozen layers form the core of this publication. Bjarne Grønnow draws a new picture of a true Arctic pioneer society with a remarkably complex technology. The Saqqaq hunting tool kit, consisting of bows, darts, lances, harpoons, and throwing boards as well as kayak-like sea-going vessels, is described for the first time. A wide variety of hand tools and household utensils as well as lithic and organic refuse and animal bones were found on the intact floor of a midpassage dwelling at Qeqertasussuk. These materials provide entirely new information on the daily life and subsistence of the earliest hunting groups in Greenland. Comparative studies put the Saqqaq Culture into a broad cultural-historical perspective as one of the pioneer societies of the Eastern Arctic.

The Art of Serendipity Wendy Ross, Samantha Copeland, 2022-02-10 Serendipity and creativity are both broad, widely disputed, and yet consistently popular concepts which are relevant to understanding the positive aspects of our daily lives and even human progress in the arts and sciences. The chapters in this book reflect a variety of theoretical and practical approaches to serendipity in various domains, including creative problem solving, sculpture, writing, theatre and design. Chapter authors address issues such as the nature of the 'prepared mind', the role of accidents, serendipity as a skill or way of engaging with the world and, indeed, how serendipity works as a concept and practice in relation to the dynamic flow of the creative system. Those who wish to explore the nature of chance in art

and creativity, as well as in their daily lives, will find much to ponder in these pages.
