Toggle Mark Gregory Akins,2022-11-23 Physicist George Norwell has always wanted to experiment with time travel. Funded by the government, the supersecret black holes he has created are potentially too dangerous to hand over to any government. So he borrows them. Successfully making a random trip into the past, Norwell cautiously expects to create no disturbance in the timestream. An unavoidable cascade of entanglements puts his faith and humanity on the line. Joined by friends, risks are undertaken to rescue an innocent woman from certain death. But a high price is to be paid in the form of angry villagers, domestic and international spies, and an unexpected galactic threat. No good deed shall go unpunished.

Mrs. Toggle and the Dinosaur--Dinosaur Sandwich Recipe Sharon Draznin,2014-02-01 Cooking projects provide a highly motivating, real-life application for learning. Memory Systems Bruce Jacob, Spencer Ng, David Wang, 2010-07-28 Is your memory hierarchy stopping your microprocessor from performing at the high level it should be? Memory Systems: Cache, DRAM, Disk shows you how to resolve this problem. The book tells you everything you need to know about the logical design and operation, physical design and operation, performance characteristics and resulting design trade-offs, and the energy consumption of modern memory hierarchies. You learn how to tackle the challenging optimization problems that result from the side-effects that can appear at any point in the entire hierarchy. As a result you will be able to design and emulate the entire memory hierarchy. Understand all levels of the system hierarchy -Xcache, DRAM, and disk. Evaluate the system-level effects of all design choices. Model performance and energy consumption for each component in the memory hierarchy.
