Championship Ball Clair Bee,2017-11-16 The basketball season was opening at Valley Falls High and Chip Hilton, star center of last year's varsity, had his leg in a cast. In spite of Doc Jones' encouraging words, it looked like curtains for a sports career which had started out so brilliantly under Coach Hank Rockwell's canny tutelage. It was a bitter dose to swallow for a youngster with Chip's strong spirit and will to win. Many a kid in his shoes would have given in to self-pity and let the circumstances throw him. But because he loved the game and because of his loyalty to the Rock and to the school, Chip swallowed his pride and took over the uninspiring job of managing the basketball team. This is the story of Chip Hilton, manager, who with one bum leg and an unquenchable spirit, won the state championship for his team over all contenders, and won an even greater victory over himself. CLAIR BEE, one of the most famous athletes in American collegiate history -- and later a winning coach -- has drawn upon his own experiences for two of the most unforgettable characters in sports' fiction: Chip Hilton, the hero, and Hank Rockwell, the understanding coach.

Psychology of Reading Keith Rayner,Alexander Pollatsek,Jane Ashby,Charles Clifton Jr.,2012-05-22 Reading is a highly complex skill that is prerequisite to success in many societies in which a great deal of information is communicated in written form. Since the 1970s, much has been learned about the reading process from research by cognitive psychologists. This book summarizes that important work and puts it into a coherent framework. The book's central theme is how readers go about extracting information from the printed page and comprehending the text. Like its predecessor, this thoroughly updated 2nd Edition encompasses all aspects of the psychology of reading with chapters on writing systems, word recognition, the work of the eyes during reading, inner speech, sentence processing, discourse processing, learning to read, dyslexia, individual differences and speed reading. Psychology of Reading, 2nd Edition, is essential reading for undergraduates, graduates, and researchers in cognitive psychology and could be used as a core textbook on courses on the psychology of reading and related topics. In addition, the clear writing

style makes the book accessible to people without a background in psychology but who have a personal or professional interest in the process of reading.
