The London Dennis Trident Matthew Wharmby,2021-07-21 Propelled towards the end of the 1990s by accessibility imperative requiring low floor buses both in London and the rest of Britain, Dennis developed a tri axle Trident double decker for Hong Kong and then adapted the design as a two axle version for Britain. Orders came thick and fast between 1999, when the first Tridents for London entered service with Stagecoach and 2006, when the Enviro 400, a combination of its unified body builders, replaced it. In those years over two thousand of the type appeared in London, ordered by Stagecoach, First London, United, Metroliner, Metrobus, London General, Blue Triangle, Connex, Armchair, and Hackney Community Transport. The body work was by Alexander ALX400, Plaxton, (Precedent) and East Lancs, to two available lengths, while badging itself progressed although Trans Bus, until this troubled organisation was suspended in 2004 by today's Alexander Dennis. Versatile and personable, the Trident in all its forms lasted two decades in London, the last examples being withdrawn from service in 2020.

Louisa Waterford and John Ruskin Caroline Ings-Chambers,2017-07-05 Louisa Waterford (1818-91), modest, retiring, of good family, renowned for her beauty, and with extraordinary grace, was the embodiment of a Victorian ideal of womanhood. But like the age itself, her life was filled with contrasts and paradoxes. She had been born with artistic gifts, and became a satellite of the Pre-Raphaelite Brotherhood, though she had no formal training. Then, at the height of John Ruskin's intellectual power and success as a critic, she asked him to accept her as an art student, and he accepted. Their correspondence- often harshly critical, never, as Waterford put it, falsely praising - lies at the heart of this book. These are letters which open a spectrum of discussion on the cultural, gender and social issues of the period. Both Waterford and Ruskin engaged in tireless philanthropic work for diverse causes, crossing social boundaries with subtle determination, and both responded to a sense of duty as well as an artistic vocation. But, as Ings-Chambers shows, their correspondence was more than a dialogue about society: it helped to make Waterford the artist she became.

Russia's Greatest Enemy? Charlotte Alston,2007-03-28 A remarkably talented linguist, foreign correspondent in Russia from 1904-1921 and Foreign Editor for 'The Times', 'Russia's Greatest Enemy?' traces the fascinating life and career of Harold Williams. This quiet and modest New Zealander played a central role in informing and influencing British opinion on Russia from the twilight of the Tsars, through War and Revolution, to the rise of the Soviet Union. The career of this keen Russophile and fierce opponent of Bolshevism illuminates the pre-World War One movement towards rapprochement with the Tsar, as well as the drive for intervention and isolation in the Soviet period. In this fascinating study Charlotte Alston explores the role of Williams as the interpreter of Russia

Cancer: Cell Structures, Carcinogens and Genomic Instability Leon P. Bignold,2006 Tumors can be induced by a variety of physical and chemical carcinogens. The resulting tumor cells are usually abnormal in their morphology and behavior and transmit their abnormalities to their daughter tumor cells. Most theories of the pathogenesis of tumors suggest that carcinogens in some way cause alterations either of the genomes or of inheritable patterns of gene expression in normal cells, which then cause morphological and behavioral changes. This volume presents a collection of articles aimed at the question by what genetic or epigenetic mechanisms carcinogens can cause morphological abnormalities of tumor cells. It includes reviews of cellular targets of known carcinogens, and presents varying viewpoints of how morphological abnormalities and the actions of carcinogens might be related. The volume will be of interest to all those who are involved in cancer research or in the prevention, diagnosis or management of tumors in humans or animals.

Molecular Control Mechanisms in Striated Muscle Contraction R.J. Solaro, R. Moss, 2013-04-17 Molecular Control Mechanisms in Striated Muscle Contraction addresses the molecular mechanisms by which contraction of heart and skeletal muscles is regulated, as well as the modulation of these mechanisms by important (patho)physiological variables such as ionic composition of the myoplasm and phosphorylations of contractile and regulatory proteins. For the novice, this volume includes chapters that summarize current understanding of excitation-contraction coupling in striated muscles, as well as the compositions and structures myofibrillar thick and thin filaments. For the expert, this volume presents detailed pictures of current understanding of the mechanisms underlying the CA²⁺ regulation of contraction in heart and skeletal muscles and discusses important directions for future investigation.
