Digital Gambling César Albarrán-Torres, 2018-03-28 This book develops the concept of gamble-play media, describing how some gambling and gambling-like practices are increasingly mediated by digital technologies. Digital gambling brings gambling closer to the practices and features of videogames, as audio-visual simulations structure users' experiences. By studying digital gambling from media studies, videogame and cultural studies approaches, this book offers a new critical perspective on the issues raised by computer-mediated gambling, while expanding our perspective on what media and gambling are. In particular, it critically analyses terrestrial, mobile and online slot machines, online poker and stock trading apps through a selection of case studies.

The Stuff Games Are Made Of Pippin Barr, 2023-08-01 A deep dive into practical game design through playful philosophy and philosophical play. What are video games made of? And what can that tell us about what they mean? In *The Stuff Games Are Made Of*, experimental game maker Pippin Barr explores the materials of video game design. Taking the reader on a deep dive into eight case studies of his own games, Barr illuminates the complex nature of video games and video game design, and the possibilities both offer for exploring ideas big and small. Through a variety of engaging and approachable examples, Barr shows how every single aspect of a game—whether it is code, graphics, interface, or even time itself—can be designed with and related to the player experience. Barr's experimental approach, with its emphasis on highly specific elements of games, will leave readers armed with intriguing design philosophy, conceptual rigor, and diverse insights into the inner life of video games. Upon finishing this book, readers will be ready to think deeply about the nature of games, to dive into expressive and experimental game design themselves, or simply to play with a new and expanded mindset.

Games Without Frontiers? Heather Wardle, 2021-07-16 This open access book focuses on how and why digital games and gambling are increasingly intertwined and asks "does this matter?" Looking at how "loot boxes" became the poster child for the convergence of gambling and gaming, Wardle traces how we got here. She argues that the intersection between gambling and gaming cultures has a long lineage, one that can be traced back throughout the 20th century but also incorporates more recent trends like the poker boom of the 1990s, the development of social media gambling products and the development of skin betting markets. Underpinned by changing technology, which facilitated new ways to bet, trade and play, the intersection between gaming and gambling cultures and products has accelerated within the last decade - and shows little signs of stopping. Wardle explores what this means for our understanding of risk, how gaming and gambling entities use each other for commercial advantage, and crucially explores what young people think of this, before making recommendations for action.

It will also be of interest to those within the cultural policy community and to digital games professionals.

Mainstreaming and Game Journalism David B. Nieborg, Maxwell Foxman, 2023-09-26 Why games are still niche and not mainstream, and how journalism can help them gain cultural credibility. *Mainstreaming and Game Journalism* addresses both the

history and current practice of game journalism, along with the roles writers and industry play in conveying that the medium is a “mainstream” form of entertainment. Through interviews with reporters, David B. Nieborg and Maxwell Foxman retrace how the game industry and journalists started a subcultural spiral in the 1980s that continues to this day. Digital play became increasingly exclusionary by appealing to niche audiences, relying on hardcore fans and favoring the male gamer stereotype. At the same time, this culture pushed journalists to the margins, leaving them toiling to find freelance gigs and deeply ambivalent about their profession. *Mainstreaming and Game Journalism* also examines the bumpy process of what we think of as “mainstreaming.” The authors argue that it encompasses three overlapping factors. First, for games to become mainstream, they need to become more ubiquitous through broader media coverage. Second, an increase in ludic literacy, or how-to play games, determines whether that greater visibility translates into accessibility. Third, the mainstreaming of games must gain cultural legitimacy. The fact that games are more visible does little if only a few people take them seriously or deem them worthy of attention. Ultimately, *Mainstreaming and Game Journalism* provocatively questions whether games ever will—or even should—gain widespread cultural acceptance.

Qualitative Research in Gambling Rebecca Cassidy, Andrea Pisac, Claire Loussouarn, 2013-10-30 The Open Access version of this book, available at <http://www.tandfebooks.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. Gambling is both a multi-billion-dollar international industry and a ubiquitous social and cultural phenomenon. It is also undergoing significant change, with new products and technologies, regulatory models, changing public attitudes and the sheer scale of the gambling enterprise necessitating innovative and mixed methodologies that are flexible,

responsive and 'agile'. This book seeks to demonstrate that researchers should look beyond the existing disciplinary territory and the dominant paradigm of 'problem gambling' in order to follow those changes across territorial, political, technical, regulatory and conceptual boundaries. The book draws on cutting-edge qualitative work in disciplines including geography, organisational studies, sociology, East Asian studies and anthropology to explore the production and consumption of risk, risky places, risk technologies, the gambling industry and connections between gambling and other kinds of speculation such as financial derivatives. In doing so it addresses some of the most important issues in contemporary social science, including: the challenges of studying deterritorialised social phenomena; globalising technologies and local markets; regulation as it operates across local, regional and international scales; and the rise of games, virtual worlds and social media.

What Stays in Vegas Adam Tanner, 2014-09-02 The greatest threat to privacy today is not the NSA, but good-old American companies. Internet giants, leading retailers, and other firms are voraciously gathering data with little oversight from anyone. In Las Vegas, no company knows the value of data better than Caesars Entertainment. Many thousands of enthusiastic clients pour through the ever-open doors of their casinos. The secret to the company's success lies in their one unrivaled asset: they know their clients intimately by tracking the activities of the overwhelming majority of gamblers. They know exactly what games they like to play, what foods they enjoy for breakfast, when they prefer to visit, who their favorite hostess might be, and exactly how to keep them coming back for more. Caesars' dogged data-gathering methods have been so successful that they have grown to become the world's largest casino operator, and have inspired companies of all kinds to ramp up their own data mining in the hopes of boosting their targeted marketing efforts. Some do this themselves. Some rely on data brokers. Others clearly enter a moral gray zone that should make American consumers deeply uncomfortable. We live in an age when our personal information is harvested and aggregated whether we like it or not. And it is growing ever more difficult for those businesses that choose not to engage in more intrusive data gathering to compete with those that do. Tanner's timely warning resounds: Yes, there are many benefits to the free flow of all this data, but there is a dark, unregulated, and destructive netherworld as well.

You Twit Face: Your Complete Guide to Nomophobia Clay Sherrod, 2016-11-11 Nomophobia - the fear of having our phones taken from us - is taking over our lives. The smart devices are in our homes, carried room-to-room as if glued to the hands of our family members. They meander into the bathroom, the laundry room, the shop, the garage, backyard and even into the bedroom where the adults once had their alone time. Our teenage children require them to either be under their pillows, by their pillows or within arm's reach at a nightstand in order to even sleep at night. The cell phone must be visible for them to take tests at school without withdrawal anxiety. The phones travel where we do - school, the office, the gym, so that we are in constant contact with the virtual world - other people who also have no real lives outside of their phone. They are ringing in churches, movie theaters, restaurants, concerts, funerals. Nothing says goodbye to the recently departed like your ring tone from Metallica's Hardwired. Welcome to the world of smart phone addiction.
