*Imagining Personal Data* Vaike Fors,Sarah Pink,Martin Berg,Tom O'Dell,2020-05-04 Digital self-tracking devices and data have become normal elements of everyday life. Imagining Personal Data examines the implications of the rise of body monitoring and digital self-tracking for how we inhabit, experience and imagine our everyday worlds and futures. Through a focus on how it feels to live in environments where data is emergent, present and characterized by a sense of uncertainty, the authors argue for a new interdisciplinary approach to understanding the implications of self-tracking,

which attends to its past, present and possible future. Building on social science approaches, the book accounts for the concerns of scholars working in design, philosophy and human-computer interaction. It problematizes the body and senses in relation to data and tracking devices, presents an accessible analytical account of the sensory and affective experiences of self-tracking, and questions the status of big data. In doing so it proposes an agenda for future research and design that puts people at its centre.

**Ambient Intelligence – Software and Applications –,10th International Symposium on Ambient Intelligence** Paulo Novais,Jaime Lloret,Pablo Chamoso,Davide Carneiro,Elena Navarro,Sigeru Omatu,2019-06-22 This book presents the latest research on Ambient Intelligence including software and applications. Ambient Intelligence (AmI) is a paradigm emerging from Artificial Intelligence, in which computers are used as proactive tools for assisting people with their day-to-day activities, making everyone's lives more comfortable. Another main concern of AmI originates from the human–computer interaction domain and focuses on offering ways to interact with systems in a more natural way by means of user-friendly interfaces. This field is evolving rapidly, as can be seen in emerging natural language and gesture-based types of interaction. This symposium was jointly organized by the Universidade do Minho, Technical University of Valencia, Hiroshima University, and University of Salamanca. The latest installment was held in Ávila, Spain, from 26th to 28th June 2019. The authors wish to thank the sponsors: IEEE Systems Man and Cybernetics Society, Spain Section Chapter and the IEEE Spain Section (Technical Co-Sponsor), IBM, Indra, Viewnext, Global Exchange, AEPIA, APPIA and AIR Institute.

Resistance Training Methods Alejandro Muñoz-López,Redha Taiar,Borja Sañudo,2021-10-18 This book reviews the main principles of resistance training, from basics to modern insights. It includes practical ways to develop most of the strength training methods, including monitoring and testing procedures. It merges practical tips with knowledge about the scientific background concerning program and periodization. It describes procedures for special populations, such as elderly or women. Gathering contributions by authoritative researchers and professors in the fields of sport science and biomechanics, this book provides an integrated view of strength training programming, and describes the most important biological factors associated with this type of training. The evidence-based and detailed description of each single mechanism to be trained to enhance performance is covered in depth. Thanks to its strong academic background, an being self-contained, this book offers a valuable reference guide for advanced undergraduate and graduate students in sports science, as well as an inspiring guide for sport and health researchers and professional trainers alike.

Lose It! Charles Teague,Anahad O'Connor,2010-12-21 The creators of the hit iPhone application outline the strategy's five components, counseling readers on such topics as making healthy food choices, understanding one's eating personality and establishing appropriate exercise practices. Original.

*The Sports Medicine Physician* Sérgio Rocha Piedade,Andreas B. Imhoff,Mark Clatworthy,Moises Cohen,João Espregueira-Mendes,2019-04-12 This superbly illustrated book provides information of outstanding quality on the presentation and management of the entire range of sports injuries and conditions likely to be encountered by the sports medicine physician, as well as many other topics relating to sports activity, events, and outcomes. It is the product of close collaboration among members of several ISAKOS committees, and the chapter authors are

clinicians and scientists from across the world who are acknowledged experts in sports medicine and orthopedics. The book opens by discussing fundamental topics and principles, covering subjects such as the biomechanics of injuries, physiological demands in sports practice, sports activity at different ages, nutrition and hydration, strength and conditioning, injury prevention, recovery, rehabilitation, and return to play. Subsequent chapters focus in depth on overtraining injuries, neurological disorders, sports trauma to different parts of the body, and special clinical conditions. Further topics to be addressed are different scenarios in sports (e.g., indoor vs outdoor), sports equipment, biologic treatment of sports injuries, major sporting events, and patient-recorded outcome measures.

**Interactive Sports Technologies** Veronika Tzankova,Michael Filimowicz,2022-06-01 Building on the unfolding and expanding embeddedness of digital technologies in all aspects of life, Interactive Sports Technologies: Performance, Participation, Safety focuses on the intersection of body movement, physical awareness, engineering, design, software, and hardware to capture emerging trends for enhancing sports and athletic activities. The accessible and inspiring compilation of theoretical, critical, and phenomenological approaches utilizes the domain of sports to extend our understanding of the nexus between somatic knowledge and human-computer interaction in general. Within this framework, the chapters in this volume draw upon a variety of concepts, processes, practices, and elucidative examples to bring together a timely assessment of interactive technologies' potential to facilitate increased performance, participation, and safety in sports. This collection of chapters from international authors presents diverse perspectives from a wide range of academic and practice-based researchers within a comprehensive coverage of sport disciplines.

**Designing for Wearables** Scott Sullivan,2016-12-20 Now may be the perfect time to enter the wearables industry. With the range of products that have appeared in recent years, you can determine which ideas resonate with users and which don't before leaping into the market. In this practical guide, author Scott Sullivan examines the current wearables ecosystem and then demonstrates the impact that service design in particular will have on these types of devices going forward. You'll learn about the history and influence of activity trackers, smartwatches, wearable cameras, the controversial Google Glass experiment, and other devices that have come out of the recent Wild West period. This book also dives into many other aspects of wearables design, including tools for creating new products and methodologies for measuring their usefulness. You'll explore: Emerging types of wearable technologies How to design services around wearable devices Key concepts that govern service design Prototyping processes and tools such as Arduino and Processing The importance of storytelling for introducing new wearables How wearables will change our relationship with computers

XV Mediterranean Conference on Medical and Biological Engineering and Computing – MEDICON 2019 Jorge Henriques,Nuno Neves,Paulo de Carvalho,2019-09-24 This book gathers the proceedings of MEDICON 2019 – the XV Mediterranean Conference on Medical and Biological Engineering and Computing – which was held in September 26-28, 2019, in Coimbra, Portugal. A special emphasis has been given to practical findings, techniques and methods, aimed at fostering an effective patient empowerment, i.e. to position the patient at the heart of the health system and encourages them to be actively involved in managing their own healthcare needs. The book reports on

research and development in electrical engineering, computing, data science and instrumentation, and on many topics at the interface between those disciplines. It provides academics and professionals with extensive knowledge on cutting-edge techniques and tools for detection, prevention, treatment and management of diseases. A special emphasis is given to effective advances, as well as new directions and challenges towards improving healthcare through holistic patient empowerment.
