Rosina Ehmann

Spinning Tillie Walden, 2017-09-12 Tillie Walden's Eisner Award winning graphic memoir *Spinning* captures what it's like to come of age, come out, and come to terms with leaving behind everything you used to know. It was the same every morning. Wake up, grab the ice skates, and head to the rink while the world was still dark. Weekends were spent in glitter and tights at competitions. Perform. Smile. And do it again. She was good. She won. And she hated it. For ten years, figure skating was Tillie Walden's life. She woke before dawn for morning lessons, went straight to group practice after school, and spent weekends competing at ice rinks across the state. Skating was a central piece of her identity, her safe haven from the stress of school, bullies, and family. But as she switched schools, got into art, and fell in love with her first girlfriend, she began to question how the close-minded world of figure skating fit in with the rest of her life, and whether all the work was worth it given the reality: that she, and her friends on the team, were nowhere close to Olympic hopefuls. The more Tillie thought about it, the more Tillie realized she'd outgrown her passion—and she finally needed to find her own voice. This title has Common Core connections. The Intentional Spinner with DVD is a compendium of spinning wisdom, with a fun blend of technical knowledge, history, tips, and gently opinionated narrative. Managing Yarn Structure: Step-by-step instructions and photographs demonstrate the range of possibilities in yarn, from sturdy plied yarns to playful novelty yarns. Practical Uses: Learn how to make yarns that precisely match your needs with decision making and planning to create the exact project you want from the beginning. The Intentional Spinner with DVD includes four projects that demonstrate how handspun can be used in weaving and knitting. Blending technical expertise and fascinating lore, The Intentional Spinner with DVD is a must-have reference for every spinner.

Spin Robert Charles Wilson,2010-07-01 From the author of Axis and Vortex, the first Hugo Award-winning novel in the environmental apocalyptic Spin Trilogy... One night in October when he was

ten years old, Tyler Dupree stood in his back yard and watched the stars go out. They all flared into brilliance at once, then disappeared, replaced by a flat, empty black barrier. He and his best friends, Jason and Diane Lawton, had seen what became known as the Big Blackout. It would shape their lives. The effect is worldwide. The sun is now a featureless disk--a heat source, rather than an astronomical object. The moon is gone, but tides remain. Not only have the world's artificial satellites fallen out of orbit, their recovered remains are pitted and aged, as though they'd been in space far longer than their known lifespans. As Tyler, Jason, and Diane grow up, space probe reveals a bizarre truth: The barrier is artificial, generated by huge alien artifacts. Time is passing faster outside the barrier than inside--more than a hundred million years per day on Earth. At this rate, the death throes of the sun are only about forty years in our future. Jason, now a promising young scientist, devotes his life to working against this slow-moving apocalypse. Diane throws herself into hedonism, marrying a sinister cult leader who's forged a new religion out of the fears of the masses. Earth sends terraforming machines to Mars to let the onrush of time do its work, turning the planet green. Next they send humans...and immediately get back an emissary with thousands of years of stories to tell about the settling of Mars. Then Earth's probes reveal that an identical barrier has appeared around Mars. Jason, desperate, seeds near space with self-replicating machines that will scatter copies of themselves outward from the

sun--and report back on what they find. Life on Earth is about to get much, much stranger. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Hand Spinning Cotton Olive Linder, Harry Linder, 2014-01-01 The art of cotton spinning has become more sophisticated since Harry and Olive Linder first set out to disprove the myth that cotton was more difficult to spin than any other fiber. When the Linders first self-published *Handspinning Cotton* in 1977, there were very few spinners spinning cotton; it was an almost forgotten art. *Handspinning Cotton* has been out-of-print since 1995 and has been sorely missed. Currently, there is no single spinning book devoted solely to cotton fiber and the unique techniques for spinning it. The rights to the Linder's self-published book has remained in their family's hands since Harry and Olive's passing. As two of the Linder's first protégés, their daughters have asked us to update and republish this treasured book. It is our honor and privilege to try to do justice to the spirit of these cotton gurus who started a cotton-spinning revolution. While cotton spinning has grown up in the past 40 years, and there are many changes in how to approach cotton spinning, we have striven, in updating this book, to keep to the original spirit of Harry and Olive Linder's teaching. Their book is still a treasure and should stay intact for all future generations of cotton spinners.

SPIN® -Selling Neil Rackham, 2020-04-28 True or false? In selling high-value products or services: 'closing' increases your chance of success; it is essential to describe the benefits of your product or service to the customer; objection handling is an important skill; open questions are more effective than closed questions. All false, says this provocative book. Neil Rackham and his team studied more than 35,000 sales calls made by 10,000 sales people in 23 countries over 12 years. Their findings revealed that many of the methods developed for selling low-value goods just don't work for major sales. Rackham went on to introduce his SPIN-Selling method. SPIN describes the whole selling process: Situation questions Problem questions Implication questions Need-payoff questions SPIN-Selling provides you with a set of simple and practical techniques which have been tried in many of today's leading companies with dramatic improvements to their sales performance.

The Spinning Magnet Alanna Mitchell, 2018-01-30 The mystery of Earth's invisible, life-supporting power Alanna Mitchell's globe-trotting history of the science of electromagnetism and the Earth's magnetic field--right up to the latest indications

that the North and South Poles may soon reverse, with apocalyptic results--will soon change the way you think about our planet. Award-winning journalist Alanna Mitchell's science storytelling introduce intriguing characters--from the thirteenth-century French investigations into magnetism and the Victorian-era discover that electricity and magnetism emerge from the same fundamental force to the latest research. No one has ever told so eloquently how the Earth itself came to be seen as a magnet, spinning in space with two poles, and that those poles have dramatically reversed many time, often coinciding with mass extinctions. The most recent reversal was 780,000 years ago. Mitchell explores indications that the Earth's magnetic force field is decaying faster than previously thought. When the poles switch, a process that takes many years, the Earth is unprotected from solar radiation storms that would, among other disturbances, wipe out much and possible all of our electromagnetic technology. Navigation for all kinds of animals is disrupted without a stable, magnetic North Pole. But can you imagine no satelllites, no Internet, no smartphones--maybe no power grids at all? Alanna Mitchell offers a beautifully crafted narrative history of surprising ideas and science, illuminating invisible parts of our own planet that are constantly changing around us.
